An Equal Opportunity
Employer

December 2019

The Minnesota State Board of Investment (SBI) is pleased to present its report for the fiscal year ending June 30, 2019.

SBI Results for Fiscal Year 2019

In a positive economic environment, the Combined Funds returned 7.3% during the fiscal year 2019. Over the recent fiscal 10-year and 20-year time periods, the Combined Funds generated annualized returns of 10.9% and 6.5%, respectively (see **page 11**).

Financial markets in the U.S. were buoyed by the combination of solid GDP growth and the prospect of the Federal Reserve (Fed) shifting its monetary policy stance back to easing mode. The U.S. economy, as measured by real Gross Domestic Product (GDP), grew 2.3% from a year earlier and the U.S. labor market unemployment rate remained near an historic low at 3.7%. During the 12 months ended June 30, 2019, the Fed raised the target range for its overnight policy rate (the Federal Funds rate) twice, each by a quarter-point (0.25%), to end the year at a target range of 2.25% - 2.50%. However, the Fed's shift to tighter monetary policy was short-lived. A sharp escalation in trade tensions in late 2018 between the United States and its key trading partners, most notably China, dampened consumer and business sentiment globally.

Both the U.S. equity and bond market posted strong positive returns for the fiscal year ending June 30, 2019. The Russell 3000 Index, a proxy for the broad U.S. equity market, returned 9.0% for the year while the U.S. bond market, as measured by the Bloomberg Barclays U.S. Aggregate Bond Index, returned 7.9% over the same period. Non-U.S. equity markets, as measured by the MSCI World ex USA (net) benchmark, underperformed the U.S. equity markets with a 1.3% return for the fiscal year.

On June 30, 2019, assets under management totaled \$101.1 billion. This total is the aggregate of various retirement funds, non-retirement funds, cash accounts, and state sponsored savings plans, each with different investment objectives. In establishing a comprehensive management program, the Board has developed an investment strategy for each fund which reflects its unique requirements.

Investment Beliefs

A set of Investment Beliefs adopted by the State Board of Investment reflect the SBI's investment values, acknowledge its role in supporting the State's broader pension systems, and guide the development of sound investing policies. These Investment Beliefs apply to the Combined Funds and other funds under the SBI's responsibility wherever appropriate. The Investment Beliefs appear after this letter.

The primary purpose of this annual report is to communicate the investment goals, policies and performance of each fund managed by the Board. Through the investment programs presented in this report, the Minnesota State Board of Investment seeks to enhance the management and performance of the assets under its control.

Sincerely,

A handwritten signature in dark ink, appearing to read "Mansco Perry III".

Mansco Perry III
Executive Director and Chief Investment Officer

SBI Investment Beliefs

The State Board of Investment (SBI) adopted a set of Investment Beliefs for managing the assets of the Combined Funds (those funds utilized to support the defined benefit plans of the State's employees). The primary purpose of these Beliefs is to guide the SBI toward sound investing principles related to investing on behalf of the Combined Funds. In this respect, the Beliefs help provide context for SBI's actions, reflect SBI's investment values, and acknowledge SBI's role in supporting the State's broader retirement systems. When relevant, the SBI also uses these Beliefs as a guide when investing the assets of the other investment programs that it manages, as deemed appropriate.

The SBI is a long-term investor whose primary mission is to maintain the viability of the retirement systems it supports.

When determining an appropriate level of risk that the systems' assets should bear the SBI must reflect the nature of those systems' liabilities and funding policy.

The SBI's strategic allocation policy is the primary determinant of (i) the asset portfolio's long-term investment return and (ii) asset portfolio's risk.

While the SBI can sacrifice some short-term liquidity to pursue a greater long-term return, the investment portfolio's net cash flows and ability to pay benefits on a year-by-year basis are key risk considerations.

Diversification improves the risk-adjusted return profile of the SBI investment portfolio.

Diversification of the SBI investment portfolio takes place across several critical dimensions, such as allocation across global regions and country markets (e.g., U.S. versus Europe, Asia, emerging markets, etc.), allocation among different types of assets (equities, bonds, real estate, etc.), spreading assets across various sectors and industries (e.g., technology, financials, consumer-oriented, etc.), and weighting of different risk factor premiums (e.g., value vs. growth, small companies vs. big companies, carry, illiquidity, etc.). If the correlation (i.e., relationship) among the returns generated by these factors is less than perfect (i.e., less than 1.0), then diversification is beneficial.

There are long-term benefits to SBI managing investment costs.

The equity risk premium is significantly positive over a long-term investment horizon although it can vary over time.

The equity risk premium is also pervasive across several asset classes and its overall exposure should be managed accordingly.

Private market investments have an illiquidity premium that the SBI can capture.

This risk premium can increase the portfolio's long-term compound return and help diversify the portfolio's risk.

It is extremely challenging for a large institutional investor to add significant value over market-representative benchmarks, particularly in the highly-competitive public global equity markets.

Passive management should be utilized when there is low confidence that active management can add value. Active management can have potential to add value where information processing is difficult and challenging, allowing for market inefficiencies that are potentially exploitable.

SBI Investment Beliefs

The SBI benefits significantly when roles and levels of authority are clearly defined and followed.

The role of the members of the State Board of Investment (Board) is to establish investment policies that are in compliance with state statute and guide the ongoing management of the funds. The Board delegates implementation of that policy to the Executive Director/CIO, and exercises oversight with respect to the Executive Director/CIO's implementation activities and the portfolio's active risk level in the context of the portfolio's strategic allocation policy. The Board also ensures adequate resources are available to the SBI staff to perform their work;

The Investment Advisory Council (IAC) key role is advising the Board and Executive Director/CIO on general policy matters and methods to enhance the management of the investment portfolio;

The Executive Director's/CIO's key role is implementing SBI investment policies and setting the portfolio's active risk level in a prudent manner to achieve value-added over policy benchmarks.

Utilizing engagement initiatives to address environmental, social, and governance-related (ESG) issues can lead to positive portfolio and governance outcomes.

In addition to specific engagement strategies the SBI might apply, proxy rights attached to shareholder interests in public companies are also "plan assets" of the SBI and represent a key mechanism for expressing SBI's positions relating to specific ESG issues. By taking a leadership role in promoting responsible corporate governance through the proxy voting process, SBI can contribute significantly to implementing ESG best practices which should, in turn, add long-term value to SBI's investments.

Governor Tim Walz, Chair

State Auditor Julie Blaha

Secretary of State Steve Simon

State Attorney General Keith Ellison

Investment Advisory Council

The Minnesota Legislature has established a seventeen member Investment Advisory Council (IAC) to advise the Board and its staff on investment-related matters.

The IAC fulfills its statutory duty to the State Board of Investment (SBI) by providing advice and independent due diligence review of the investment policy and implementation recommendations that guide the SBI's investment of assets.

The Board appoints ten members from the public experienced in finance and investment. These members traditionally have come from the Minneapolis and St. Paul investment community.

The Commissioner of Minnesota Management and Budget and the Executive Directors of the three statewide retirement systems are permanent members of the IAC.

Two active employee representatives and one retiree representative are appointed to the IAC by the Governor.

All proposed investment policies are reviewed by the IAC before they are presented to the Board for action.

As of December 2019

Introduction

The Minnesota State Board of Investment is responsible for the investment management of various retirement funds, trust funds and cash accounts. On June 30, 2019, the market value of all assets was \$101.1 billion.

Constitutional and Statutory Authority

The Minnesota State Board of Investment (SBI) is established by Article XI of the Minnesota Constitution to invest all state funds. Its membership as specified in the Constitution is comprised of the Governor (who is designated as chair of the Board), State Auditor, Secretary of State and Attorney General.

All investments undertaken by the SBI are governed by the prudent person rule and other standards codified in *Minnesota Statutes*, Chapter 11A and Chapter 356A.

During the course of the year, members of the board undertake numerous activities in their oversight of the State Board of Investment. Examples of board activities during 2019 include:

- Authorizing the Executive Director to negotiate 22 private market investment deals, totaling up to \$3.05 billion;
- Hearing testimony from various stakeholders and groups regarding investment issues, including but not limited to groups advocating that the SBI divest from certain sectors and companies (i.e. civilian firearms manufacturers, fossil fuel companies);
- Reviewing and adopting the SBI budget and Executive Director's annual work plan;

- Authorizing and appointing members of the SBI proxy committee;
- Appointing members to the Investment Advisory Council;
- Reviewing the Executive Director's performance;
- Meeting with the SBI consultants and Executive Director to discuss various investment initiatives; and
- Evaluating legislative initiatives that impact the SBI.

Prudent Person Rule

The prudent person rule, as codified in *Minnesota Statutes*, Section 11A.09, requires all members of the Board, Investment Advisory Council, and SBI staff to “...act in good faith and ...exercise that degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion, and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived therefrom.” *Minnesota Statutes*, Section 356A.04 contains similar codification of the prudent person rule applicable to the investment of pension fund assets.

Authorized Investments

In addition to the prudent person rule, *Minnesota Statutes*, Section 11A.24 contains a specific list of asset classes available for investment including common

stocks, bonds, short term securities, real estate, private equity, and resource funds. The section prescribes the maximum percentage of fund assets that may be invested in various asset classes and contains specific restrictions to ensure the quality of the investments.

Investment Policies

Within the requirements defined by state law, the State Board of Investment, in conjunction with SBI staff and the Investment Advisory Council, establishes investment policies for all funds under its control. These investment policies are tailored to the particular needs of each fund and specify investment objectives, risk tolerance, asset allocation, investment management structure and specific performance standards.

The Board, its staff, and the Investment Advisory Council have conducted detailed analyses that address investment objectives, asset allocation policy and management structure of each of the funds under the SBI's control. The policies guide the on-going management of these funds and are updated periodically.

ESG Initiatives

The Board also maintains the following investment belief: *Utilizing engagement initiatives to address environmental, social, and governance-related (ESG) issues can lead to positive portfolio and governance outcomes.* Staff continues to implement this investment belief through investment manager due diligence and proxy voting.

Introduction

The SBI continues to maintain membership in ESG advocacy organizations including the Council of Institutional Investors, Ceres, the United Nations Principles of Responsible Investment, and Institutional Limited Partners Association. These organizations provide engagement opportunities and other resources to more effectively address ESG issues.

Important Notes

Readers should note that the SBI's returns in this report are shown *after* transaction costs and fees are deducted. Performance is computed and reported after all applicable charges to assure that the Board's focus is on true net returns.

Due to the large number of individual securities owned by the funds managed by the SBI, this report does not include asset listings. **A complete list of securities is available on the SBI's website at <http://mn.gov/sbi>.** Asset listings are updated semi-annually as the new data becomes available.

Retirement Funds and Other Tax-Sheltered Qualified Savings Plans

\$82.1 billion

Combined Funds

\$70.7 billion

The Combined Funds represent the assets for both the active and retired public employees in the three statewide retirement systems and their retirement plans:

Teachers Retirement Fund (TRA)	\$22,837 million
Public Employees Retirement Association (PERA)	
General Employees Retirement Fund	22,389 million
Police and Fire Fund	8,829 million
Correctional Fund	744 million
Minnesota State Retirement System (MSRS)**	
State Employees Retirement Fund	13,721 million
Correctional Employees Fund	1,180 million
Highway Patrol Retirement Fund	749 million
Judges Retirement Fund	211 million

Participant Directed Investment Program

\$11.5 billion

The Participant Directed Investment Program (PDIP) provides investment vehicles for a variety of retirement and other tax-advantaged savings plans. PDIP is organized into three investment platforms.

Mutual Fund Line-Up

The mutual fund platform provides thirteen investment options to the Minnesota Deferred Compensation Plan, a tax sheltered savings plan that is a supplemental plan to their primary retirement plan.

\$7,494 million

Supplemental Investment Fund

The Supplemental Investment Fund (SIF) platform provides eight investment options designed to meet a wide range of needs and objectives. A total of \$2.5 billion in assets from eligible participants were invested in the SIF Investment offerings.

Health Care Savings Plan	\$1,188 million
Local Fire Relief Plans	337 million
St. Paul Teachers' Retirement Fund Association	324 million
Unclassified State Employees Retirement Plan	323 million
Hennepin County Supplemental Retirement Plan	161 million
Statewide Volunteer Firefighter Plan	107 million
Public Employees Retirement Association Defined Contribution Plan	73 million

State Sponsored Savings Plans

The state sponsored savings plans are established under the provisions of the Internal Revenue Code Section 529 to help families meet the costs of qualified expenses within the respective plans.

Minnesota College Savings Plan	1,503 million
Minnesota Achieving a Better Life Experience (ABLE) Plan	6 million

Funds Under Management

**Market Value
June 30, 2019***

Non-Retirement Funds

The SBI manages funds for trusts and programs created by the Minnesota State Constitution and Legislature.

\$18.9 billion

Trust Funds

Permanent School Fund

The Permanent School Fund is a trust established for the benefit of Minnesota public schools.

\$1,513 million

Environmental Trust Fund

The Environmental Trust Fund is a trust established for the protection and enhancement of Minnesota's environment. It is funded with a portion of the proceeds from the state's lottery.

\$1,215 million

Other Postemployment Benefits Accounts (OPEBs)

These accounts are the assets set aside by local units of government for the payment of retiree benefits trusted by the Public Employees Retirement Association.

\$662 million

Assigned Risk Plan

The Minnesota Workers Compensation Assigned Risk Plan provides worker compensation insurance for companies unable to obtain coverage through private carriers.

\$287 million

Miscellaneous Trust Accounts****

\$258 million

Closed Landfill Investment Fund

The Closed Landfill Investment Fund is a trust created by the Legislature to invest money to pay for the long-term costs of maintaining the integrity of landfills in Minnesota once they are closed.

\$97 million

State Cash Accounts

These accounts are the cash balances of state government funds including the General Fund, transportation funds, and miscellaneous cash accounts. Assets are invested through the Invested Treasurers Cash Pool in high quality, liquid, debt securities.

\$14,630 million

Miscellaneous State Accounts***

\$273 million

Total Assets Invested by SBI

\$101.1 billion

* Totals may not add due to rounding.

** The MSRS Legislative Plan is a closed plan that is funded by the General Fund on a "pay-as-you-go" basis.

*** Includes Debt Service, Public Facilities Authority (PFA), and Housing Finance.

**** Miscellaneous Trust Accounts include Qualifying Governmental Entities.

Combined Funds Overview

The Combined Funds represent the assets of both active and retired public employees who participate in the defined benefit plans of three statewide retirement systems: Teachers Retirement Association (TRA), Public Employees Retirement Association (PERA) and the Minnesota State Retirement System (MSRS). On June 30, 2019, the Combined Funds had a market value of \$70.7 billion.

Background

The Combined Funds consist of the assets of active employees and retired members of the three statewide retirement systems that sponsor eight different funds. The SBI commingles the assets of these plans into the Combined Funds to capture investment efficiencies.

Figure 2 identifies the eight different retirement funds which comprise the Combined Funds.

Investment Objectives

One overriding responsibility of the SBI with respect to the management of the Combined Funds is to ensure that sufficient funds are available to finance promised benefits.

Actuarial Assumed Return

Employee and employer contribution rates are specified in state law as a percentage of an employee's salary. The rates are set so that contributions plus expected investment earnings will cover the projected cost of promised pension benefits. The investment returns needed to meet these projected pension costs are set by statute. The 2018 Legislature lowered the actuarial interest rate assumption to 7.5% on an annual basis for the three statewide retirement systems composing the Combined Funds.

Time Horizon

In general, pension assets will accumulate in the Combined Funds for 30 to 40 years during an employee's years of active service. A typical retiree can be expected to draw benefits for an additional 15 to 20 years. This provides the Combined Funds with a long investment time horizon and permits the Board to take advantage of the long-run return opportunities offered by common stocks and other equity investments in order to meet the actuarial return target.

Asset Allocation

The allocation of assets among stocks, bonds, private markets (private market investments include private equity, private credit, real estate, real assets and distressed/opportunistic) and cash has a dramatic impact on investment results. In fact, asset allocation decisions overwhelm the impact of individual security selection within a total portfolio.

As illustrated in Figure 1, historical evidence indicates that U.S. Stocks have provided the greatest opportunity to maximize investment returns over the long-term. As a result,

Figure 2. Composition of Combined Funds as of June 30, 2019

* Includes the assets of Minneapolis Employees Retirement Fund (MERF).

** The MSRS Legislative Plan is a closed plan that is funded by the General Fund on a "pay-as-you-go" basis.

*** Total may not add due to rounding.

Combined Funds Overview

the Board has chosen to incorporate a large commitment to Public Equity (common stocks) and Private Equity in the asset allocation policy for the retirement funds. In order to limit the short-run volatility of returns exhibited by common stocks, the Board includes other asset classes such as fixed income (bonds), as well as other private market investments such as real estate, real assets, distressed/opportunistic and private credit investments in the total portfolio. This diversification is intended to reduce wide fluctuations in investment returns on a year-to-year basis and enhances the Funds' ability to meet or exceed the actuarial return target over the long-term.

Long-Term Allocation Policy

The Combined Funds have a policy asset allocation that is based on the investment objectives of the Combined Funds and the expected long-run performance of the capital markets. The SBI periodically reviews this policy allocation. In December of 2017, the Board approved increasing the private markets allocation from 20 to 25% and in 2018 added a dedicated Treasury portfolio to the allocation.

The long-term Strategic Asset Allocation of the SBI is:

Public Equity	53%
Fixed Income/Treasuries	20
Private Markets	25
Cash	2
Total	100%

Included in the Fixed Income allocation is a dedicated Treasury allocation.

The uninvested allocation to private markets investments is

held in public equities until it is needed for investment. As a result, the actual amount invested in stocks at any time can be above the target allocation.

Figure 3 presents the actual asset mix of the Combined Funds at the end of fiscal year 2019. Historical asset mix data is displayed in Figure 4.

Asset Mix Compared to Other Pension Funds

The Board finds it instructive to review asset mix and performance of the Combined Funds relative to other pension fund investors. The comparison universe used by the SBI is the Master Trust portion of the Trust Universe Comparison Service (TUCS). This universe contains information on public and corporate pension and trust funds with diversified asset

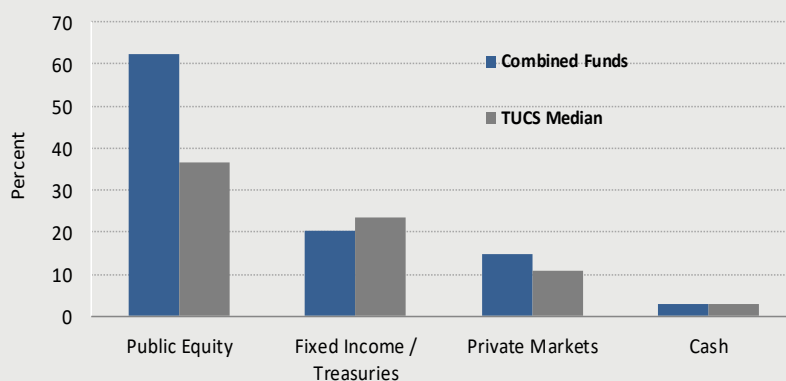

mixes and more than \$1 billion in assets.

Comparisons of the Combined Funds' actual asset mix to the median allocation to stocks, bonds and other assets of the funds in TUCS on June 30, 2019 are also displayed in Figure 3. The Combined Funds were overweighted in public equities, private markets, and cash, but underweighted in fixed income/treasuries relative to the median allocation in TUCS.

Total Return Vehicles

The SBI invests the majority of the Combined Funds' assets in **Common Stocks** (both domestic and international). A large allocation is consistent with the investment time horizon of the Combined Funds and the advantageous long-term risk-return characteristics of common stocks. Including international

Figure 3. Combined Funds Asset Mix Comparison as of June 30, 2019

Asset Groups	Combined Funds		
	Market Value (Millions)	Allocation % ⁽¹⁾	Median Allocation in TUCS ⁽²⁾
Public Equity	\$43,953	62.2%	36.5%
Fixed Income/Treasuries	14,377	20.3	23.5
Private Markets ⁽³⁾	10,281	14.6	10.8
Cash	2,048	2.9	2.8
Total	\$70,658	100.0%	

(1) May not add to 100% due to rounding.

(2) Represents the median allocation by asset class, and does not add to 100%.

(3) TUCS may include assets other than Private Markets Investments.

Combined Funds Overview

stocks in the asset mix allows the SBI to diversify holdings across world markets and offers the opportunity to enhance returns and reduce the volatility of the total portfolio. The rationale underlying the inclusion of **Private Equity** is similar.

The Board recognizes that this sizable policy allocation to common stock and private equity likely will produce more volatile portfolio returns than a more conservative policy focused on fixed income securities. It is understood that this policy may result in quarters or even years of relative underperformance. Nevertheless, the long-run return benefits of this policy have in the past and are expected in the future to compensate for the additional volatility.

Diversification Vehicles

The Board includes other asset classes in the Combined Funds to provide some protection against highly inflationary or deflationary environments and to diversify the portfolio sufficiently to avoid excessive return volatility.

The allocation to **Fixed Income and Treasuries** (bonds) is to act as a hedge against a deflationary economic environment. In the event of substantial deflation, high quality fixed income assets are expected to protect principal and generate significant capital gains. Bonds, like real estate and real assets, under normal financial conditions, help to diversify the Combined Funds, thereby controlling return volatility. The Treasury portfolio also provides strong downside protection during a market crisis.

Real Estate and Real Assets investments provide an inflation hedge that other financial assets cannot offer. Under normal financial conditions, such as low to moderate inflation, the returns on these assets are not highly correlated with common stocks. As a result, inclusion of these assets in the Combined Funds serves to dampen return volatility.

Private Credit investments provide the opportunity for higher long-term returns than those typically available from bonds, yet still generate sufficient current income. Typically, these investments (e.g., subordinated debt, mezzanine debt, or resource income investments such as producing properties) are structured more like fixed income securities with the opportunity to participate in the appreciation of the underlying assets. While these investments may have an equity component, they display a return pattern more like a bond. Therefore, they will help reduce the volatility of the total portfolio,

but should also generate higher returns relative to more traditional bond investments.

Investment Management

All assets in the Combined Funds are managed externally by investment management firms retained by contract. More information on the structure, management and performance of the various investment managers is included in the **Investment Program** sections of this report.

Return Objectives

The Board measures the performance of the Combined Funds relative to the following total rate of return objectives:

- **Provide Real Returns.** Over a twenty year period, the Combined Funds are expected to produce returns that exceed inflation by three to five percentage points on an annualized basis.

Figure 4. Combined Funds Historical Asset Mix Fiscal Year 2015-2019

Combined Funds Overview

- **Match or Exceed Market Returns.** Over a ten year period, the Combined Funds are expected to match or exceed a composite of market indices weighted using the asset allocation of the Combined Funds.

Performance is reported net of all fees and costs to assure that the Board's focus is on true net return.

Investment Results

Comparison to Inflation

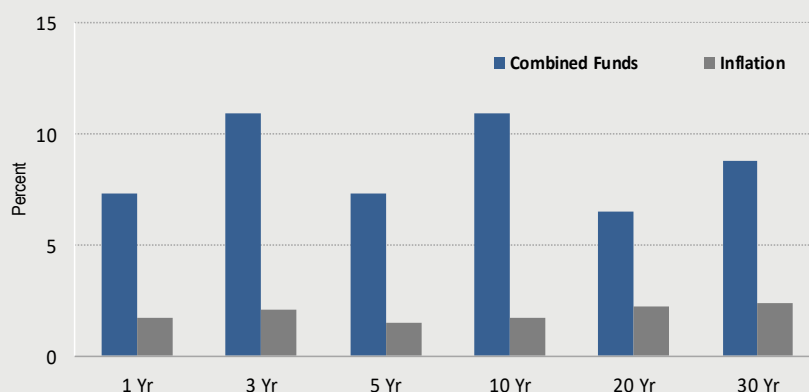

Over the last twenty years, the Combined Funds exceeded inflation by 4.3 percentage points. Historical results compared to inflation are shown in Figure 5.

Comparison to Market Returns

The Combined Funds' performance is also evaluated relative to a composite of market indices which is weighted in a manner that reflects the asset allocation of the Combined Funds. Performance relative to this standard will measure two effects:

- The ability of the managers selected by the SBI, in aggregate, to add value to the returns available from the broad capital markets.
- The impact of the SBI's rebalancing activity. The SBI rebalances the total Fund when market movements take the stock (domestic and international), bond, or cash segments above or below long-term asset allocation targets. This policy imposes a low risk discipline of "buy low-sell high" among asset classes on a total fund basis.

Figure 5. Combined Funds Performance vs. Inflation For Periods Ending June 30, 2019

Combined Funds Overview

Performance results and a breakdown of the composite index are shown in Figures 6 and 7. The Combined Funds exceeded the composite index over the last ten years by 0.4 percentage point and, therefore, met the stated performance goal. The Funds met or exceeded the composite index over all time periods shown excluding fiscal years 2019 and 2016 when the Combined Funds underperformed the benchmark. Note that the Combined Funds asset allocation shown in Figure 7 represents the long-term strategic asset allocation as of June 30, 2019. These results are largely a measure of value added or lost from active management after all fees and expenses have been taken into consideration.

Comparison to Other Funds

While the SBI is concerned with how its returns compare to other pension investors, universe comparison data should be used with great care. There are two primary reasons why such comparisons will provide an “apples-to-oranges” look at performance:

— Differing Allocations.

Asset allocation has a dominant effect on returns. The allocation to stocks among the funds in TUCS typically ranges from 20% to 90%, too wide a range for meaningful comparison. In addition, it appears that many funds do not include private market holdings in their reports to TUCS. This further distorts comparisons among funds.

— Differing Goals/Liabilities.

Each pension fund structures its portfolio to meet its own liabilities and risk tolerance, leading to

different choices on asset mix. Since asset mix will largely determine investment results, a universe ranking may not be relevant to a discussion of how well a plan sponsor is meeting its long-term liabilities.

With these considerations in mind, the performance of the Combined Funds

compared to other public and corporate pension funds with over \$1 billion in assets in the Master Trust portion of TUCS is displayed in Figure 8. It shows that the Combined Funds have ranked in the top decile for three and ten years, top quartile for five years, and in the second quartile for other time periods.

Figure 7. Composite Index For Period Ending June 30, 2019

Asset Class	Market Index	Composite Index Wts. ⁽¹⁾
Public Equity	Public Equity Benchmark ⁽²⁾	63.3%

Combined Funds

Strategic Allocation Category Framework

The SBI adopted a **Strategic Allocation Category Framework** and a **Volatility Equivalent Benchmark** in September 2017 for the purpose of increasing the focus on the investment risk within the Combined Funds portfolio.

Strategic Allocation Category Framework

The objective of the Strategic Allocation Category Framework is to provide better guidance in determining the risk profile during the portfolio construction process. This approach will allow for greater awareness of the portfolio's expected volatility while managing for the variance in projected portfolio returns.

The Board approved the adoption of the Strategic Allocation Category Framework to better define the different roles that asset classes play in the portfolio. This approach focuses less in terms of “what we invest in” and rather on “why we invest.” Such approaches were developed as a response to the “Great Recession” when it was observed that supposedly diversifying asset classes could still be highly correlated to public equities during periods of market stress.

Many institutional investors have advocated approaches similar to the Strategic Allocation Category Framework to recognize that while certain asset classes may be different (e.g., public equities versus private equity), some asset classes respond to the same underlying fundamental factors and economic drivers, are highly correlated, and have limited ability to counter the investment risk of one another. The perspective that the inclusion of a number of different asset classes in a portfolio provides adequate risk reduction has now evolved to an understanding that risk reducing diversification comes from having assets which behave differently during various economic regimes. Some investors refer to this approach as a risk-based allocation approach.

Key factors in the development of a Strategic Allocation Category Framework for the SBI are 1) defining the role of the strategic allocation categories and 2) grouping asset classes that respond to similar economic drivers into the same strategic allocation category.

Following are the strategic allocation categories within the Framework and their intended roles within the portfolio. Please note that while considerable thought has gone into the approach, there is not a unique set of strategic allocation categories. As a result, the framework is based on judgement and some conclusions are arbitrary and subject to change as we move forward.

- **Growth-Appreciation:** represents the primary reason one invests, which is to achieve attractive returns. Growth is the primary return-seeking strategic allocation category with the objective of generating long-term capital appreciation by participating in global economic growth driven primarily by exposure to the equity risk premium.
- **Growth-Income-oriented:** attributes of this category include generation of stable levels of current income and capital appreciation at lower levels of risk than Growth-Appreciation assets, preservation of the principal value of assets, and diversification to the primary drivers of assets in the Growth category. (Please note for some asset classes there may be a “fine line” between whether it should be in the Growth or Income category. Out of necessity, at the end of the day, final judgements may be arbitrary.)
- **Real Assets:** to provide diversification through investments in “hard” assets which have inflation-sensitive characteristics or the ability to provide a hedge against inflation.
- **Inflation Protection:** to provide diversification through investments in “soft” assets (e.g., Inflation-linked securities, commodities) which have a direct link to inflation. These assets provide a hedge against inflation.
- **Protection:** provides stability, protection during crisis, and can act as a hedge against deflation.
- **Liquidity:** provides liquidity to meet daily obligations, primarily benefit payments and capital calls. Consists of cash and cash equivalents.
- **Opportunity:** the purpose of this bucket is to allow for investments in interesting opportunities or new strategies that do not fit within clearly-defined asset class lines. Asset allocation constraints should not preclude investors from accessing interesting and attractive opportunities.

Combined Funds

Strategic Allocation Category Framework

The Framework is an integral part of developing and managing the asset allocation of the Combined Funds.

Following is the status of the Strategic Allocation Category Framework as of June 30, 2019.

	<u>6/30/19</u> <u>(\$ millions)</u>	<u>6/30/19 Weights</u>	<u>Category Ranges</u>

Illiquid Asset Exposure	\$ 10,247.53	14.5%	0%	30%

Combined Funds

Volatility Equivalent Benchmark

Volatility Equivalent Benchmark

The Volatility Equivalent Benchmark was introduced as a metric to compare the longer-term (5 years or greater) investment performance of the Combined Funds' portfolio relative to a passively managed equity and bond portfolio which had a similar level of risk (as measured by its standard deviation) over the same time period. The comparison is an evaluation of how well our decisions made for the portfolio match up against a passively managed index strategy (which we would be unable to define on an ad hoc basis). When the comparison of the Combined Funds portfolio exceeds the Volatility Equivalent Benchmark the positive value added is a validation of how well our investment process performs.

A comparison of the Combined Funds portfolio versus the Volatility Equivalent Benchmark indicates the value added the SBI's approach to managing the investment program versus a simple buy and hold passive strategy. As can be seen in the comparison, the SBI's management results have yielded positive long-term results.

Volatility Equivalent Benchmark Comparison Periods Ending 6/30/19

As of (Date):		6/30/2019							
		1-year	3-year	5-year	10-year	15-year	20-year	25-year	30-year
SBI Combined Funds Return		7.3%	10.9%	7.3%	10.9%	8.0%	6.5%	8.7%	8.8%
Volatility Equivalent Benchmark Return				5.1%	7.9%	6.2%	5.2%	6.7%	7.3%
Value Added				2.2%	3.0%	1.8%	1.4%	1.9%	1.5%
Standard Deviation: Benchmark = Combined Funds				7.3%	8.1%	9.0%	9.3%	9.4%	9.3%
Benchmark Stock Weight				62%	60%	58%	61%	62%	62%
Benchmark Bond Weight				38%	40%	42%	39%	38%	38%
The Volatility Equivalent Benchmark stock and bond weights are adjusted to equal the standard deviation of the SBI Combined Funds portfolio. Then a return is calculated.									

Combined Funds

Domestic Stock Program

Domestic Stock Program

The Domestic Stock Program is made up of active large-cap and small-cap managers, semi-passive managers, a passive U.S. all-cap manager, a passive small-cap manager, and a passive large-cap manager.

At the end of the fiscal year 2019, the Combined Funds domestic equity program had a market value of \$29.4 billion.

Management Structure

The SBI uses three styles of management to invest the assets of the Domestic Stock Program:

- **Active Management**

At the end of fiscal year 2019, approximately 15% of the Domestic Stock Program was actively managed by a group of 14 external investment managers. Active management is used in the Combined Funds and the U.S. Actively Managed Fund. The assets allocated to each of the managers ranged in size from approximately \$226 million to \$495 million.

- **Semi-Passive Management**

At the end of fiscal year 2019, approximately 8% of the Domestic Stock Program was managed by two semi-passive external investment managers with portfolios ranging from \$1.1 billion to \$1.4 billion. Semi-passive management is used in the Combined Funds and the U.S. Actively Managed Fund.

- **Passive Management**

At the end of fiscal year 2019, approximately 77%

of the Domestic Stock Program in the Combined Funds was passively managed with three external investment mandates, Russell 3000 Index, Russell 2000 Index and Russell 1000 Index, with portfolio ranges from \$594 million to \$21.4 billion.

The goal of the Domestic Stock Program is to outperform the asset class target, which consists of the Russell 1000 Index and Russell 2000 Index. The program targets fixed policy weights of 90% large-cap and 10% small-cap managers. The Russell 3000 Index can be segmented into sub-indexes or Russell style indexes.

Assets of the Program are allocated based on the Russell style indexes. Assets within each style are then allocated to managers within the designated style. This allocation is done to minimize the style bias within the Program.

Each **active manager** is expected to add value over the long run relative to the Russell style index which reflects its investment approach or style.

The **semi-passive managers** are expected to add incremental value relative to the Russell 1000 Index. However, they employ a strategy that more closely tracks the benchmark than active management and are generally more consistent at generating modest excess returns.

The **passive managers** in the Domestic Stock Program manage their portfolios to consistently and inexpensively track their respective Russell indices.

A description of each domestic stock manager's investment approach is included in the **Investment Manager Summaries** section beginning on page 20.

FY 2019 Changes

During fiscal year 2019, one change was made to the manager structure. In October 2018, a BlackRock passive Russell 2000 mandate was added.

As of 1/1/2019, the asset class target is a custom benchmark made up of 90% Russell 1000 Index and 10% Russell 2000 Index. Prior to this change, the asset class target was the Russell 3000 Index (since 10/1/2003).

Investment Performance

A comprehensive monitoring system has been established to ensure that the many elements of the Domestic Stock Program conform to the SBI's investment policies. Published performance benchmarks are used for each domestic stock manager. These benchmarks enable the SBI to evaluate the managers' results, both individually and in aggregate, with respect to risk incurred and returns achieved.

Two primary long-term **risk objectives** have been established for the domestic stock managers:

- **Investment Approach**

Each manager (active, semi-passive, or passive) is expected to hold a portfolio that is consistent, in terms of risk characteristics, with the manager's stated investment approach. In the short-run, market fluctuations may result in a departure from the active

Combined Funds Domestic Stock Program

managers' risk targets as part of their specific investment strategies.

— **Diversification**

The passive and semi-passive managers are expected to hold highly diversified portfolios, while each active domestic stock manager may hold a more concentrated portfolio, appropriate for the particular investment strategy and style.

The domestic stock managers successfully fulfilled their long-term risk objectives during fiscal year 2019. In general, the managers constructed portfolios consistent with their stated investment approaches and maintained levels of diversification that were appropriate for their respective active, semi-passive and passive approaches.

The Board's *return objectives* for active and semi-passive stock managers are measured against the published Russell style and market capitalization indices that represent the managers' specific investment approaches. These indices take into account the equity market forces that affect certain investment styles. Thus, a Russell style index or benchmark is a more appropriate return target against which to judge these managers' returns than the Russell 3000 broad market index.

Active managers are expected to exceed their benchmark by an amount appropriate for their active risk level. This active risk level varies by manager and is influenced by the manager's stated strategy and style.

In aggregate, the Domestic Stock Program trailed its asset class target by 0.4 percentage point for the fiscal year. The active manager group trailed the benchmark by 0.4 percentage point. The semi-passive manager group matched the benchmark.

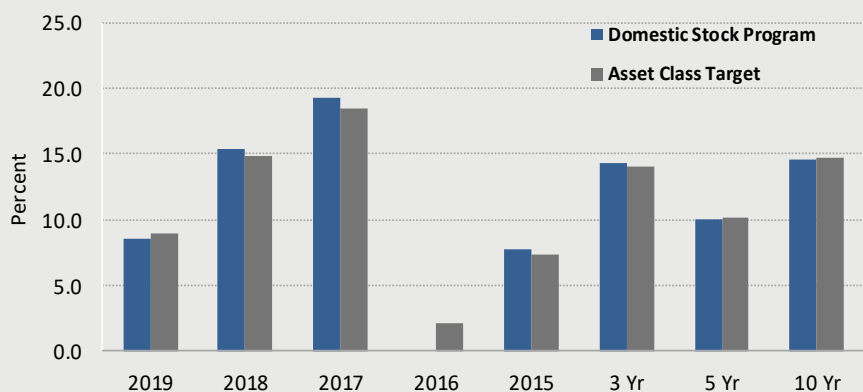

Relative to the aggregate benchmark, the underperformance of the active manager group was due to overall stock selection, especially in the Consumer Discretionary and Financial Services sectors. The semi-passive manager's performance benefited from stock selection overall, but was offset by sector allocation.

Figure 9 provides details of the historical performance of the

entire Domestic Stock Program. Manager performance relative to the respective benchmarks for the fiscal year end was mixed.

Eight of 14 active managers outperformed their assigned benchmarks, while six managers underperformed. One semi-passive manager outperformed and the other semi-passive manager underperformed the Russell 1000 Index. Both the Russell 3000 and Russell 1000 Index passive managers matched the performance of their respective benchmarks during the fiscal year. Individual manager performance for fiscal year 2019 is shown in Figure 10. Aggregate portfolio sector characteristics are shown in Figure 11.

Figure 9. Domestic Stock Program Performance For Periods Ending June 30, 2019

	2019	2018	2017	2016	2015	3 Yr.	5 Yr.	10 Yr.

Combined Funds Investment Manager Summaries

Domestic Stock Program Managers

Active Managers

Large-Cap Growth (Russell 1000 Growth)

Sands Capital Management, LLC

Mandate:	Large-Cap Growth	Benchmark:	Russell 1000 Growth
Product assets/Firm Assets (as of 6/30):	\$19.1 billion / \$42.6 billion	# of Holdings:	28
		Expected Turnover:	20-40%
Style:	Growth	Fund/Quant:	Fundamental
Product Location:	Arlington, VA	Date Funded:	January 2005

Sands invests in concentrated portfolios of high-quality, seasoned, growing businesses. Bottom-up, company-focused and long-term oriented research is the cornerstone of the investment process. To be considered as a potential holding, companies must demonstrate superior historical and projected sales and earnings growth; have the potential for wealth creation; and reside in growing sectors. The strategy focuses on six key investment criteria: 1) sustainable above average earnings growth; 2) leadership position in a promising business space; 3) significant competitive advantages or unique business franchise; 4) management with a clear mission and value added focus; 5) financial strength; and 6) rational valuation relative to the overall market and the company's business prospects.

Winslow Capital Management, LLC

Mandate:	Large-Cap Growth	Benchmark:	Russell 1000 Growth
Product assets/Firm Assets (as of 6/30):	\$21.1 billion / \$21.4 billion	# of Holdings:	51
		Expected Turnover:	60-80%
Style:	Growth	Fund/Quant:	Fundamental
Product Location:	Minneapolis, MN	Date Funded:	January 2005

Winslow believes that investing in quality large-cap companies with above-average growth provides the best opportunity for achieving superior portfolio returns over the long-term. The investment philosophy is founded on bottom up, fundamental research. The strategy identifies companies that can grow earnings above consensus expectations to build portfolios with forward weighted earnings growth in the range of 15-20% annually. A quantitative screen is employed for factors such as revenue, earnings and cash flow growth, return on invested capital, earnings consistency, earnings revisions, low financial leverage and high free cash flow rates relative to net income. Resulting companies are subjected to a qualitative assessment within the context of industry sectors. Detailed examination of income statements, cash flow and balance sheet projections is conducted, along with a judgment on the quality of management. Attractively valued stocks are chosen based on Price to Earnings (P/E) relative to the benchmark, sector peers, the company's sustainable future growth rate and return on invested capital. Final portfolio construction includes diversification by economic sectors, earnings growth rates, price/earnings ratios and market capitalizations.

Combined Funds Investment Manager Summaries

Zevenbergen Capital Investments LLC

Mandate:	Large-Cap Growth	Benchmark:	Russell 1000 Growth
Product assets/Firm Assets (as of 6/30):	\$2.8 billion / \$3.1 billion	# of Holdings:	36
		Expected Turnover:	20-40%
Style:	Growth	Fund/Quant:	Fundamental
Product Location:	Seattle, WA	Date Funded:	April 1994

Zevenbergen's investment philosophy is founded on the principles that superior fundamentals drive stock price appreciation and exceptional management combined with balance sheet strength provides capital protection. The firm employs a forward looking, bottom-up investment process designed for long-term results. Portfolios are constructed with companies presenting established and prospective revenue, cash flow and earnings growth, while diversification and risk control are accomplished through a blend of company size, expected growth rates, and appropriate portfolio weightings.

Large-Cap Value (Russell 1000 Value)

Barrow, Hanley, Mewhinney & Strauss, LLC

Mandate:	Large-Cap Value	Benchmark:	Russell 1000 Value
Product assets/Firm Assets (as of 6/30):	\$35.3 billion / \$76.5 billion	# of Holdings:	42
		Expected Turnover:	15-35%
Style:	Value	Fund/Quant:	Fundamental
Product Location:	Dallas, TX	Date Funded:	April 2004

Barrow, Hanley, Mewhinney & Strauss believes that markets are inefficient and can best be exploited through adherence to a value-oriented investment process dedicated to the selection of securities on a bottom-up basis. The overall portfolio will always reflect all three value characteristics: price/earnings and price/book ratios below the market and dividend yields above the market. The stocks must also be attractive according to the firm's dividend discount and relative return models. Analysts provide fundamental analysis in the final step of their investment process.

Earnest Partners, LLC

Mandate:	Large-Cap Value	Benchmark:	Russell 1000 Value
Product assets/Firm Assets (as of 6/30):	\$311.0 million / \$22.9 billion	# of Holdings:	52
		Expected Turnover:	0-20%
Style:	Value	Fund/Quant:	2/3 Fundamental, 1/3 Quant
Product Location:	Atlanta, GA	Date Funded:	July 2000

Earnest Partners utilizes a proprietary valuation and performance model, and rigorous fundamental review to identify stocks with the most attractive risk adjusted returns. They have identified six performance drivers – valuation measures, operating trends, market trends, growth measures, profitability measures and macroeconomic measures – and have done research to determine which combination of performance drivers, or return patterns, precede outperformance for stocks in each sector. The firm's fundamental review generally includes conversations with the company's management team and industry specialists, a review of the company's financial reports, analysis of industry and company-specific studies, as well as independent field research. They control risk using a statistical approach designed to measure and control the prospects of substantially underperforming the benchmark. The portfolio is diversified across industry groups.

Combined Funds Investment Manager Summaries

LSV Asset Management

Mandate:	Large-Cap Value	Benchmark:	Russell 1000 Value
Product assets/Firm Assets (as of 6/30):	\$30.5 billion / \$115.9 billion	# of Holdings:	152
		Expected Turnover:	5-25%
Style:	Value	Fund/Quant:	Quantitative
Product Location:	Chicago, IL	Date Funded:	April 2004

LSV's philosophy is that superior long-term results can be achieved by systematically exploiting the judgmental biases and behavioral weaknesses that influence the decisions of many investors. They use quantitative techniques to rank securities based on fundamental measures of value, past performance, and indicators of near-term appreciation potential. Their risk control discipline limits the portfolio's industry and sector concentrations.

Small-Cap Growth (Russell 2000 Growth)

ArrowMark Colorado Holdings, LLC

Mandate:	Small-Cap Growth	Benchmark:	Russell 2000 Growth
Product assets/Firm Assets (as of 6/30):	\$2.8 billion / \$19.3 billion	# of Holdings:	115
		Expected Turnover:	30-50%
Style:	Growth	Fund/Quant:	Fundamental
Product Location:	Denver, CO	Date Funded:	November 2016

ArrowMark manages a fundamentally driven small-cap growth portfolio and prioritizes downside risk while maintaining a long-term investment horizon. They believe companies with sustainable competitive advantages, growing from a low share of a large market at returns on capital that exceed cost of capital, can compound for longer and create more value than is often priced into small-cap stocks. The team undertakes both quantitative analysis and qualitative assessments including interviews with management. The core of the fundamental research process is extensive financial modeling to forecast cash flow generation and value creation potential. Scenario analysis is utilized to project a range of outcomes (best/base/stressed).

Hood River Capital Management, LLC

Mandate:	Small-Cap Growth	Benchmark:	Russell 2000 Growth

Style:	Growth	Fund/Quant:	Fundamental
Product Location:	Portland, OR	Date Funded:	November 2016

Hood River believes the small-cap market is inefficient, which is caused by many factors: a decline in the quantity and quality of sell-side coverage; higher probability of errors in analysts' models; accessible but under-followed management teams; and pure-play companies whose fundamentals are less certain than those of their larger-cap counterparts. In-depth, original research can uncover companies whose future fundamentals, such as sales or earnings, are likely to exceed the market's expectations. They call this difference between reality and the market's perception the "information gap." Hood River is focused on identifying and monetizing the information gap. They aggressively pursue a research advantage by speaking to management teams, customers, competitors, suppliers and other primary sources.

Combined Funds Investment Manager Summaries

Rice Hall James & Associates, LLC

Mandate:	Small-Cap Growth	Benchmark:	Russell 2000 Growth
Product assets/Firm Assets (as of 6/30):	\$1.5 billion / \$3.4 billion	# of Holdings:	69
		Expected Turnover:	20-40%
Style:	Growth	Fund/Quant:	Fundamental
Product Location:	Los Angeles, CA	Date Funded:	November 2016

Rice Hall James Small-Cap Opportunities strategy employs a fundamental, bottom-up analytical process to identify companies that meet three primary criteria; high earnings growth, high or improving returns-on-invested capital (ROIC), and sustainable competitive advantages. The team's investment philosophy is rooted in historical analysis indicating the high relative return potential of these factors in combination. The team believes that superior results can be achieved by owning companies that exhibit not only high earnings growth, but also the ability to sustainably generate high ROIC over long periods of time.

Wellington Management Company LLP

Mandate:	Small-Cap Growth	Benchmark:	Russell 2000 Growth
Product assets/Firm Assets (as of 6/30):	\$4.8 billion / \$1.1 trillion	# of Holdings:	164
		Expected Turnover:	40-60%
Style:	Growth	Fund/Quant:	Fundamental
Product Location:	Boston, MA	Date Funded:	November 2016

Wellington Management Company's Disciplined U.S. Small-Cap Growth's investment philosophy is based on three core beliefs: 1) changes in the quality of a company's fundamentals are often not reflected in its stock price; 2) the persistence of a company's fundamentals is frequently underestimated by the market; and 3) active managers frequently underestimate the range of possible outcomes. Central to the investment process is fundamental research focused on uncovering companies with improving quality metrics, business momentum and attractive relative valuations. This process is aided by a proprietary screening process that narrows the investment universe to companies consistent with the investment philosophy. The investment team spends most of its time conducting fundamental research on companies elevated by this screening process. This research relies on extensive management meetings and a high level of collaboration with Wellington Management's Global Industry Analysts.

Small-Cap Value (Russell 2000 Value)

Goldman Sachs Asset Management, L.P.

Mandate:	Small-Cap Value	Benchmark:	Russell 2000 Value
Product assets/Firm Assets (as of 6/30):	\$9.5 billion / \$1.4 trillion	# of Holdings:	236
		Expected Turnover:	30-60%
Style:	Value	Fund/Quant:	Fundamental
Product Location:	New York, NY	Date Funded:	January 2004

Goldman Sachs manages a small-cap value portfolio using a strong valuation discipline to purchase well-positioned, cash generating businesses run by shareholder-oriented management teams. Portfolio managers are organized by industry, and use industry-specific valuation measures to evaluate companies within their area. They decompose the historical financial reports, meet with management to evaluate their competitive position within the industry, and evaluate each company's valuation attractiveness relative to other comparable companies within the sector.

Combined Funds Investment Manager Summaries

Hotchkis and Wiley Capital Management, LLC

Mandate:	Small-Cap Value	Benchmark:	Russell 2000 Value
Product assets/Firm Assets (as of 6/30):	\$2.1 billion / \$31.1 billion	# of Holdings:	63
		Expected Turnover:	30-50%
Style:	Value	Fund/Quant:	Fundamental
Product Location:	Los Angeles, CA	Date Funded:	January 2004

Hotchkis and Wiley seeks to exploit mispriced securities in the small-cap market by investing in “undiscovered” and “out of favor” companies. They invest in stocks of which the present value of the company’s future cash flows exceeds the current market price. Industry analysts determine a company’s normal earnings power, or sustainable earnings level under equilibrium economic and competitive market conditions, which becomes the basis for security valuation.

Martingale Asset Management, L.P.

Mandate:	Small-Cap Value	Benchmark:	Russell 2000 Value
Product assets/Firm Assets (as of 6/30):	\$309 million / \$9.8 billion	# of Holdings:	313
		Expected Turnover:	90-110%
Style:	Value	Fund/Quant:	Quantitative
Product Location:	Boston, MA	Date Funded:	January 2004

Martingale employs a systematic, quantitatively-driven investment approach that seeks to exploit behavioral biases. The process uses a 21 factor model, where the factors are fairly evenly distributed among the three broad buckets of value, growth, and quality, culminating in an alpha score for each stock in the viable universe. This score is then added to an industry rating, yielding an overall composite score for each stock. Value traps are avoided by favoring stocks with positive relative strength and earnings estimate revisions versus peers. Martingale builds a risk-aware portfolio of the highest ranked stocks by maintaining industry, sector, style, and size exposures that are similar to the benchmark.

Peregrine Capital Management

Mandate:	Small-Cap Value	Benchmark:	Russell 2000 Value
Product assets/Firm Assets (as of 6/30):	\$854.0 million / \$4.5 billion	# of Holdings:	104
		Expected Turnover:	60-80%
Style:	Value	Fund/Quant:	Fundamental
Product Location:	Minneapolis, MN	Date Funded:	July 2000

Peregrine’s small-cap value investment process begins with their proprietary valuation analysis, which is designed to identify the small-cap value stocks most likely to outperform. The valuation analysis identifies the most underpriced securities on a sector-by-sector basis. The firm analyzes sixty fundamental factors to identify the most relevant factors in each sector. The focus of the team’s fundamental research is to determine if one or more of the style’s “Value Buy Criteria” are present. These include resolvable short-term problems, unrecognized assets, take-over potential, fundamental undervaluation and catalysts for change. The portfolio is diversified and sector weights are aligned closely to the benchmark allowing stock selection to drive performance.

Combined Funds Investment Manager Summaries

Semi-Passive Managers

Semi-Passive Managers (Russell 1000)

BlackRock Institutional Trust Company, N.A.

Mandate:	Semi-Passive U.S. Equity	Benchmark:	Russell 1000 Index
Product assets/Firm Assets (as of 6/30):	\$5.7 billion / \$6.5 trillion	# of Holdings:	317
		Expected Turnover:	162%
Style:	Core	Fund/Quant:	Quantitative
Product Location:	San Francisco, CA	Date Funded:	January 1995

BlackRock has a disciplined, rigorous and repeatable investment process incorporating a unique blend of bottom-up stock selection insights across relative value, earnings quality and sentiment while combining broader top-down thematic insights to generate risk controlled and consistent active returns. The relative value criteria assesses intrinsic value relative to market price. Earnings quality criteria help identify companies likely to sustain earnings growth and avoid negative surprises. Sentiment criteria help identify market participants' beliefs regarding valuation. The thematic criteria seeks to exploit opportunities from a collection of stocks that move together because they share a common exposure which is currently less obvious to the market. Research is incorporated through top-down thematic insights to capture macro views as well as through a program which utilizes big data techniques to capture alpha from the large volumes of unstructured data (text, internet search and social media). Implementation costs are also considered when balancing return potential with risk profile of trades.

J.P. Morgan Investment Management Inc.

Mandate:	Semi-Passive U.S. Equity	Benchmark:	Russell 1000 Index
Product assets/Firm Assets (as of 6/30):	\$7.2 billion / \$1.8 trillion	# of Holdings:	363
		Expected Turnover:	37%
Style:	Core	Fund/Quant:	Fundamental
Product Location:	New York, NY	Date Funded:	January 1995

J.P. Morgan believes that superior stock selection is necessary to achieve excellent investment results. To accomplish this objective, the firm uses fundamental research and a systematic valuation model. Analysts forecast earnings and dividends for the stock universe and enter these into a stock valuation model that calculates a dividend discount rate for each security. The stocks are ranked according to this valuation measure within their economic sectors. Stocks most undervalued are placed in the first quintile. The portfolio takes overweight positions in stocks in the first and second quintiles, while underweighting stocks in the fourth and fifth quintiles. In addition, the portfolio will closely approximate the sectors and style of the benchmark. The portfolio remains fully invested at all times.

Combined Funds Investment Manager Summaries

Passive Managers

Passive Manager (R3000)

BlackRock Institutional Trust Company, N.A.

Mandate:	Passive U.S. Equity	Benchmark:	Russell 3000 Index
Product assets/Firm Assets (as of 6/30):	\$60.8 billion / \$6.5 trillion	# of Holdings:	2,646
		Expected Turnover:	2.2%
Style:	Core	Fund/Quant:	N.A.
Product Location:	San Francisco, CA	Date Funded:	July 1995

For the passive account, BlackRock seeks to match the total rate of return of the Russell 3000 Index. BlackRock uses their proprietary risk management and optimization tools to identify a portfolio with characteristics that closely match those of the benchmark with less exposure to some of the less liquid stocks in the index.

Passive Manager (R1000)

BlackRock Institutional Trust Company, N.A.

Mandate:	Passive U.S. Equity	Benchmark:	Russell 1000 Index
Product assets/Firm Assets (as of 6/30):	\$135.0 billion / \$6.5 trillion	# of Holdings:	1,007
		Expected Turnover:	2.5%
Style:	Core	Fund/Quant:	N.A.
Product Location:	San Francisco, CA	Date Funded:	October 2016

For this passive account, BlackRock seeks to match the total rate of return of the Russell 1000 Index. BlackRock aims to fully replicate the benchmark when managing against this index. BlackRock uses their proprietary risk management and optimization tools to help manage day-to-day activity in an attempt to keep transaction costs low.

Passive Manager (R2000)

BlackRock Institutional Trust Company, N.A.

Mandate:	Passive U.S. Equity	Benchmark:	Russell 2000 Index
Product assets/Firm Assets (as of 6/30):	\$59.3 billion / \$6.5 trillion	# of Holdings:	2,008
		Expected Turnover:	14.5%
Style:	Core	Fund/Quant:	N.A.
Product Location:	San Francisco, CA	Date Funded:	October 2018

For this passive account, BlackRock seeks to replicate the return of the Russell 2000 Index as closely as possible. Proprietary risk management and optimization tools are utilized to identify a portfolio with characteristics that closely match those of the Russell 2000 Index with less exposure to some of the less liquid stocks in the index.

Combined Funds International Stock Program

International Stock Program

The International Stock Program is made up of active, semi-passive, and passive developed markets managers, and active and passive emerging markets managers.

At the end of the fiscal year 2019, the Combined Funds International Program had a market value of \$14.5 billion.

Management Structure

Currently, the SBI uses three styles of management to invest the assets of the International Stock Program:

— **Active Management**

At the end of fiscal year 2019, approximately 31% of the program was actively managed by a group of 13 external investment managers with portfolios ranging in size from \$265 million to over \$600 million. Six of these managers manage portfolios in the developed markets and seven manage portfolios in the emerging markets.

— **Semi-Passive Management**

At the end of fiscal year 2019, 2% of the program was semi-passively managed by a single external investment manager, AQR Capital Management, LLC with a portfolio of \$344 million.

— **Passive Management**

At the end of fiscal year 2019, approximately 67% of the International Stock Program was passively managed by State Street

Global Advisors in two separate portfolios, one a developed markets equity index account and the other an emerging markets equity index account, with \$8.6 billion and \$1.2 billion, respectively.

The goal of the International Stock Program is to outperform the asset class target, which is the MSCI World ex USA Index (net) and MSCI Emerging Markets Index (net). The program targets fixed policy weights of 75% developed markets and 25% emerging markets. At the end of fiscal year 2019, the International Stock Program was invested at policy weight.

Six of the 13 **active** managers and the **semi-passive** manager invest entirely in developed markets and use a variety of investment approaches in an effort to maximize the value added to the MSCI World ex USA Index (net) over time. These managers address currency management as part of their investment process. Their views on currency may be factored into their country and security selection, they may explicitly hedge currency exposure on an opportunistic basis, or they may seek to add value by actively managing currency positions. Managers are not required to hedge currency risk.

Seven of the 13 **active** managers invest entirely in emerging markets. They are expected to add incremental value, over time, relative to the MSCI Emerging Markets Index (net) which is made up of markets in developing countries throughout the world.

The **passive** manager in the International Stock Program designs one of its portfolios to consistently and inexpensively track the developed markets MSCI World ex USA Index (net) and designs the other portfolio to track the MSCI Emerging Markets Index (net).

A description of each international stock manager's investment approach is included in the **Investment Manager Summaries** section beginning on page 31.

FY 2019 Changes

As of 1/1/2019, the International Stock Program benchmark changed to 75% MSCI World ex USA Index (net) and 25% MSCI Emerging Markets Index (net). Prior to this change, the asset class target was MSCI ACWI ex U.S. (net) since 10/1/2003.

Investment Performance

Similar to the Domestic Stock Program, two long-term **risk objectives** exist for the international equity managers:

— **Investment Approach.** Each manager (active, semi-passive or passive) is expected to hold a portfolio that is consistent with the manager's stated investment approach.

— **Diversification.** The index manager is expected to hold a well-diversified portfolio which closely tracks its target index. The semi-passive managers are expected to hold risk-adjusted portfolios which modestly outperform the index, and each active manager is expected to hold a portfolio which represents

Combined Funds International Stock Program

its best ideas for outperforming the index.

The international stock managers successfully fulfilled their long-term risk objectives during fiscal year 2019. In general, the managers constructed portfolios consistent with their stated investment approaches and maintained appropriate levels of diversification.

The Board's *return objectives* for the International Stock Program are stated relative to the Morgan Stanley Capital International (MSCI) Standard indices which includes large and mid-capitalization stocks. The indices are capitalization weighted and measured in U.S. dollar terms, with currencies unhedged. Individual active managers are expected to exceed their benchmark by an amount appropriate for their level of active risk. The active risk level varies by manager and is influenced by the manager's stated strategy and style. Performance results for the International Stock Program are shown in Figure 12. In aggregate, performance over the last ten year period exceeded the benchmark by 0.5 percentage point and performance over the last five year period exceeded the benchmark by 0.4 percentage point. The program trailed the target by 0.2 percentage point for the fiscal year.

Individual manager performance during fiscal year 2019 is shown in Figure 13. Three of the active developed market managers outperformed the benchmark over the year and three underperformed. Three out of seven active emerging markets managers outperformed the

benchmark. The semi-passive developed market manager underperformed the benchmark over the year. The developed markets passively managed portfolio outperformed the return of the MSCI World ex USA Index (net). The emerging markets passively managed portion of the program slightly trailed the return of the MSCI Emerging Markets Index (net).

The International Stock Program's country weights are displayed in Figure 14.

Combined Funds Investment Manager Summaries

International Stock Program Managers*

Active Developed Markets Managers

Acadian Asset Management LLC

Mandate:	Non U.S. Equity	Benchmark:	MSCI World ex. USA Index (net)
Product Assets/Firm Assets (as of 6/30):	\$6.1 billion / \$99.0 billion	# of Holdings:	408
Style:	Core	Fund/Quant:	Quantitative
Product Location:	Boston, MA	Expected Turnover:	40-60%
		Date Funded:	July 2005

Acadian first uses a quantitative process to rank their universe of 40,000 stocks by relative attractiveness. In its process, Acadian also applies separate models to forecast how well each stock's region/industry peer group will perform relative to world equities. The two forecasts are combined to determine a relative return forecast for each stock in the allowable universe. At the individual stock level, Acadian uses a wide range of factors including valuation, earnings, size and price movements in their quantitative process. At the peer group level, Acadian utilizes valuation, risk, growth and economic indicators. Portfolios are normally fully invested with a minimal amount of cash. Country and sector weights fall out of the bottom-up stock selection process, with overall portfolio risk control ensuring the desired level of diversification. The last step of the process is a careful review of optimized portfolios by the investment team, before trading, to ensure the portfolio meets the client's investment goals.

Columbia Threadneedle Investments

Mandate:	Threadneedle EAFE Equities Strategy	Benchmark:	MSCI World ex USA Index (net)
Product Assets/Firm Assets (as of 6/30):	\$597.7 million / \$459.0 billion	# of Holdings:	61
Style:	Core Growth	Fund/Quant:	Fundamental
Product Location:	London, England	Expected Turnover:	50-75%
		Date Funded:	March 2000

Columbia believes that a good understanding of the company level impact of thematic "key forces of change" in the market, in addition to management's ability to exploit these changes, creates significant opportunities to pick winners and avoid losers. "Top-down" views on macroeconomics and trends in global sectors are combined with "bottom-up" company analysis along regional and global sector lines. Analysts rate approximately 150 to 200 stocks in each region based on the expected 12-month performance. The global equity team then conducts additional research to determine which ones are potential portfolio candidates and decide as a group which ones to add or delete. Final portfolio construction is the responsibility of the lead portfolio manager.

* Presented in U.S. dollars unless otherwise noted.

Combined Funds Investment Manager Summaries

Fidelity Institutional Asset Management LLC

Mandate:	Fidelity International Growth	Benchmark:	MSCI World ex USA Index (net)
Product Assets/Firm Assets (as of 6/30):	\$5.3 billion / \$187.5 billion	# of Holdings:	157
Style:	Core Growth	Fund/Quant:	Fundamental
Product Location:	Smithfield, RI	Expected Turnover:	50-75%
		Date Funded:	July 2005

Fidelity's International Growth strategy is a core, growth-oriented strategy that provides diversified exposure to the developed international markets benchmark. The investment process combines active stock selection and regional asset allocation. Four portfolio managers in London, Smithfield, Rhode Island, and Toronto construct regional sub-portfolios, selecting stocks based on Fidelity analysts' bottom-up research as well as their own judgment and expertise. The four regional portfolios are combined according to the policy determined by Fidelity's Asset Allocation Group (AAG). The AAG is comprised of senior investment professionals who base their decisions on micro-economic data derived from portfolio manager inputs, analysts' field research, and proprietary data on liquidity, market activity, and fund flows. Portfolio guidelines are designed to ensure risk is appropriate with the performance target and to ensure that active risk is focused on stock selection.

J.P. Morgan Investment Management Inc.

Mandate:	EAFE Plus Strategy	Benchmark:	MSCI World ex USA Index (net)
Product Assets/Firm Assets (as of 6/30):	\$12.5 billion / \$1.7 trillion	# of Holdings:	79
Style:	Quality/Large-Cap Growth	Fund/Quant:	Fundamental
Product Location:	New York, NY	Expected Turnover:	20-40%
		Date Funded:	July 2005

J.P. Morgan's international equity process focuses on stock selection as the primary source of added value and seeks to build a portfolio diversified by both sector and region. Analysts regional teams generate local market insights and conduct research on companies in an effort to identify the highest conviction stocks within their region. The highest conviction regional stocks are further analyzed by a team of London-based Global Sector Specialists looking to identify global "industry winners". Their goal is to find well-managed, profitable companies that possess solid financial positions as well as companies whose earnings are growing faster than their competitors. In addition, J.P. Morgan considers valuation and seeks stocks that are trading at or below market multiples. Each global sector specialist ranks the stocks within his or her sector based on a variety of factors including the information gathered from the regional investment professionals and the global sector specialists' own knowledge of industry dynamics and relative valuations. The final stage of the investment process rests with a team of senior portfolio managers who are responsible for constructing risk controlled portfolios that capture the best thinking of both the local and global teams.

Combined Funds Investment Manager Summaries

Marathon Asset Management LLP

Mandate:	World ex U.S. Strategy	Benchmark:	MSCI World ex USA Index (net)
Product Assets/Firm Assets (as of 6/30):	\$3.2 billion / \$61.6 billion	# of Holdings:	358
Style:	Contrarian Growth	Fund/Quant:	Fundamental
Product Location:	London, England	Expected Turnover:	10-20%
		Date Funded:	November 1993

At the heart of Marathon's investment philosophy is the "capital cycle" approach to investment. This approach is based on the idea that the prospect of high returns will attract excessive capital and vice versa. In addition, Marathon believes that an assessment of how management responds to the forces of the capital cycle, (i.e. particularly whether they curtail investment when returns have been poor) and how they are incentivized, are critical to the investment outcome. Given the contrarian and long-term nature of the capital cycle, the approach results in strong views versus the market and long holding periods of more than five years. The investment philosophy guides a focused team of investment generalists who seek investment opportunities in the growth and value universes and across the capitalization spectrum.

McKinley Capital Management, LLC

Mandate:	MSCI EAFE Growth	Benchmark:	MSCI World ex USA Index (net)
Product Assets/Firm Assets (as of 6/30):	\$423.0 million / \$4.6 billion	# of Holdings:	65
Style:	Growth	Fund/Quant:	Quantitative
Product Location:	Anchorage, AK	Expected Turnover:	60-80%
		Date Funded:	July 2005

Using proprietary quantitative models, McKinley's investment process identifies companies that have signs of accelerating growth. The initial universe consists of all publicly traded non-U.S. stocks from all capitalization categories in more than 60 countries. Their primary model includes a risk-adjusted relative return measurement that is designed to identify inefficiently priced common stocks relative to the market. After the risk-adjusted relative return process has been applied the remaining candidates must then pass through liquidity and earnings acceleration tests. For final portfolio construction, McKinley examines a variety of qualitative factors which could ultimately impact earnings including a qualitative data check and street research analysis of economic factors, specific industry themes and company fundamentals. The final portfolio will hold between 50-75 stocks, providing diversification and risk control by issue, industry, sector and country.

Combined Funds Investment Manager Summaries

Semi-Passive Developed Markets Managers

AQR Capital Management, LLC

Mandate:	Semi-Passive Developed Markets Equity	Benchmark:	MSCI World ex USA Index (net)
Product Assets/Firm Assets (as of 6/30):	\$14.4 billion / \$193.9 billion	# of Holdings:	307
Style:	Value	Fund/Quant:	Quantitative
Product Location:	Greenwich, CT	Expected Turnover:	78%
		Date Funded:	July 2005

AQR employs a disciplined quantitative approach emphasizing both top-down country/currency allocation and bottom-up security selection decisions to generate excess returns. AQR's investment philosophy is based on the fundamental concepts of value and momentum. AQR's international equity product incorporates stock selection, country selection, and currency selection models as the primary alpha sources. Dynamic strategy allocation (between the three primary alpha sources) and style weighting are employed as secondary alpha sources.

Passive Developed Markets Managers

State Street Global Advisors

Mandate:	Passive Developed Markets Equity	Benchmark:	MSCI World ex USA Index (net)
Product Assets/Firm Assets (as of 6/30):	\$49.0 billion / \$2.9 trillion	# of Holdings:	1,032
Style:	Core	Fund/Quant:	N.A.
Product Location:	Boston, MA	Expected Turnover:	2.3%
		Date Funded:	October 1992

State Street Global Advisors uses a replication strategy to construct the portfolio. Exchange-traded stock index futures, approved by the Commodity Futures Trading Commission, are also used to minimize tracking error and trade cash flows in order to minimize transactions costs.

Active Emerging Markets Managers

Earnest Partners LLC

Mandate:	Global Emerging Markets Equity	Benchmark:	MSCI Emerging Markets Index
Product Assets/Firm Assets (as of 6/30):	\$1.1 billion / \$22.9 billion	# of Holdings:	44 (including China A share fund as 1)
Style:	Growth	Fund/Quant:	Fundamental Bottom Up
Product Location:	Atlanta, GA	Expected Turnover:	10-20%
		Date Funded:	April 2017

Earnest Partners' objective is to outperform the benchmark while controlling volatility and risk. Earnest Partners emphasizes a team decision making approach and uses a proprietary screening process, fundamental analysis, and risk management to minimize the likelihood of meaningfully underperforming the benchmark. Each company identified in the screening process is put through a fundamental review conducted by the investment team. Sector/industry weightings are driven by selection of individual securities, subject to risk concentration limits. In summary, Earnest Partners seeks companies in attractive industries with developed strategies, talented and honest management teams, sufficient funding, and strong financial results.

Combined Funds Investment Manager Summaries

Macquarie Investment Management Advisers

Mandate:	Global Emerging Markets Equity	Benchmark:	MSCI Emerging Markets Index
Product Assets/Firm Assets (as of 6/30):	\$8.1 billion / \$249.0 billion	# of Holdings:	85
Style:	Growth	Fund/Quant:	Fundamental Bottom Up
Product Location:	Philadelphia, PA	Expected Turnover:	10-40%
		Date Funded:	April 2017

Macquarie invests in companies with sustainable franchises that trade sufficiently below the team's intrinsic value estimate. They define a sustainable company as one with an evolving business model, resistant to competitive pressures, that demonstrates an identifiable framework for why it will exist over the next five years. Although bigger is not always better, Macquarie tends to focus on mid/large-cap companies due to competitive advantage and dominant market share, combined with greater market liquidity. Regarding valuation, the team uses a long-term perspective of what they feel the company will be worth based on a shared vision of its future. From there, they apply an appropriate valuation model to determine intrinsic value.

Martin Currie Inc.

Mandate:	Active Emerging Markets Equity	Benchmark:	MSCI Emerging Markets Index
Product Assets/Firm Assets (as of 6/30):	\$2.5 billion / \$16.2 billion	# of Holdings:	49
Style:	Growth	Fund/Quant:	Fundamental Bottom Up
Product Location:	Edinburgh, United Kingdom	Expected Turnover:	< 30%
		Date Funded:	April 2017

The Martin Currie Global Emerging Market's (GEMs) team builds long-term, high conviction stock portfolios, driven by fundamental research. They seek to identify those emerging market companies that can sustain cash flow growth and generate returns in excess of their cost of capital. The Martin Currie GEMs team believes that an assessment of a company's environmental, social and governance (ESG) performance, or sustainability, can help identify those business models that are most likely to sustain high returns and resist competitive pressures. The research process is designed to deliver high-conviction stock ideas based on fundamental bottom-up analysis. All GEMs portfolio managers are responsible for internal research, idea generation and analysis and the management of client portfolios top-down factors are viewed as a source of risk and are largely captured within a country-specific cost of equity used in valuation.

Combined Funds Investment Manager Summaries

Morgan Stanley Investment Management Inc.

Mandate:	Active Emerging Markets Equity	Benchmark:	MSCI Emerging Markets Index
Product Assets/Firm Assets (as of 6/30):	\$7.0 billion / \$497.3 billion	# of Holdings:	124
Style:	Growth	Fund/Quant:	Fundamental Bottom Up / Top Down
Product Location:	New York, NY	Expected Turnover:	30-50%
		Date Funded:	January 2001

The Morgan Stanley Investment Management (MSIM) Emerging Markets Equity team believes that future economic growth and currency movements are critical drivers of stock returns. MSIM conducts original macro-thematic research and integrates it with fundamental bottom-up company analysis to amplify returns in a growth-oriented portfolio. Using a proprietary “Rules of the Road” framework that includes rigorous credit and currency analysis, MSIM overweights those countries where growth is likely to accelerate and underweights those countries with macro risks which may not be fully appreciated by consensus. MSIM focuses on investing in companies with quality management dedicated to expanding earnings growth, which can include privately managed as well as state-owned enterprises expected to benefit from reform. The team takes active position sizes to generate meaningful long-term returns.

Neuberger Berman Investment Advisers LLC

Mandate:	Global Emerging Markets Equity	Benchmark:	MSCI Emerging Markets Index
Product Assets/Firm Assets (as of 6/30):	\$6.7 billion / \$333.0 billion	# of Holdings:	95 stocks
Style:	Growth	Fund/Quant:	Fundamental and Quant
Product Location:	New York, NY	Expected Turnover:	30-50%
		Date Funded:	April 2017

Neuberger Berman seeks to maximize performance by constructing its portfolios with high quality, growing companies trading at attractive valuations, which have the potential to outperform the benchmark at low risk. It is their belief that emerging markets are less efficient than developed ones and, because of this lack of market transparency, mispricing opportunities should exist. The team’s main emphasis is on bottom-up stock picking and fundamental analysis, but will also use both qualitative and quantitative processes at times during portfolio construction.

Combined Funds Investment Manager Summaries

Pzena Investment Management, LLC

Mandate:	Global Emerging Markets Equity	Benchmark:	MSCI Emerging Markets Index
Product Assets/Firm Assets (as of 6/30):	\$3.9 billion / \$35.0 billion	# of Holdings:	59
Style:	Value	Fund/Quant:	Fundamental Bottom Up
Product Location:	New York, NY	Expected Turnover:	20-40%
		Date Funded:	April 2017

Pzena is the SBI's deepest value-style Emerging Markets Equity manager. As such, they focus on companies that are underperforming their historically demonstrated earnings power. They apply fundamental research to these companies to determine whether the problems that caused the earnings shortfall are temporary or permanent. Beginning with a proprietary screening tool called Stock Analyzer, Pzena focuses research on the cheapest 20% of its universe. The subsequent decision to dedicate research resources to a security is made by the four co-portfolio managers who make an initial judgement as to whether the causes of the under-valuation are likely temporary or permanent, and whether the research process is likely to reasonably forecast the company's normalized earnings power. Once the team becomes extremely knowledgeable about the company and industry, the analyst and one of the portfolio managers meet with company management, and seeks a meaningful discussion about their business and the strategic options available to them over the next several years and their plans to restore the earnings power.

The Rock Creek Group, LLC

Mandate:	Global Emerging Markets Equity	Benchmark:	MSCI Emerging Markets Index
Product Assets/Firm Assets (as of 6/30):	\$8.9 billion / \$14.3 billion	# of Holdings:	Fund of Fund with 15-17 portfolio companies
Style:	Growth	Fund/Quant:	Fundamental Bottom Up
Product Location:	Washington, DC	Expected Turnover:	40-60%
		Date Funded:	April 2017

Rock Creek Emerging Markets Equity, organized as a fund-of-fund, utilizes an actively managed all-cap approach in which their top-down views drive country and sector selection, while their 15-17 local investment teams provide on-the-ground stock picking talent that drives security selection. The emerging markets investment team then adjusts the bottom-up derived portfolio using an overlay strategy to reflect top-down views on country exposures and betas. Rock Creek's local investment teams are located in the markets in which they invest, which tends to result in small/mid-cap size companies. Rock Creek's domicile of Washington, DC supports its ability to interact with policy makers, economists and strategists that help define their top-down views and themes.

Combined Funds Investment Manager Summaries

Passive Emerging Markets Managers

State Street Global Advisors

Mandate:	Passive Emerging Markets Equity	Benchmark:	MSCI Emerging Markets Index (net)
Product assets/Firm Assets (as of 6/30):	\$71.0 billion / \$2.9 trillion	# of Holdings:	1,037
Style:	Core	Fund/Quant:	N.A.
Product Location:	Boston, MA	Expected Turnover:	5.5%
		Date Funded:	December 2011

State Street Global Advisors (SSGA) manages an emerging markets equity index portfolio designed to track the Morgan Stanley Capital International MSCI Emerging Markets Index. SSGA uses an optimized strategy to construct the portfolio. Exchange traded stock index futures, approved by the Commodity Futures Trading Commission, are also used to minimize tracking error, obtain exposure where local access is inaccessible, and to trade cash flows in order to minimize transactions costs.

Combined Funds Fixed Income Program

Fixed Income Program

The Fixed Income Program is made up of active and semi-passive fixed income managers.

At the end of fiscal year 2019, the Combined Funds fixed income program had a market value of \$7.2 billion.

Investment Management

The SBI uses a two part approach for the management of the Fixed Income Program:

- **Active**

At the end of fiscal year 2019, approximately 55% of the Fixed Income Program was actively managed by four external investment managers with portfolios ranging in size from \$950 million to \$1.2 billion.

- **Semi-Passive Management**

At the end of fiscal year 2019, approximately 45% of the bond segment was invested by three investment managers with portfolios of \$1.0 to \$1.1 billion each.

The group of **active** bond managers is retained for its blend of investment styles. Each active manager has the goal of outperforming the Bloomberg Barclays U.S. Aggregate Bond Index by focusing on high quality fixed income securities across all sectors of the market. The managers vary, however, in the emphasis they place on interest rate anticipation (duration) and in the manner in which they approach security selection and sector weighting decisions. In

keeping with the objective of utilizing the Fixed Income Program as a deflation hedge, the active managers are restricted regarding the duration of their portfolios. This requirement is designed to prevent the dilution of the deflation hedge of the total program due to an excessively short duration position. In addition, the duration restriction helps to avoid extreme variability in total returns relative to the benchmark. The SBI constrains the duration range of the active managers' portfolios to a band of plus or minus two years around the duration of the Bloomberg Barclays U.S. Aggregate. The active bond managers focus on high quality (BBB or better) rated bonds. Four managers have been granted authority to invest a limited portion of their portfolios in BB and B rated dollar denominated debt and three have been given authority to invest in investment grade non-dollar denominated issues. The managers use this additional authority on a tactical basis.

The goal of the **semi-passive** managers is to add incremental value relative to the Bloomberg Barclays U.S. Aggregate Bond Index through superior bond selection and sector allocation rather than through interest rate exposure. Semi-passive managers' portfolios are constrained to plus or minus 0.5 years around the duration of the Bloomberg Barclays U.S. Aggregate. One manager has been granted authority to invest a limited portion of its portfolio in BB and B rated dollar denominated debt and in investment grade non-dollar

denominated issues. The manager uses this additional authority on a tactical basis.

A description of each bond manager's investment approach is included in the **Investment Manager Summaries** section beginning on page 42.

FY 2019 Changes

During fiscal year 2019, no changes were made to the manager structure.

Investment Performance

The SBI constrains the **risk** of the active bond managers' portfolios to ensure that they fulfill their deflation hedge and total fund diversification roles. As noted earlier, the managers are restricted in terms of the duration of their portfolios and the quality of their fixed income investments. The active and semi-passive bond managers successfully fulfilled their long-term risk objectives during fiscal year 2019.

The managers constructed portfolios consistent with stated investment approaches and maintained appropriate levels of quality and duration.

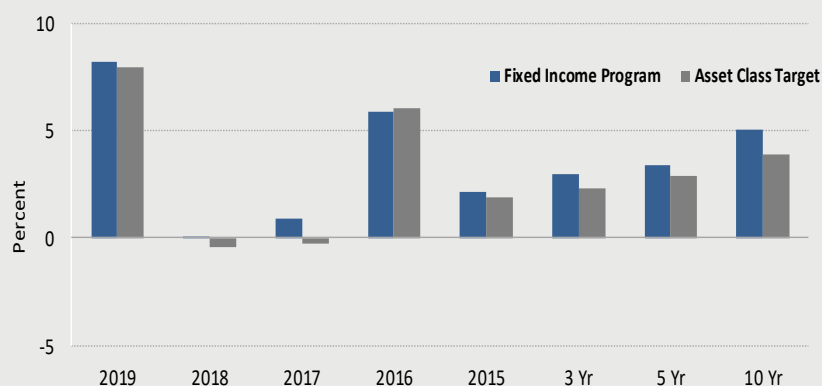

The **returns** of each of the bond managers are compared to the Bloomberg Barclays U.S. Aggregate Bond Index. Individual managers are expected to exceed the target, net of fees, on an annualized basis. In total, the program outperformed the Bloomberg Barclays U.S. Aggregate Bond Index by 0.3 percentage point for the recent fiscal year.

Combined Funds

Fixed Income Program

Relative to the benchmark, the program benefited from overweight positions in credit related sectors such as CMBS, ABS and Corporates. Managers also outperformed the benchmark over the long-term. The program outperformed the asset class target by 1.1 percentage points over the ten year period ending June 30, 2019. Three of four active managers outperformed the benchmark. All semi-passive managers outperformed for the fiscal year. Figure 15 shows historical performance for the entire program. Individual manager performance is shown in Figure 16. Aggregate portfolio sector and portfolio characteristics are shown in Figure 17.

Figure 15. Fixed Income Program Performance For Periods Ending June 30, 2019

	Active Managers %	Semi-Passive Managers %	Aggregate Fixed Income Program %	BB Barclays Benchmark %
Average Quality	A+	A+	A+	AA-
Average Yield to Maturity (%)	3.6	2.9	3.3	2.5
Effective Duration* (yrs)	4.8	5.9	5.3	5.7
Weighted Average Life** (yrs)	7.9	8.1	8.0	7.9

* Measures the interest rate sensitivity of a bond. It is the approximation of the percentage price change of the bond per 100 bp increase or decrease in prevailing market interest rates. Effective duration takes into consideration how the cashflows of the bonds change when interest rates change. This measure is most appropriate for bonds (and portfolios) with optionality, such as callable bonds and mortgage bonds.

** The weighted average life (WAL) of a bond is the average number of years for which each dollar of unpaid principal of a bond remains outstanding. Once calculated, WAL tells how many years it will take to pay half of the outstanding principal.

Combined Funds Investment Manager Summaries

Fixed Income Program Managers

Active Managers

Columbia Threadneedle Investments

Mandate:	Public Fixed Income	Benchmark:	Bloomberg Barclays U.S. Aggregate
Product Assets/Firm Assets (as of 6/30):	\$30.5 billion / \$337.1 billion	# of Holdings:	534
Style:	Active Core Plus	Fund/Quant:	Fundamental
Product Location:	Minneapolis, MN	Tracking Error Target	250 bps
		Date Funded:	July 1993

Columbia Threadneedle manages portfolios using a bottom-up, relative value approach in combination with a top-down, macro outlook that guides the firm's relative value decisions. Columbia uses security selection and sector allocation as the primary drivers of relative return, while duration and yield curve positioning provide less frequent opportunities. The fixed income team is divided into sector specialists such as Global Rates and Currency, Investment Grade Credit and Structured Assets, who provide input to the portfolio managers in determining an overall investment strategy. The overall investment objective is to deliver positive relative returns within a risk-managed approach, striving for competitive risk-adjusted performance over time.

Dodge & Cox

Mandate:	Public Fixed Income	Benchmark:	Bloomberg Barclays U.S. Aggregate
Product Assets/Firm Assets (as of 6/30):	\$90.5 billion / \$313.0 billion	# of Holdings:	244
Style:	Active Core	Fund/Quant:	Fundamental
Product Location:	San Francisco, CA	Tracking Error Target:	132 bps over 5 yrs.
		Date Funded:	February 2000

Dodge & Cox manages a diversified portfolio of securities that are selected through bottom-up, fundamental analysis. The firm believes that by combining fundamental research with a long-term investment horizon it is possible to uncover and act upon inefficiencies in the valuation of market sectors and individual securities. The investment process begins with idea generation by fixed income traders and analysts, which is then combined with global industry analysts and deliberation among sector committees, and which culminates with recommendations to senior fixed income members/CIO. Dodge & Cox core bond portfolios tend to overweight corporate bond sectors while maintaining a relatively concentrated issuer profile.

Combined Funds Investment Manager Summaries

Pacific Investment Management Company LLC (PIMCO)

Mandate:	Public Fixed Income	Benchmark:	Bloomberg Barclays U.S. Aggregate
Product Assets/Firm Assets (as of 6/30):	\$146.3 billion / \$1.84 trillion	# of Holdings:	572
Style:	Core Plus Total Return	Fund/Quant:	Fundamental
Product Location:	Newport Beach, CA	Tracking Error Target:	150-250 bps
		Date Funded:	September 2008

PIMCO's investment process starts with an annual Secular Forum. The goal of the Secular Forum is to look beyond the current business cycle and determine how secular forces will play out over the next three to five years. Quarterly, PIMCO holds Economic Forums to evaluate global growth and inflation over the next six to twelve months. The PIMCO Investment Committee (IC) then works, on a consensus basis, to develop major strategies that serve as a model for all portfolios. The IC makes use of the top-down outlook provided by the Forum, PIMCO's Global Advisory Board and strategists and generalist portfolio managers as well as bottom-up input from the Chief Investment Officers and specialists of the asset classes. The IC defines a set of target risk exposures for portfolios. Generalist portfolio managers collaborate with sector specialists, who perform in-depth research and recommend individual securities, for portfolio implementation.

Western Asset Management Company

Mandate:	Public Fixed Income	Benchmark:	Bloomberg Barclays U.S. Aggregate
Product Assets/Firm Assets (as of 6/30):	\$74.6 billion / \$450.0 billion	# of Holdings:	1,204
Style:	U.S. Core Full Discretion	Fund/Quant:	Fundamental
Product Location:	Pasadena, CA	Tracking Error Target	200-300 bps
		Date Funded:	July 1984

Western uses multiple strategies in different environments, so no single strategy dominates performance. Western believes that this approach adds consistent value over time and can reduce volatility. In making their sector decision, the firm seeks the greatest long-term value by analyzing all fixed income market sectors and their economic expectations. Individual issues are identified based on relative credit strength, liquidity, issue structure, event risk, covenant protection, and market valuation. Western will tactically trade the portfolio's overall duration within a stated band around the benchmark, and duration and curve strategies will often comprise a meaningful portion of Western's total risk profile.

Combined Funds Investment Manager Summaries

Semi-Passive Managers

BlackRock Financial Management, Inc.

Mandate:	Semi-Passive Public Fixed Income	Benchmark:	Bloomberg Barclays U.S. Aggregate
Product Assets/Firm Assets (as of 6/30):	\$8.3 billion / \$6.3 trillion	# of Holdings:	1,300
Style:	U.S. Core Enhanced Index	Fund/Quant:	Blend
Product Location:	New York, NY	Tracking Error Target:	30-100 bps
		Date Funded:	April 1996

BlackRock manages a semi-passive portfolio that closely tracks the Bloomberg Barclays U.S. Aggregate Index. BlackRock employs a controlled-duration, relative value sector rotation and security selection approach, which can be described as active management with tighter duration, sector, and quality constraints. BlackRock seeks to add value through managing portfolio duration within a narrow band relative to the benchmark, relative value sector/sub-sector rotation and security selection, rigorous quantitative analysis of the valuation of each security and of the portfolio as a whole, intense credit analysis and review, and the judgment of experienced portfolio managers. As with other semi-passive managers with limited risk budgets, BlackRock attempts to add value largely through security selection and sector rotation, which comprises the more efficient, repeatable forms of alpha. To a lesser extent BlackRock seeks to add value through duration and curve strategies.

Goldman Sachs Asset Management

Mandate:	Semi-Passive Public Fixed Income	Benchmark:	Bloomberg Barclays U.S. Aggregate
Product Assets/Firm Assets (as of 6/30):	\$34.9 billion / \$1.3 trillion	# of Holdings:	690
Style:	U.S. Core High Quality Fixed Income	Fund/Quant:	Fundamental
Product Location:	New York, NY	Target Tracking Error:	35 bps
		Date Funded:	July 1993

Goldman manages a semi-passive portfolio within a risk-controlled framework to closely track the Bloomberg Barclays U.S. Aggregate Index. The firm relies primarily on sector allocation and security selection strategies to generate incremental return relative to the benchmark. To a lesser degree, term structure and highly controlled interest rate anticipation strategies are also implemented. Portfolios are diversified among various sectors and individual securities. Strategic investments are based on fundamental and quantitative sector research that seeks to optimize the long-term risk/return profile of portfolios.

Combined Funds Investment Manager Summaries

Neuberger Berman Investment Advisers LLC

Mandate:	Semi-Passive Public Fixed Income	Benchmark:	Bloomberg Barclays U.S. Aggregate
Product Assets/Firm Assets (as of 6/30):	\$10.0 billion / \$333.0 billion	# of Holdings:	845
Style:	Enhanced Bond Index	Fund/Quant:	Blend
Product Location:	Chicago, IL	Target Tracking Error:	10-30 bps
		Date Funded:	July 1988

Neuberger manages a semi-passive portfolio that closely tracks the Bloomberg Barclays U.S. Aggregate Index. Neuberger's process relies on a combination of quantitative tools and active management judgment. Explicit quantification and management of risks are at the heart of their investment process. Neuberger's proprietary risk exposure analysis includes all relevant factors. Neuberger then calculates a bond's expected return with respect to changes in interest rates and spreads. As with other semi-passive managers with limited risk budgets, Neuberger Berman attempts to add value largely through security selection and sector rotation, and to a lesser extent through duration and curve strategies.

Combined Funds Treasury Portfolio

Treasury Portfolio

The Treasury Portfolio, launched in early 2018, is used exclusively by the Combined Funds.

As of June 30, 2019, the program had a market value of \$7.2 billion.

The SBI's objectives included offsetting credit risk inherent in the bond program, and providing downside protection for the overall retirement program during periods of significant equity drawdowns.

Investment Management

A group of three bond managers were retained for their blend of investment styles. Each manager has been given a modest risk budget with the goal of outperforming the Bloomberg Barclays Treasury 5+ Years Total Return over time, while largely retaining the primary characteristics of the benchmark.

The manager is required to remain within +/- 0.5 years of the overall benchmark duration (currently 11 years), but may employ interest rates strategies that result in overweight or underweight positions in certain maturities along the curve. In addition, managers finding relative value in the short end may choose to hold out-of-benchmark Treasury securities of less than five years duration, either through direct purchases or through those becoming shorter than five years due to the passage of time/roll down the curve.

The managers are also permitted to purchase limited amounts of out-of-benchmark U.S.

Agencies, U.S. Supranationals, and Treasury Inflation Protected Securities (TIPS). A description of each bond manager's investment approach is included in the **Investment Manager Summaries** section beginning on page 47.

Investment Performance

The SBI constrains the risk of the Treasury Portfolio managers to ensure that their accounts continue to be comparable to the benchmark and fulfill their total fund diversification roles. Since inception in February 2018, the Treasury Portfolio returned 7.4% through June 30, 2019 slightly underperforming benchmark performance of 7.5%.

Individual manager performance is shown below.

Treasury Portfolio Characteristics

	Total Portfolio	Benchmark
Effective Duration (yrs)	11.0	11.0
Convexity	2.0	1.9
Coupon Rate (%)	2.7	2.8
Yield to Maturity (%)	2.2	2.1
Option Adjusted Spread (bps)	5.0	0.0

	1 Year Actual %	Bmk ⁽¹⁾ %	Market Value (\$ in millions)
Treasury Managers			
BlackRock Financial Mgmt.	10.3	10.4	2,390.4
Goldman Sachs Asset Mgmt.	10.3	10.4	2,378.1
Neuberger Investment Mgmt.	10.2	10.4	2,400.0
Aggregate Treasury Program	7.4	7.5	7,168.5

(1) The Treasury benchmark is the Bloomberg Barclay Treasury +5 years.

Combined Funds Investment Manager Summaries

Treasury Portfolio Managers

BlackRock Financial Management, Inc.

Mandate:	U.S. Treasury Portfolio	Benchmark:	Bloomberg Barclays Treasury 5+ Yr. Index
Product assets/Firm Assets (as of 6/30):	\$2.0 billion / \$6.3 trillion	# of Holdings:	97
Style:	Long Duration Treasury	Fund/Quant:	Fundamental
Product Location:	New York, NY	Target Tracking Error:	50-75 bps
		Date Funded:	December 2017

BlackRock manages a fixed income protection portfolio that closely tracks the Bloomberg Barclays Treasury 5+ Year Index. BlackRock employs a controlled-duration, relative value sector rotation and security selection approach (sectors include Treasuries, TIPS, Agencies and Supranational securities), which is considered as active management within the guideline constraints and the nature of the mandate. BlackRock seeks to add value through managing portfolio duration, relative value sector rotation and security selection, rigorous quantitative analysis of the valuation of each security and of the portfolio as a whole, and the judgment of experienced portfolio managers.

Goldman Sachs Asset Management

Mandate:	U.S. Treasury Portfolio	Benchmark:	Bloomberg Barclays Treasury 5+ Yr. Index
Product assets/Firm Assets (as of 6/30):	\$2.6 billion / \$1.3 trillion	# of Holdings:	60
Style:	Long Duration Treasury	Fund/Quant:	Fundamental
Product Location:	New York, NY	Target Tracking Error	50-75 bps
		Date Funded:	December 2017

Goldman manages a fixed income protection portfolio that closely tracks the Bloomberg Barclays U.S. Treasury 5+ Year Index. Goldman manages the portfolio within a risk-controlled framework. The firm relies primarily on security selection strategies, term structure and highly controlled interest rate anticipation strategies to generate incremental return relative to the benchmark. Goldman combines long-term strategic investments with short-term tactical trading opportunities. Tactical trades between Treasuries, Agencies, Supranational and TIPS are implemented to take advantage of short-term market anomalies.

Combined Funds Investment Manager Summaries

Neuberger Berman Investment Advisers LLC

Mandate:	U.S. Treasury Portfolio	Benchmark:	Bloomberg Barclays Treasury 5+ Yr. Index
Product assets/Firm Assets (as of 6/30):	\$7.0 billion / \$333.0 billion	# of Holdings:	59
Style:	Long Duration Treasury	Fund/Quant:	Fundamental
Product Location:	Chicago, IL	Target Tracking Error:	50-75 bps
		Date Funded:	December 2017

Neuberger manages a fixed income protection portfolio that seeks to replicate the interest rate risk characteristics of the Bloomberg Barclays Treasury 5+ Year Index. The manager has limited discretion to actively manage the underlying portfolio. The manager may purchase or sell fixed income instruments, and interest rate derivative instruments defined as interest rate futures on U.S. Treasury securities, Eurodollar futures, and interest rate options on U.S. Treasury futures and Eurodollar futures.

Combined Funds

Private Markets Funds

Private Markets Program

Like the stock and bond segments, private markets assets (real estate, private equity, real assets, private credit, and distressed/opportunistic investments) are managed on a program basis. The Private Markets Program is not offered to the Supplemental Investment Fund.

As of June 30, 2019, the market value of current private markets investments was \$10.2 billion, or 14% of the Combined Funds.

Statutory Constraints

The statutory constraints for any private markets asset investment for the Combined Funds are as follows:

- Each investment must involve at least four other investors.
- SBI's participation in an investment may not exceed 20% of the total investment.

Management Structure

Given their long investment time horizon, the Combined Funds are especially well suited for private markets investments. Up to 25% of the market value of the Combined Funds is targeted for private markets investments. Market value plus unfunded commitments may be up to 35% of the total market value of the Combined Funds. A breakdown of the program by segment is shown in Figure 18. The SBI does not establish an allocation target for each segment.

Descriptions of each of the private markets investments are included in the **Investment**

Manager Summaries section beginning on page 51.

Private Equity

The private equity investment strategy is to establish and maintain a broadly diversified private equity portfolio comprised of investments that provide diversification by industry type, stage of corporate development and location.

Prospective private equity managers are reviewed and selected based, primarily, on the manager's experience, investment strategy, diversification potential and performance history.

During fiscal year 2019, the SBI approved commitments with BlackRock, Blackstone Strategic Partners, Blackstone Group, Advent International, Summit Partners, Oak Hill Capital Management, Arsenal Capital Partners, Apax Partners, IK Investment Partners, KKR, Permira, TPG Partners, and Warburg Pincus & Co. The SBI will continue to review and add new private equity investments as attractive opportunities are identified.

Private Credit

The strategy for private credit investments is to target funds that typically provide a current return and may have an equity component. Structures such as subordinated debt, mezzanine, and direct lending investments are typical private credit investments. Managers are selected based on the manager's performance, experience and investment strategy. During fiscal year 2019, the SBI approved commitments with Energy Capital Partners, LBC Credit Partners, and TCW Asset Management. The SBI will

continue to review private credit investment opportunities for inclusion in the program.

Real Estate

The real estate investment strategy calls for the establishment and maintenance of a broadly diversified real estate portfolio comprised of investments that provide overall diversification by property type and location. The main components of this portfolio consist of investments in closed-end commingled funds. The remaining portion of the portfolio may include investments in less diversified, more focused (specialty) commingled funds and REITs.

Prospective real estate managers are reviewed and selected based on the manager's experience, investment strategy and performance history. During fiscal year 2019, the SBI approved commitments with Blackstone Real Estate Partners, TA Associates Realty, and Rockpoint. The SBI will continue to review real estate managers for possible inclusion in the program.

Real Assets

The strategy for real asset investments is to establish and maintain a diversified portfolio of investment vehicles comprised of tangible assets, which provide an inflation hedge and additional diversification. Real asset investments may include natural resources, infrastructure, and agricultural and timber assets. The portfolio will be diversified by geographic area as well as by type.

Real asset investments are selected based on the manager's experience, investment strategy and performance history. During

Combined Funds Private Markets Funds

fiscal year 2019, the SBI approved commitments with BlackRock, Energy & Minerals Group and Merit Energy Company. The SBI will continue to review real asset investments for possible inclusion in the program.

Distressed and Opportunistic

The strategy for distressed and opportunistic investments is to seek funds that target equity and/or debt investments in companies in some form of distress, as well as unique or idiosyncratic investments that may share characteristics of other private asset classes. Managers are selected based on the manager's performance, experience and investment strategy. During fiscal year 2019, the SBI approved a commitment with Värde Partners. The SBI will continue to review distressed and opportunistic investment opportunities for inclusion in the program.

Investment Performance

The SBI reviews performance of its private markets investments relative to inflation, as measured by changes in the Consumer Price Index (CPI), and expects that private markets investments in the aggregate will be accretive to other investments in the Combined Funds. The Private Markets Program provided a 10.4% return in fiscal year 2019 and has provided a 12.5% return annualized over the past ten years, which provided a positive contribution to overall fund performance for the Combined Funds.

Performance of the Private Markets Program is shown in Figure 19 for the period ending June 30, 2019. At this time, benchmarks have not been established for the

private markets fund managers. The long-term nature of these investments and the lack of comprehensive data on the returns provided by the private markets investments preclude comprehensive performance evaluation. In the future, as markets for these asset classes become more institutionalized, the SBI hopes to integrate

appropriate performance standards for these assets into its performance analysis. A listing of individual investment funds can be found in the **Investment Manager Summaries** section beginning on page 51.

Figure 18. Private Markets Program Asset Mix as of June 30, 2019

Combined Funds

Cash and Certificate of Deposit Program

Cash Portfolio

The Cash portfolio is used exclusively for the Combined Funds.

Management Structure

The Cash portfolio is actively managed in a separate account invested with State Street Global Advisors.

As of June 30, 2019, there was over \$2.0 billion invested in the Combined Funds Cash portfolio.

Investment Objectives

The goal of the cash portfolio is to meet the liquidity needs of the state retirement systems to pay benefits and to meet investment obligations.

Investment Management

This portfolio is invested in high quality, short-term securities generally less than 397 days. Principal protection and same-day liquidity are priorities. Holdings include U.S. Treasury and Agency issues, repurchase agreements, bankers acceptances, commercial paper, short-term corporates, and certificates of deposit.

At the end of the fiscal year, the Cash Portfolio had a current 7-day yield of 2.48% and a weighted average maturity of 16.62 days.

Investment Performance

The SBI measures the performance of the Cash portfolio against a 90 Day T-Bill benchmark.

For fiscal year 2019, the Cash portfolio matched the return of its benchmark, and outperformed for the three, five, and ten year period.

Performance results are shown in Figure 20.

FY 2019 Transactions

On July 1, 2019, over \$1 billion in cash transitioned out of the Supplemental Investment Fund Platform into the Mutual Fund Investment Platform. As the result of this transition, the Combined Funds cash allocation was over its targeted 2% allocation on June 30, 2019.

Combined Funds Cash and Certificate of Deposit Program

Certificate of Deposit Program

The SBI manages a Certificate of Deposit (CD) Program in which it purchases CDs from Minnesota financial institutions. The return the SBI receives is based on CD rates quoted in the national market. The SBI's CD program provides a reliable source of capital to Minnesota financial institutions, regardless of size, many of which do not have access to the national CD market. The Board designed the program so that no single institution is favored in the allocation of assets. Only the cash reserves of the retirement funds are used in the program.

During fiscal year 2019, the SBI purchased \$266.3 million of CDs from all Minnesota financial institutions.

Performance results are shown in Figure 21.

Participant Directed Investment Program Overview / Plans

The Participant Directed Investment Program (PDIP) is an investment program that offers a range of investment options to state and local public employees and other eligible entities and participants who participate in the Minnesota Deferred Compensation Plan, Health Care Savings Plan, Unclassified Retirement Plan, Hennepin County Supplemental Retirement Plan, Public Employees Retirement Association (PERA) Defined Contribution Plan, Volunteer Fire Relief Plans, other public funds, the Statewide Volunteer Firefighter Retirement Plan, the Minnesota College Savings Plan and the Minnesota ABLE Plan. On June 30, 2019, approximately \$11.5 billion was invested in the PDIP platform.

Background

PDIP provides investment options for a variety of retirement plans and tax advantaged savings plans. Investment goals among the PDIP's many participants will vary. In order to meet the variety of goals, participants may allocate their investments among one or more of the eligible investment options offered. Eligible options will depend on the statutory requirements, operational limitations, and other regulations and rules established for the participating organization.

Program Changes

Investment options within the PDIP platform are subject to change. On July 1, 2019 three of the plans: Health Care Savings Plan, Unclassified Retirement Plan, and the Hennepin County Supplemental Retirement Plan, transitioned from the Supplemental Investment Fund platform to the Mutual Fund platform offered to participants in the Minnesota Deferred Compensation Plan.

Investment Platforms

The investment vehicles offered include a Stable Value Fund, a Money Market Fund, mutual funds, commingled investment trusts, a target date fund, and

investment pools that invest in the various asset groups of the Combined Funds (also known as the Supplemental Investment Fund). The SBI also oversees the investment providers for two State Sponsored Savings Plans. Not all investment vehicles are available to the participating entities. Options are divided into three platforms.

- Mutual Funds
- Supplemental Investment Fund, and
- State Sponsored Savings Plans

A grid of the investment vehicles available to the respective plans is shown on page 82.

Mutual Fund Platform

Performance results for the Mutual Fund investment options for periods ending June 30, 2019 are found on figure 23. Fund summaries for the options are found on pages 86-91.

Supplemental Investment Fund Platform (SIF)

The SIF platform includes funds that invest in the same asset class pools as the Combined Funds. These funds are structured much like a family of mutual funds. The returns from these funds are based on the underlying investment manager portfolio from the Combined Funds. Summaries of the

investment options for the SIF and performance results for periods ending June 30, 2019 are found on pages 94-102.

State Sponsored Savings Plans

Performance results for the State Sponsored Savings Plans for periods ending June 30, 2019 are found in figure 37. Further details on the programs are found on pages 103-106.

Investment Objective

The SBI's objective is to provide quality investment options at a low cost to help participants meet their savings goals. With the exception of the Statewide Volunteer Firefighter Retirement Plan, participants and eligible entities are responsible for their own asset allocation and investment decisions.

Plans in PDIP

Legislative approval is required for the SBI to invest the assets of any plan. The SBI does not administer plan assets. A brief summary of the various plans invested in PDIP are as follows.

State Deferred Compensation Plan

The State Deferred Compensation Plan (MNDCCP) was established under

Participant Directed Investment Program Overview / Plans

Minnesota Statutes, § 352.965 and is classified under section 457(b) of the Internal Revenue Code. The Plan is optional for all public employees in the state of Minnesota and political subdivision employees.

Participants in this Plan invest in mutual funds, commingled investment trusts, a target date fund, a Stable Value Fund, and a Money Market Fund.

These vehicles are grouped into three sets of investment options. The first is a set of actively and passively managed mutual funds, a Stable Value Fund, and a Money Market Fund. The second is a set of target date funds called Minnesota Target Retirement Funds. The third is a self-directed brokerage account window, which offers thousands of mutual funds. The SBI has no direct management responsibilities for funds within the self-directed brokerage account window. Unless participants direct otherwise, the default option is the Minnesota Target Retirement Fund.

The Plan is administered by Minnesota State Retirement System (MSRS) who has contracted with Empower as the record keeper.

As of June 30, 2019 participants invested a total of \$7.5 billion in the State Deferred Compensation Plan.

Health Care Savings Plan*

The Health Care Savings Plan (HCSP) was established under *Minnesota Statutes*, § 352.98 and is set up as a section 115 Governmental Trust exempt from federal income tax through

Private Letter Ruling. The HCSP is available to all public employees in the state of Minnesota.

Participants in this Plan invest in the Supplemental Investment Fund (SIF) platform. The Plan also offers a Stable Value Fund and a Money Market Fund. Unless participants direct otherwise, the default investment option is the Money Market Fund.

The Plan is administered by Minnesota State Retirement System (MSRS) who has contracted with Empower as the record keeper.

As of June 30, 2019, approximately \$1.2 billion was invested in the Health Care Savings Plan.

Unclassified Retirement Plan*

The Unclassified Retirement Plan was established under *Minnesota Statutes*, Chapter 352D and satisfies the requirements of section 401(a) of the Internal Revenue Code. The Unclassified Retirement Plan is available to specified Minnesota employees in unclassified positions.

Participants in this Plan invest in the Supplemental Investment Fund (SIF) platform. This Plan also offers a set of target date funds called Minnesota Target Retirement Funds, a Stable Value Fund, and a Money Market Fund. Unless participants direct otherwise, the default investment option is the Minnesota Target Retirement Fund.

The Plan is administered by Minnesota State Retirement System (MSRS) who has contracted with Empower as the record keeper.

As of June 30, 2019 there was over \$323 million invested in the Unclassified Retirement Plan.

Hennepin County Supplemental Retirement Plan*

The Hennepin County Supplemental Retirement Plan is governed under *Minnesota Statutes*, §383B.48 and is a voluntary, non-qualified deferred compensation plan. This is an optional plan for qualified employees of Hennepin County, MN who were employed prior to April 14, 1982.

Participants in this Plan invest in the Supplemental Investment Fund (SIF) platform. A Money Market Fund is also offered in this Plan. Unless participants direct otherwise, the default investment option is the SIF Bond Fund.

The Plan is administered by Minnesota State Retirement System (MSRS) who has contracted with Empower as the record keeper.

As of June 30, 2019 just under \$161 million was invested in the Hennepin County Supplemental Retirement Plan.

Public Employees Retirement Association Defined Contribution (PERA DC) Plan

The PERA DC Plan is governed under *Minnesota Statutes*,

*As of July 1, 2019 the assets in the respective plan was invested in the mutual fund platform.

Participant Directed Investment Program Overview / Plans

Chapter 353D and satisfies the requirements of section 401(a) of the Internal Revenue Code. The defined contribution plan is exclusively for physicians, elected local governmental officials, city managers, and governmental volunteer ambulance service personnel.

Participants in this Plan invest in the Supplemental Investment Fund (SIF) platform. A Stable Value Fund and a Money Market Fund are also offered in this Plan. Unless participants direct otherwise, the default investment option is the SIF Balanced Fund.

PERA is the administrator for the Plan and the SBI provides reports showing annual returns and market value of all SIF investment options.

As of June 30, 2019 participants invested over \$73 million in the PERA DC Plan.

Local Volunteer Fire Reliefs

Local Volunteer Fire Relief Plans that are not eligible to be consolidated by the Public Employees Retirement Association (PERA) or elect not to be administered by PERA in the Statewide Volunteer Firefighter Retirement Plan may invest their assets with the SBI. There are more than 635 local volunteer firefighter plans with investment authority to invest with the SBI, if they so choose.

Participating fire reliefs can choose from the funds in the Supplemental Investment Fund (SIF) platform that invest in the same asset class pools as the Combined Funds in addition to a Money Market Fund. The local fire reliefs are responsible for

the asset allocation decisions of their plan.

Local volunteer fire relief plans are governed under *Minnesota Statutes*, Chapter 424A. Per *Minnesota Statutes*, Chapter 356, the SBI provides the local fire relief plans with reports showing annual returns and market value of all SIF investment options. The local plans are responsible for providing their specific data to the Office of the State Auditor.

As of June 30, 2019, there were 168 plans invested with the SBI with approximately \$337 million in assets.

Other Public Retirement Plans and Funds

Per *Minnesota Statutes*, § 11A.17, any public retirement plan or fund is authorized to invest its assets in the Supplemental Investment Fund.

As of June 30, 2019 the St. Paul Teachers' Retirement Fund had over \$323 million invested in the SIF.

Statewide Volunteer Firefighter Retirement Plan

The Statewide Volunteer Firefighter Retirement Plan was established January 1, 2010 under *Minnesota Statutes*, Chapter 353G. Volunteer firefighters who provide service to a municipal fire department or an independent nonprofit firefighting corporation are eligible to join. Plan assets are invested in its own investment vehicle called the Volunteer Firefighter Account. An explanation of this investment option is found on page 101.

Participation in the Plan is effective on December 31 of a given year. Administration of the Statewide Volunteer Firefighter Plan is done by the Public Employees Retirement Association (PERA).

In fiscal year 2019, 15 local entities joined the plan transferring over \$11 million to the SBI for investment. At the close of fiscal year 2019, 175 local fire entities, representing over \$107 million in assets, were in the Statewide Volunteer Firefighter Retirement Plan.

Minnesota College Savings Plan

The Minnesota Legislature authorized establishment of the Minnesota College Savings Plan under *Minnesota Statutes*, § 136G.01 in 1997 and in 2001 the tax advantaged savings plan was launched. The SBI is responsible for the investments and the Minnesota Office of Higher Education (OHE) is responsible for the overall administration of the Plan. The SBI and OHE have contracted jointly with TIAA-CREF Tuition Financing, Inc. (TFI) to provide administrative, marketing, communication, record keeping and investment management services. A summary of the investment options in this Plan is found on page 103.

As of June 30, 2019, there was approximately \$1.5 billion in assets invested in the Minnesota College Savings Plan.

Minnesota ABLE (Achieving a Better Life Experience) Plan

The Minnesota ABLE Plan was established in 2015 under

Participant Directed Investment Program Overview / Plans

Minnesota Statutes, Chapter 256Q. The Plan is allowed under section 529A of the Internal Revenue Code to encourage and assist individuals to save for qualified disability related expenses in a tax-advantaged savings plan without jeopardizing eligibility for other benefits. The SBI is responsible for the investment oversight and the Commissioner of the Department of Human Services (DHS) is responsible to administer the Plan. The SBI and DHS have contracted jointly with Ascensus to provide record keeping, administrative and investment management services. In 2017, the State of Minnesota joined the National ABLE Alliance Program, which allowed states across the nation to enter an interstate consortium so that the Plan would have scale so that it would benefit from lower fees and operational efficiencies.

Information on the Minnesota ABLE Plan, including a list of states and territories that sponsor an ABLE Plan in the program can be found under www.savewithable.com.

A summary of the investment options in this Plan is found on page 106.

As of June 30, 2019, there was approximately \$6 million invested in the Minnesota ABLE Plan.

Participant Directed Investment Program

Mutual Fund Investment Platform

The Mutual Fund Investment platform allows public employees the option to invest in mutual funds, commingled investment trusts, a target date fund, a Stable Value Fund and a Money Market Fund.

Participating Plans

The Mutual Fund Investment platform is offered to participants in the Minnesota Deferred Compensation Plan, a tax sheltered retirement savings program, which is a supplemental plan to the participant's primary retirement plan.

As of June 30, 2019 there was just under \$7.5 billion invested in the Mutual Fund Investment Platform by participants in the Minnesota Deferred Compensation Plan.

Program Structure

Actively Managed Options

The platform offers a range of actively managed options that allows participants the flexibility to create an investment program to meet their needs.

Performance results for the options in the mutual fund platform for periods ending June 30, 2019 are shown in Figure 23.

- **Large-Cap Equity**

This option is a concentrated portfolio of high quality stocks that generally offer current dividends. The fund is expected to outperform the NASDAQ U.S. Dividend Achievers Select Index. The fund currently offered is the Vanguard Dividend Growth Fund.

- **Small-Cap Equity**

This option invests primarily in companies with small market capitalizations. The fund is expected to outperform the Russell 2000 over time. T. Rowe Price Small-Cap Stock Fund is the fund currently offered.

- **Bond Fund**

This option invests primarily in investment grade securities in the U.S. bond market. The fund is expected to outperform the Bloomberg Barclays U.S. Aggregate Bond Index over time. The fund currently offered is the Dodge & Cox Income Fund.

- **International Equity**

This option invests primarily in stocks of companies in developed countries located outside the United States. The fund is expected to outperform the Morgan Stanley Capital International (MSCI) Index of Europe, Australasia and the Far East (EAFE) over time. The fund currently offered is the Fidelity Diversified International Fund.

- **Money Market Fund**

This option invests in high quality short-term debt instruments and is expected to outperform the return on 3 month U.S. Treasury Bills. This option is the SIF Money Market Fund invested by State Street Global Advisors (see page 99).

- **Stable Value Fund**

The fund is invested in a well-diversified portfolio of high quality fixed income securities. The fund also holds insurance contracts issued by highly rated insurance companies and banks which are structured to provide principal protection for the fund's diversified bond portfolios, regardless of daily market changes, and maintain a relatively stable return profile for the portfolio.

The option is expected to outperform the return of the three year Constant Maturity Treasury plus 45 basis points (0.45%), over time. Currently, Galliard Capital Management, Inc. manages the option (see page 100).

Passively Managed Options

The plan offers a range of passively managed options that allows participants the flexibility to create a lower cost investment program to meet their needs.

- **Large-Cap Equity**

This option is a passive domestic stock portfolio that tracks the S&P 500. The fund currently offered is the Vanguard Institutional Index Plus Fund.

- **Mid-Cap Equity**

This option invests in companies with medium market capitalizations that track the CRSP U.S. Mid-Cap Index. The fund currently

Participant Directed Investment Program

Mutual Fund Investment Platform

offered is the Vanguard Mid-Capitalization Index Institutional Fund.

- **Balanced Fund**

This option is a mix of stocks and bonds. The fund is expected to track a weighted benchmark of 60% CRSP U.S. Total Market Index and 40% Bloomberg Barclays U.S. Aggregate Bond Index. The fund currently offered is the Vanguard Balanced Index Fund.

- **Bond Fund**

This option invests in a broad range of U.S. fixed income securities. The fund is expected to track the performance of the Bloomberg Barclays U.S. Aggregate Bond Index. The fund currently offered is the Vanguard Total Bond Market Index Fund.

- **International Equity**

This option invests in international equities and is expected to track the FTSE Global All Cap ex U.S. Index, an index designed to measure equity market performance in developed and emerging markets, excluding the United States. The fund currently offered is the Vanguard Total International Stock Index Fund.

Minnesota Target Retirement Funds

The plan offers a range of target date funds which are diversified options with allocations that change over time to reduce risk and become more conservative as the target retirement date approaches. The funds are currently offered by State Street Global Advisors (SSgA).

Performance results for the target date fund option for periods ending June 30, 2019 are shown in Figure 24.

Participant Directed Investment Program

Mutual Fund Investment Program: Fund Summaries

Dodge & Cox Income Fund

Mandate:	Fixed Income	Benchmark:	Bloomberg Barclays U.S. Aggregate Bond Index
Product Net Asset Value/Firm Assets (as of 6/30):	\$59.6 billion / \$313.0 billion	# of Holdings:	1,081
Style:	Core	Fund/Quant:	Fundamental
Manager Location:	San Francisco, CA	Date Funded:	July 1999

The objective of this fund is to seek a high and stable rate of current income, consistent with long term preservation of capital, with capital appreciation being a secondary consideration. This portfolio invests primarily in investment-grade quality corporate and mortgage bonds, government issues, and, to a lesser extent, fixed income securities rated below investment grade. While it invests primarily in the U.S. bond market, the fund may invest up to 25% of its total assets in U.S. dollar-denominated securities of non-U.S. issuers, including emerging market issuers.

Fidelity Diversified International Fund

Mandate:	International Equity	Benchmark:	MSCI EAFE Index
Product Assets/Firm Assets (as of 6/30):	\$5.3 billion / \$2.8 trillion	# of Holdings:	192
Style:	Large-Cap, Developed Countries	Fund/Quant:	Fundamental
Manager Location:	Boston, MA	Date Funded:	July 1999

The portfolio's investment objective is to seek capital growth over a market cycle relative to the MSCI EAFE Index, through the active management of primarily, non-U.S. common stock. The portfolio's investment philosophy is that selecting companies based on rigorous fundamental analysis, management quality and attractive valuations creates the best framework to outperform the market over the long-term. The portfolio leverages the work of Fidelity's global research professionals to seek to identify companies with superior growth prospects trading at attractive valuations. Generally, the portfolio's universe includes non-U.S. common stocks with market capitalization consistent with the MSCI EAFE Index, though the portfolio's investable universe extends beyond the EAFE Index to include emerging market, Canadian, U.S., and other international stocks.

The goal of this fund is capital appreciation by investing in securities of companies located outside the United States. The fund invests primarily in larger companies located in developed countries. The manager uses a bottom-up stock selection process based on the extensive fundamental research available from the company's many security analysts across the globe. The process seeks to invest in companies with durable earnings, strong competitive position, and improving profitability. Sector and country weightings are reviewed for risk control, preference is given to companies with strong balance sheets which tend to perform better in down markets. As part of the portfolio construction process and quarterly portfolio review, quantitative portfolio analysis is evaluated to examine risks exposures including style factors, sectors and geography. The fund does not employ currency hedging, to provide currency diversification to U.S. based investors. In November 2016 participants invested in the retail mutual fund transitioned into the Commingled Investment Trust (CIT), a lower-cost investment vehicle of the same fund.

Participant Directed Investment Program

Mutual Fund Investment Program: Fund Summaries

T. Rowe Price Institutional Small-Cap Stock Fund

Mandate:	Small-Cap Equity	Benchmark:	Russell 2000
Product Assets/Firm Assets (as of 6/30):	\$5.3 billion / \$1.1 trillion	# of Holdings:	292
Style:	Core	Fund/Quant:	Fundamental
Manager Location:	Baltimore, MD	Date Funded:	July 1999

The fund seeks to provide long-term capital growth by investing primarily in stocks of small companies. The fund will normally invest at least 80% of its net assets (including any borrowings for investment purposes) in stocks of small companies. The fund defines a small company as one whose market capitalization falls within or below the current range of companies in either the Russell 2000 Index or the S&P Small-Cap 600 Index. When choosing stocks, the fund manager generally looks for one or more of the following characteristics: capable management, attractive business niches, pricing flexibility, sound financial and accounting practices, a potential or demonstrated ability to grow earnings, revenues, and cash flow consistently, and the potential for a catalyst (such as increased investor attention, asset sales, strong business prospects, or a change in management) to cause the stock's price to rise. In September 2016 the T. Rowe Price Institutional Small-Cap Stock Fund replaced the retail mutual fund vehicle.

Vanguard Dividend Growth Fund

Mandate:	Domestic Equity	Benchmark:	NASDAQ U.S. Dividend Achievers Select Index
Product Assets/Firm Assets (as of 6/30):	\$37.2 billion / \$5.0 trillion	# of Holdings:	41
Style:	Large-Cap, High Dividend Yield	Fund/Quant:	Fundamental
Manager Location:	Boston, MA	Date Funded:	September 2016

The fund is an actively managed U.S. stock fund and uses the NASDAQ U.S. Dividend Achievers Select Index as its benchmark. The fund investment objective is to provide, primarily, a growing stream of income over time and, secondarily, long-term capital appreciation and current income. The fund invests primarily in stocks that tend to offer current dividends. The fund focuses on high-quality companies that have prospects for long-term total returns as a result of their ability to grow earnings and willingness to increase dividends over time. These stocks typically, but not always, will be undervalued relative to the market and will show potential for increasing dividends. The fund will be diversified across industry sectors.

Participant Directed Investment Program

Mutual Fund Investment Program: Fund Summaries

Vanguard Institutional Index Fund Institutional Plus

Mandate:	Large-Cap Domestic Equity	Benchmark:	S&P 500 Index
Product Assets/Firm Assets (as of 6/30):	\$231.4 billion / \$5.0 trillion	# of Holdings:	506
Style:	Core	Fund/Quant:	N.A.
Manager Location:	Malvern, PA	Date Funded:	July 1999

The passively managed fund tracks the S&P 500 index. The fund employs an indexing investment approach designed to track the performance of the Standard & Poor's 500 Index, which is dominated by the stocks of large U.S. companies. The fund attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index.

Vanguard Mid-Capitalization Index Institutional Fund Plus

Mandate:	Mid-Cap Domestic Equity	Benchmark:	CRSP U.S. Mid-Cap Index
Product assets/Firm Assets (as of 6/30):	\$107 billion / \$5.0 trillion	# of Holdings:	368
Style:	Core	Fund/Quant:	N.A.
Manager Location:	Malvern, PA	Date Funded:	January 2004

The fund is passively managed to track the performance of the CRSP U.S. Mid-Cap Index, a broadly diversified index of stocks of medium-size U.S. companies. The fund attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Vanguard Balanced Index Fund Institutional

Mandate:	Diversified Portfolio of 60% stocks and 40% bonds.	Benchmark:	Stock allocation: CRSP U.S. Total Market Index Bond allocation: Barclays U.S. Aggregate Bond Index
Product assets/Firm Assets (as of 6/30):	\$42.5 billion / \$5.0 trillion	# of Holdings:	3,449 stock holdings 7,508 bond holdings
Style:	Core	Fund/Quant:	N.A.
Manager Location:	Malvern, PA	Date Funded:	December 2003

The fund portfolio provides a diversified portfolio of stocks and bonds by investing in a mix of 60 percent stocks and 40 percent bonds. The manager does not change the asset mix. The fund is passively managed with the equity portfolio to track the returns of the CRSP U.S. Total Market Index, which covers all regularly traded U.S. stocks. The bond portfolio is invested to track the returns of the Bloomberg Barclays U.S. Aggregate Float Adjusted Bond Index, which covers virtually all taxable fixed income securities.

Participant Directed Investment Program

Mutual Fund Investment Program: Fund Summaries

Vanguard Total Bond Market Index Fund Institutional Plus

Mandate:	Fixed Income	Benchmark:	Bloomberg U.S. Aggregate Float Adjusted Bond Index
Product assets/Firm Assets (as of 6/30):	\$232.2 billion / \$5.0 trillion	# of Holdings:	8,603
Style:	Core	Fund/Quant:	N.A.
Manager Location:	Malvern, PA	Date Funded:	December 2003

The fund is passively managed to track the performance of the Bloomberg Barclays U.S. Aggregate Float Adjusted Bond index. The manager uses an index sampling technique to invest in investment-grade corporate, U.S. Treasury, international dollar denominated bonds, mortgage-backed and asset-backed securities of varying maturities in order to create a portfolio of intermediate duration like the Bloomberg Barclays U.S. Aggregate Float Adjusted Bond Index, which currently ranges between 5 and 10 years.

Vanguard Total International Stock Index Fund Plus

Mandate:	International Equity	Benchmark:	FTSE Global All Cap ex US Index
Product assets/Firm Assets (as of 6/30):	\$376.6 billion / \$5.0 trillion	# of Holdings:	7,062
Style:	Core	Fund/Quant:	N.A.
Manager Location:	Malvern, PA	Date Funded:	December 2003

The fund is passively managed to track the returns of the FTSE Global All Cap ex U.S. Index, a free-float-adjusted market-capitalization-weighted index designed to measure equity market performance in developed markets and emerging markets, excluding the U.S. The fund invests in small, mid and large cap stocks in the market index and includes more than 5,300 stocks of companies located in 46 countries. The fund invests substantially all of its assets in the common stocks included in its target index. Fund assets are allocated based on each regions weighting in the index.

Mutual Fund Investment Program: Fund Summaries

SIF Money Market Fund Manager

State Street Global Advisors

Mandate:	Cash	Benchmark:	90 Day T Bill
Product assets/Firm Assets (as of 6/30):	\$55.0 billion / \$2.9 trillion	# of Holdings:	208
Style:	Short-Term Cash	Fund/Quant:	Fundamental
Manager Location:	Boston, MA	Date Funded:	July 1999

The Money Market Fund seeks to provide safety of principal, daily liquidity and a competitive yield over the long term. The Fund is not a "money market fund" registered with the Securities and Exchange Commission, and is not subject to the various rules and limitations that apply to such funds. There can be no assurance that the Fund will maintain a stable net asset value.

The Fund invests in a diversified portfolio of U.S. dollar-denominated securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities; debt securities of domestic or foreign corporations; mortgage-backed and other asset-backed securities; taxable and tax-exempt municipal bonds; obligations of international agencies or supranational entities; inflation-indexed bonds; structured notes; loan participations; delayed funding loans and revolving credit facilities; and short-term investments, such as repurchase agreements, bank certificates of deposit, fixed time deposits, and bankers' acceptances.

SIF Stable Value Fund Manager

Galliard Capital Management, Inc.

Mandate:	Stable Value	Benchmark:	3 Yr Constant Maturity Treasury Index +0.45%
Product assets/Firm Assets (as of 6/30):	\$77.7 billion / \$92.1 billion	# of Holdings:	1,118
Style:	Investment Grade Bond Portfolio and Insurance Wrappers	Fund/Quant:	Fundamental
Manager Location:	Minneapolis, MN	Date Funded:	November 1994

Galliard Capital Management manages the Stable Value Fund in the Supplemental Investment Fund. The Stable Value Fund is managed to provide preservation of principal, maintain adequate liquidity to meet potential withdrawals, and produce a level of steady, positive income. The manager invests the Fund in well diversified portfolios of U.S. dollar denominated, investment grade fixed income securities. The manager also invests in investment contracts issued by banks and insurance companies that assure that participants can transact at book value (principal plus accrued interest) as well as maintain a relatively stable return profile for the portfolio regardless of daily market changes. To maintain necessary liquidity, the manager invests a portion of the portfolio in a Short Term Investment Fund.

Participant Directed Investment Program

Mutual Fund Investment Program: Fund Summaries

Minnesota Target Retirement Funds

State Street Global Advisors

Mandate:	Diversified Portfolio that glides the allocation according to participants retirement age	Benchmark:	11 Asset Classes
Product assets/Firm Assets (as of 6/30):	\$59.2 billion / \$2.9 trillion	# of Holdings:	N.A.
Style:	Target Date Funds	Fund/Quant:	N.A.
Manager Location:	Boston, MA	Date Funded:	July 2011

The MN Target Retirement Funds managed by State Street Global Advisors, seek to offer complete, low cost investment strategies with asset allocations which become more conservative as employees near retirement. Each Fund seeks to achieve its objective by investing in a set of underlying SSgA collective trust funds representing various asset classes. Over time, the allocation to asset classes and funds change according to a predetermined "glide path". (The glide path represents the shifting of asset classes over time and does not apply to the Income Fund.) Each Fund's asset allocation will become more conservative as it approaches its target retirement date. This reflects the need for reduced investment risks as retirement approaches and the need for lower volatility of a portfolio, which may be a primary source of income after retiring.

Participant Directed Investment Program Supplemental Investment Fund (SIF) Platform

The Supplemental Investment Fund (SIF) platform is available to state and local public employees and offers a range of funds that invest in the underlying asset pools of the Combined Funds.

Participating Plans

The Supplemental Investment Fund (SIF) platform provides investment vehicles for a variety of plans. The SIF and the Combined Funds share many of the same stock and bond managers. This sharing is accomplished by grouping managers by asset class into several different investment pools. As of June 30, 2019, it provided some or all of the investment options for the Unclassified Employees Retirement Plan, Public Employees Retirement Fund (PERA) Defined Contribution Plan, Hennepin County Supplemental Retirement Plan, Health Care Savings Plan, Local Volunteer Fire Relief Plans, St. Paul Teachers' Retirement Fund Association, and the Statewide Volunteer Firefighter Plan.

As of June 30, 2019 there was \$2.5 billion invested in the SIF platform by participants in the plans identified above.

All Funds in the SIF program, except the Stable Value Fund, are available to Local Volunteer Fire Relief Associations who invest their assets with the SBI.

The Volunteer Firefighter Account is an investment option available only for those local firefighter entities that participate in the Statewide Volunteer Firefighter Retirement Plan administered by PERA. Local entities that participate in this Plan must have all their assets invested in

the Volunteer Firefighter Account.

On July 1, 2019, three plan sponsors transitioned out of the SIF investment platform into the mutual fund platform offered to participants in the Minnesota Deferred Compensation Plan. In aggregate, just over \$1 billion transferred out of the SIF investment platform. The investment options remain the same after the transition and as of July 1, 2019 represent \$840 million in assets.

offered and structured much like a family of mutual funds. This investment management structure allows the SBI to gain greater operating efficiency within asset classes and to keep management costs as low as possible for all participants.

In addition to the pooled asset groups, a liquid investment option is offered with the Money Market Fund, and for eligible participants a capital preservation strategy is offered in the Stable Value Fund.

Fund Structure

Investment goals among the participants are varied. In order to meet the variety of goals, a broad group of asset classes are

Fund Management

As of June 30, 2019 the Supplemental Investment Fund program offered eight investment options shown in

Figure 25. Accounts in the Supplemental Investment Fund

Balanced Fund	a balanced portfolio of U.S. common stocks, fixed income and cash.
U.S. Stock Actively Managed Fund	an actively and semi-passively managed portfolio of U.S. common stocks.
U.S. Stock Index Fund	a passively managed portfolio of U.S. common stocks.
Broad International Stock Fund	a portfolio of actively, semi-passively, and passively managed non-U.S. stocks.
Bond Fund	a portfolio of both actively and semi-passively managed fixed income securities.
Money Market Fund	a portfolio of short-term, liquid debt securities.
Stable Value Fund	a high quality fixed income portfolio including a portfolio of stable value instruments, security backed contracts, insurance company investment contracts and bank investment contracts.
Volunteer Firefighter Account	a balanced portfolio of U.S. and international common stocks, fixed income and cash.

Participant Directed Investment Program Supplemental Investment Fund (SIF) Platform

Figure 25. The objectives, asset allocation, management and performance of each Fund are explained in the following sections.

Share Values

A share value is established daily for each account and participants buy or sell shares based on the most recent share value.

Shares in the Balanced Fund, U.S. Stock Actively Managed Fund, U.S. Stock Index Fund, Broad International Stock Fund, Bond Fund, and the Volunteer Firefighter Account are priced based on the market value of each Fund. Performance of these Funds is a function of the income and capital appreciation (or depreciation) generated by the securities in the Funds.

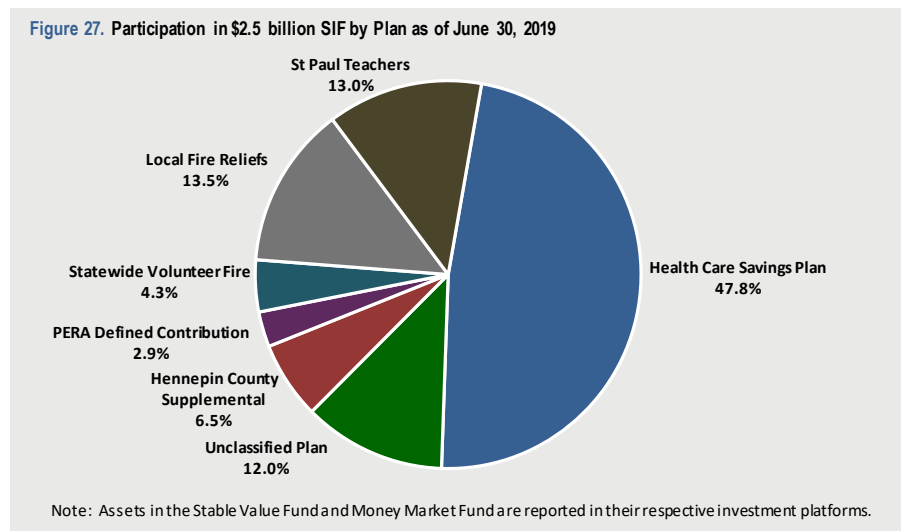

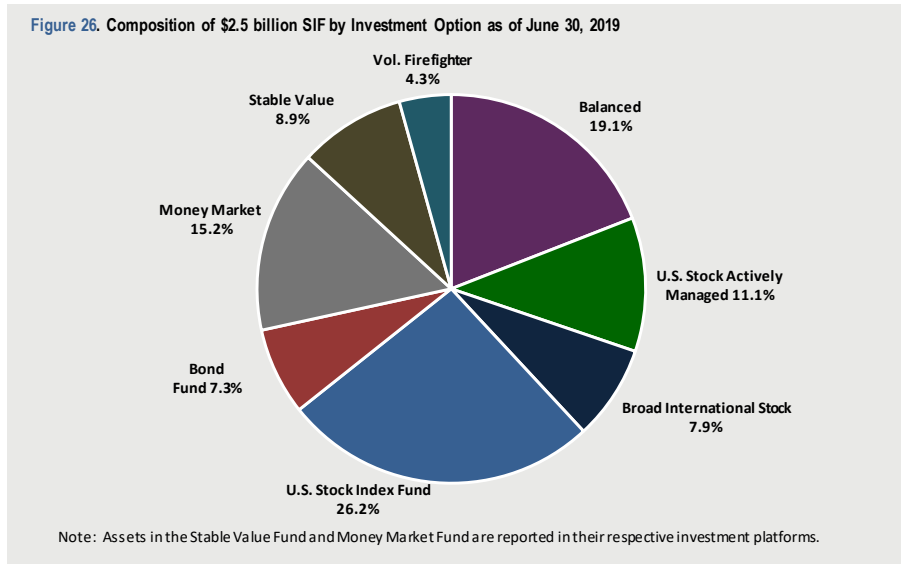

In the Stable Value Fund, shares are priced based on the blended crediting rates of the contracts and yields from any liquidity investments. Performance is calculated based on changes in these share values.

In the Money Market Fund, share values remain constant and the accrued interest income is credited to the Fund through the purchase of additional shares.

The investment returns shown in this report are calculated using a time-weighted rate of return formula. These returns are net of investment management fees and transaction costs, but do not reflect administrative expenses that may be deducted by the retirement systems to defray administrative costs.

The distribution of assets by market value in the Supplemental Investment Fund

as of June 30, 2019 is shown by Fund in Figure 26 and by Plan in Figure 27.

Participant Directed Investment Program

Supplemental Investment Fund (SIF): Balanced Fund

Balanced Fund

Objective

The investment objectives of the Balanced Fund are to earn a return both from capital appreciation (increases in market value) and current yield (dividends from stock and interest on bonds). The Balanced Fund pursues these objectives within the constraints of protecting against adverse financial environments and limiting short-run portfolio return volatility.

The SBI invests the Balanced Fund in a balanced portfolio of common stocks and fixed income securities (bonds) with the following long-term asset mix: 60% domestic common stocks, 35% bonds, 5% cash equivalents.

Domestic common stocks provide the potential for significant long-term capital appreciation, while bonds provide both a hedge against deflation and the diversification needed to limit excessive portfolio return volatility.

At the close of fiscal year 2019, the value of the Balanced Fund was \$474 million.

Management

The Balanced Fund assets are invested by external managers. The fixed income assets are invested in the Bond Fund, which includes active and semi-passive external investment managers retained by the SBI. The common stock segment is managed and invested in the U.S. Stock Index Fund and is designed to track the returns of the Russell 3000 Index. The passive manager for this portion of the Fund is BlackRock

Institutional Trust Company. The cash portion of the Fund is actively managed by State Street Global Advisors.

Performance

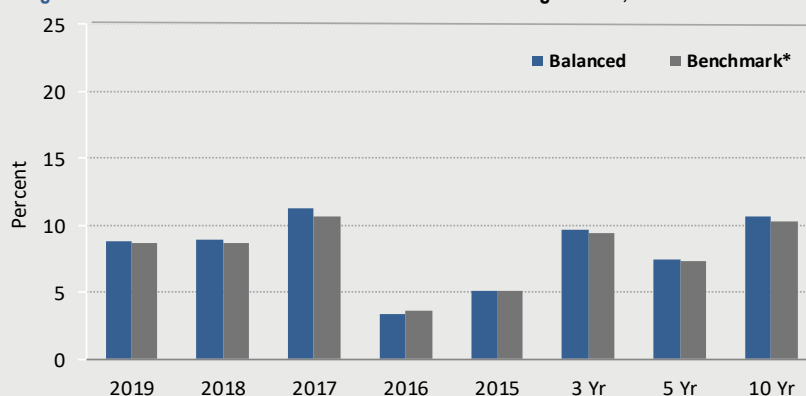

As with the other SBI funds which use a multi-manager investment structure, the Board evaluates the performance of the Balanced Fund on two levels:

- **Total Fund.** The Balanced Fund is expected to exceed the returns of a composite of market indices weighted in the same proportion as its long-term asset allocation.
- **Individual Manager.** The passive stock manager is expected to closely track the performance of the Russell 3000. The group of external bond managers for the Fund are expected to

exceed the performance of the Bloomberg Barclays U.S. Aggregate Bond Index. The cash manager for the Fund is expected to exceed the performance of 3 Month U.S. Treasury Bills.

The Balanced Fund provided a return of 8.8% for fiscal year 2019, slightly outperforming its benchmark. Over the most recent ten years, the Balanced Fund exceeded its benchmark by 0.3 percentage point. Figure 28 shows a history of performance results.

Figure 28. Balanced Fund Performance For Periods Ending June 30, 2019

Participant Directed Investment Program

Supplemental Investment Fund (SIF): U.S. Stock Actively Managed Fund

U.S. Stock Actively Managed Fund

Objective

The investment objective of the U.S. Stock Actively Managed Fund is to generate high returns from capital appreciation. To achieve this objective, the Fund is invested primarily in U.S. common stocks.

At the close of fiscal year 2019, the value of the Fund was \$277 million.

Management

The assets of the U.S. Stock Actively Managed Fund consists of the large-cap, small-cap, and semi-passive managers. These are actively managed asset groups within the Domestic Stock Program. This allocation reflects a more aggressive investment than is available through passive management. The Fund may hold a small amount of cash that represents new contributions received prior to investment in the market and cash that may be held by the individual managers in the Fund.

Performance

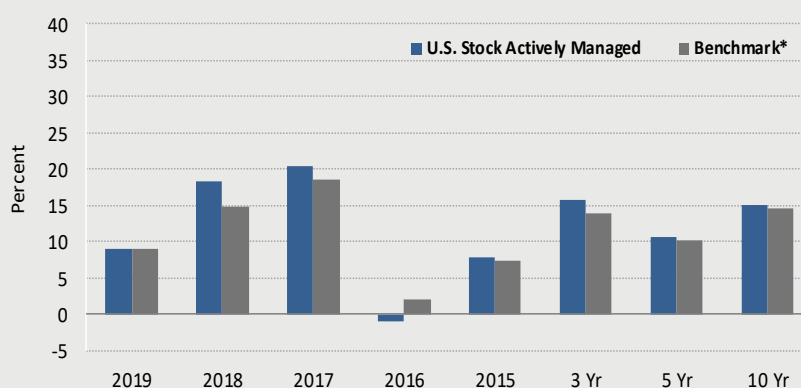

The Board evaluates the performance of the U.S. Stock Actively Managed Fund on two levels:

— **Total Fund.** The U.S. Stock Actively Managed Fund is expected to exceed the returns of the Russell 3000 Index.

— **Individual Manager.** Performance objectives for the individual managers are described beginning on page 20 of this report.

The U.S. Stock Actively Managed Fund provided a return of 8.9% for the fiscal year, slightly underperforming its benchmark. Over the last ten year period, the Fund outperformed its benchmark by 0.3 percentage point. See the investment discussion beginning on page 16 concerning the actively and semi-passively managed Domestic Stock Program for performance information on the managers used by this Fund. A history of performance results is shown in Figure 29.

Figure 29. U.S. Stock Actively Managed Fund Performance For Periods Ending June 30, 2019

	2019	2018	2017	2016	2015	Annualized

* Russell 3000 since 10/1/03.

Participant Directed Investment Program

Supplemental Investment Fund (SIF): U.S. Stock Index Fund

U.S. Stock Index Fund

Objective

The investment objective of the U.S. Stock Index Fund is to generate returns that track the performance of the broad U.S. common stock market as represented by the Russell 3000 Index. To accomplish this objective, the SBI allocates all of the assets of the Fund to passively managed domestic stocks.

As of June 30, 2019, the value of the Fund was \$652.4 million.

Management

The U.S. Stock Index Fund invests in the passively managed segment of the Domestic Equity Program.

The assets of the U.S. Stock Index Fund is passively managed by BlackRock Institutional Trust Company.

The passively managed mandate of the Domestic Equity Program provides the equity allocation in the Balanced Fund and Volunteer Firefighter Account.

Performance

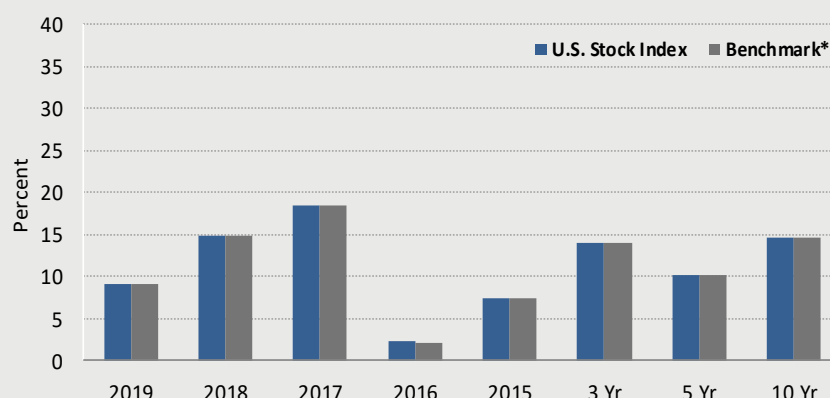

The performance objective of the U.S. Stock Index Fund is to track the performance of the Russell 3000. The SBI recognizes that the Fund's returns may deviate slightly from those of the Russell 3000 due to the effects of management fees, trading costs and cash flows.

Individual Manager.

Performance objectives for the Russell 3000 Index manager is described on page 26 of this report.

As expected, the U.S. Stock Index Fund tracked the Russell 3000 Index for the fiscal year and closely tracked over longer periods as shown in Figure 30.

Figure 30. U.S. Stock Index Fund Performance For Periods Ending June 30, 2019

* Russell 3000 since 10/1/03.

Participant Directed Investment Program

Supplemental Investment Fund (SIF): Broad International Stock Fund

Broad International Stock Fund

Objective

The investment objective of the Broad International Stock Fund is to earn a high rate of return by investing in the stock of companies outside the U.S.

Typically, a majority of the Fund is invested in the largest international stock markets (United Kingdom, Japan, Canada, France, Germany, and Switzerland) and is invested in other well established markets in Europe and the Pacific region. In addition, the fund invests in emerging markets around the world, including those in Latin America, Eastern Europe, the Middle East, China and ASEAN regions.

At the end of fiscal year 2019, the Fund had a market value of \$196 million.

Management

The Broad International Fund invests in the International Stock Program used by the Combined Funds. The International Stock Program retains active, semi-passive, and passive managers. These managers use a variety of investment styles and approaches to buy and sell stocks in an attempt to maximize market value. The passively managed portfolio's objective is to approximate the returns of the international markets in both the developed and emerging markets. The semi-passive mandates add incremental value over the index return by investing in broadly diversified portfolios of stocks in the developed and emerging markets. Overall, the Fund is designed to consistently track the return of the MSCI ACWI

ex USA Index (net), a developed and emerging markets index.

Performance

The Board evaluates the performance of the Broad International Stock Fund on two levels:

- **Total Fund.** The Broad International Stock Fund is expected to exceed the returns of the MSCI ACWI ex USA Index (net).
- **Individual Manager.** Performance objectives for the individual managers are described beginning on page 31 of this report.

During fiscal year 2019, the Broad International Stock Fund, with a return of 1.1%, underperformed the MSCI ACWI ex USA Index (net) by 0.2 percentage point. Over the

most recent ten year period, the Broad International Stock Fund exceeded its benchmark by 0.5 percentage point.

See the discussion on performance of the international managers beginning on page 31 of this report. A history of performance results is shown in Figure 31.

Figure 31. Broad International Stock Fund Performance For Periods Ending June 30, 2019

* The International Equity Asset Class Target is MSCI ACWI ex USA Index (net) since 10/1/03.

Participant Directed Investment Program

Supplemental Investment Fund (SIF): Bond Fund

Bond Fund

Objective

The objective of the Bond Fund is to maximize total return with investments that provide current income and long-term growth while still focus on preservation of capital. The Fund is invested primarily in investment-grade government and corporate bonds and mortgage securities with intermediate to long maturities. A small portion of the Fund is invested in below investment grade and non-U.S. securities.

At the end of fiscal year 2019, the Fund had a market value of \$180.7 million.

The Fund earns investment returns through interest income and capital appreciation. Because bond prices move inversely with interest rates, the Fund entails some risk for investors. Historically, however, it represents a lower risk alternative than the investment options that include common stocks.

Management

The Bond Fund invests in the Fixed Income Program used by the Combined Funds. The Fixed Income Program retains both active and semi-passive managers.

The Fixed Income Program also provides the fixed income allocation in the Balanced Fund and the Volunteer Firefighter Account.

Performance

The Board evaluates the performance of the Bond Fund on two levels:

— **Total Fund.** The Fund is expected to exceed the

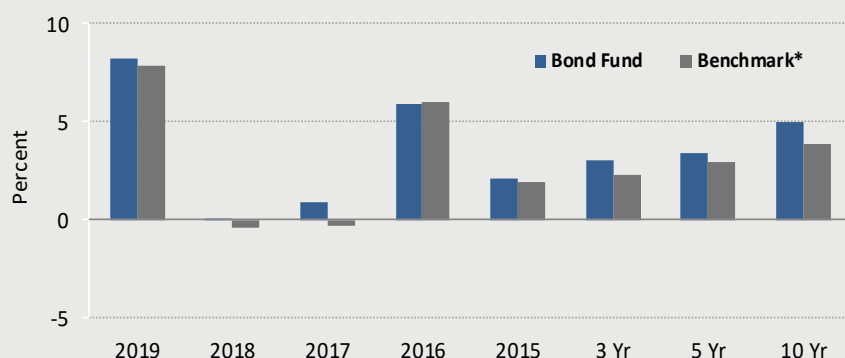

returns of the Bloomberg Barclays U.S. Aggregate Bond Index.

— **Individual Manager.**

Performance objectives for the individual managers are described beginning on page 39 of this report.

For fiscal year 2019, the Bond Fund produced a return of 8.2%, which was 0.3 percentage point above the Bloomberg Barclays U.S. Aggregate benchmark. For the most recent ten year period, the Fund exceeded its benchmark by 1.1 percentage points. Bond manager summaries are found starting on page 39 of this report. A history of performance results is shown in Figure 32.

Participant Directed Investment Program Supplemental Investment Fund (SIF): Money Market Fund

Money Market Fund

Objective

The Money Market Fund invests in high-quality, short-term debt instruments. The Fund's investment objectives are to preserve capital and offer competitive money market returns.

The Money Market Fund is offered in two different investment platforms within the Participant Directed Investment Program. At the end of June 30, 2019, the total market value of the Money Market Fund was approximately \$468 million, of which approximately \$379 million was invested in the SIF investment platform.

Management

The Fund uses the same cash manager as the Combined Funds, which is State Street Global Advisors.

Performance

The Fund is expected to produce returns competitive with those available from short-term debt securities. For fiscal year 2019, the Money Market Fund generated a return of 2.5%, which was 0.2 percentage point above the 3 month U.S. Treasury Bills. Over the most recent ten year period, the Fund slightly outperformed its target. A history of performance results is shown in Figure 33.

Figure 33. Money Market Fund Performance For Periods Ending June 30, 2019

Participant Directed Investment Program Supplemental Investment Fund (SIF): Stable Value Fund

Stable Value Fund

Objective

The investment objectives of the Stable Value Fund are to seek to provide preservation of principal, maintain adequate liquidity to meet potential withdrawals, and produce a level of income consistent with an underlying portfolio of short to intermediate duration, high quality fixed income securities.

The Stable Value Fund is offered in two different investment platforms within the Participant Directed Investment Program. At the end of June 30, 2019, the total market value of the Stable Value Fund was approximately \$1.6 billion, of which \$220 million was invested via the SIF platform.

Management

The Fund is invested in a well-diversified portfolio of high quality fixed income securities. The Fund also holds insurance contracts issued by highly rated insurance companies and banks which are structured to provide principal protection for the Fund's diversified bond portfolios, regardless of daily market changes, and maintain a relatively stable return profile for the portfolio. The portfolio may also hold cash or cash equivalents for liquidity purposes. Performance reflects the blended crediting rates from all investments in the fund.

The manager for the Fund is Galliard Capital Management, a subsidiary of Wells Fargo Asset Management.

Figure 34 shows a history of the Fund's performance results.

Performance

The Stable Value Fund is expected to exceed the returns of its custom benchmark, the 3-year Constant Maturity Treasury plus 45 basis points (+0.45%).

During fiscal year 2019, the Stable Value Fund provided a return of 2.6%, which was 0.4 percentage point below its benchmark. Over the most recent ten year period, the Stable Value Fund exceeded its benchmark by 1.1 percentage points.

Participant Directed Investment Program

Supplemental Investment Fund (SIF): Statewide Volunteer Plan

Statewide Volunteer Firefighter Retirement Plan

Minnesota Statutes, Chapter 353G creates a statewide, voluntary plan for local relief associations. The Plan was established January 1, 2010. Local entities may choose to join the statewide plan which is administered by PERA. Assets of the plan are invested in the Volunteer Firefighter Account. Participation in the plan is effective on December 31 of a given year. The SBI must evaluate the assets of each local entity that seeks to join the plan. In January of 2019, 15 local entities joined the plan, transferring just under \$11 million to the SBI for investment. At the close of fiscal year 2019, 175 local fire entities, representing over \$107 million in assets, were in the Statewide Volunteer Firefighter Retirement Plan.

Objective

The investment objective of the Volunteer Firefighter Account is to earn a high rate of return from both capital appreciation (increases in market value) and current yield (dividends from stocks and interest on bonds). The Plan pursues this objective within the constraints of protecting against adverse financial environments and limiting short-run portfolio return volatility.

The SBI invests the Account in a balanced portfolio of domestic and international stocks, fixed income and cash with the following long-term asset mix: 35% U.S. Equities, 15% International Equities, 45% Bonds, 5% Cash.

Domestic stocks provide the potential for significant long-term capital appreciation, international stocks provide similar potential along with a measure of diversification, and bonds provide both a hedge against deflation and the diversification needed to limit excessive portfolio return volatility.

Management

The Account's investment management structure combines active and passive management used by the Combined Funds. The domestic stock segment is managed as part of the passively managed segment of the Domestic Stock Program designed to track the returns of the Russell 3000 Index. The international stock segment invests in the International Stock Program which uses a combination of active, semi-

passive and passive management to invest across a broad range of developed and emerging markets. The bond segment invests in the Fixed Income Program used by the Combined Funds. The Fixed Income Program retains both active and semi-passive managers.

Performance

As with other SBI funds which utilize a multi-manager investment structure, the Board evaluates the performance of the Volunteer Firefighter Account on two levels:

- **Total Account.** The Volunteer Firefighter Account is expected to exceed the returns of a composite of market indices weighted in the same proportion as its long-term asset allocation.

Figure 35. Volunteer Firefighter Account Performance For Periods Ending June 30, 2019

- ***Individual Manager.*** The passive domestic stock and passive international stock managers are expected to closely track the performance of their respective benchmarks. The performance objectives of the active international equity and bond managers are described in their respective sections of this report.

The Account provided a return of 7.3% for the year ending June 30, 2019 which slightly underperformed its composite benchmark by 0.1 percentage point. Over the most recent five year period, the Plan exceeded its benchmark by 0.3 percentage point.

Figure 35 on the previous page shows a history of the Account's performance results.

Participant Directed Investment Program

State Sponsored Savings Program: Minnesota College Savings Plan

The Minnesota College Savings Plan is an education savings plan designed to help families set aside funds for future college costs. It is established under the provisions of the Internal Revenue Code Section 529, which authorized these types of savings plans to help families meet the costs of qualified colleges nationwide. On June 30, 2019, the market value of the Plan was just over \$1.5 billion.

Program Structure

The Minnesota Legislature authorized establishment of the Minnesota College Savings Plan (the Plan) in 1997 and in 2001 the Plan was launched. The State Board of Investment (SBI) is responsible for the investments and the Minnesota Office of Higher Education (OHE) is responsible for the overall administration of the Plan. The SBI and OHE have contracted jointly with TIAA-CREF Tuition Financing, Inc. (TFI) to provide administrative, marketing, communication, recordkeeping and investment management services.

Objective

The objective of the Plan is to be competitive in the market place by providing quality investment options with low fees to its participants. The Plan is a direct-sold plan (i.e. may be purchased directly without an investment advisor) and offers nine Age-Based Managed Allocation Options, three Risk-Based Allocation Options and seven Static Investment Options. The Plan has both active and passive management through TIAA's mutual funds. While all options are priced daily, participants may re-allocate their investment twice per calendar year.

Age Based Managed Allocation Option

This investment option seeks to align the investment objective and level of risk to the

investment horizon by taking into account the beneficiary's age and the number of years before the beneficiary turns 18 and is expected to enter college. Depending on the beneficiary's age, the assets contributed to this option are placed in one of nine age bands. As the beneficiary ages, assets are moved from one age band to the next. The age bands for younger beneficiaries seek a favorable long-term return by investing at a higher level of risk but greater potential for higher returns than more conservative investments. As a beneficiary nears college age, the age bands allocate less to equity and real estate and more to fixed-income and money market securities to preserve capital.

Risk Based Allocation Option

These Investment Options provide a fixed risk level and do not change as the beneficiary ages. There are three separate Risk Based Allocation Options: Aggressive, Moderate and Conservative.

The **aggressive option** seeks to generate a favorable long-term return by investing in mutual funds that invest primarily in equity securities and, to a lesser extent, invest in debt securities. Approximately 48% of the fund is allocated to U.S. equity securities; 19% to developed international equities; 5% to emerging markets equities; 8% real estate securities; 14% to public, investment-grade,

taxable debt securities denominated in U.S. dollars; 4% to inflation-linked bonds and 2% to high yielding debt securities.

The **moderate option** seeks to provide moderate growth by investing in a balanced mix of domestic and foreign equity securities, fixed income and real estate-related securities.

Approximately 36% of the fund is allocated to U.S. equity securities; 14% to developed international equities; 4% to emerging markets equities; 6% real estate securities; 28% to public, investment-grade, taxable debt securities denominated in U.S. dollars; 8% to inflation-linked bonds and 4% to high yielding debt securities.

The **conservative allocation option** seeks to provide a conservative to moderate total return by investing in mutual funds that invest primarily in debt securities and, to a lesser extent, invests in equity securities. This option also invests in a funding agreement. Approximately 18% of the fund is allocated to U.S. equity securities; 7% to developed international equities; 2% to emerging markets equities; 3% real estate securities; 32% to public, investment-grade, taxable debt securities denominated in U.S. dollars; 9% to inflation-linked bonds; 4% to high yielding debt securities and

Participant Directed Investment Program

State Sponsored Savings Program: Minnesota College Savings Plan

25% in a funding agreement issued by TIAA-CREF Life (see the Principal Plus Interest Option below for further detail on the funding agreement).

Static Options

- **International Equity Index Option**

This investment option seeks to provide a favorable long-term total return, mainly through capital appreciation. Approximately 80% of the fund is allocated to equity securities of issuers located in developed markets and 20% is allocated to equity securities of issuers located in emerging markets.

- **U.S. and International Equity Option**

This investment option seeks to provide a favorable long-term total return, mainly from capital appreciation, by allocating primarily to a blend of equity and real estate-related securities.

Approximately 60% of the fund is allocated to U.S. equity securities, 24% to equity issuers located in developed markets, 6% to equity securities of issuers located in emerging markets and 10% to real estate-related securities.

- **U.S. Large Cap Equity Option**

This investment option seeks to provide a favorable long-term total return mainly from capital appreciation. All assets of the fund are invested in an S&P 500 index fund.

- **Equity and Interest Accumulation Option**

This investment seeks to provide a moderate long-term total return. Approximately

half of its assets are invested in an equity index fund and the other half in a funding agreement.

- **100% Fixed-Income Option**

This investment option seeks to provide preservation of capital along with a moderate rate of return through a diversified mix of fixed income investments.

Approximately 70% of the fund is allocated to public, investment-grade, taxable bonds denominated in U.S. dollars, 20% to inflation-linked bonds and 10% to a high yield fund.

- **Money Market Option**

This investment option seeks to provide current income consistent with preserving capital.

The money market option converted to a “governmental money market fund” in October 2016. As a result, the Fund is limited to U.S. Government securities and

will invest at least 99.5% of its total assets in cash, short-term U.S. Government securities and/or repurchase agreements collateralized fully by cash or U.S. Government securities.

- **Principal Plus Interest Option**

This investment option seeks to preserve capital and provide a stable return. The contributions into this investment option are invested in a Funding Agreement issued by TIAA-CREF Life. The Funding Agreement provides for a return of principal plus a guaranteed rate of interest and allows for the possibility that additional interest may be credited as declared periodically by TIAA-CREF Life.

As of June 30, 2019, the Minnesota College Savings Plan distribution of assets is shown in Figure 36 and performance is shown in Figure 37.

Participant Directed Investment Program

State Sponsored Savings Program: Minnesota ABLE Plan

The Minnesota ABLE Plan (Achieving a Better Life Experience) is a tax advantaged savings plan designed to help families set aside funds for eligible disability expenses under Section 529A of the Internal Revenue Code. On June 30, 2019, the market value of the Plan was just over \$6.4 million.

Program Structure

The Minnesota ABLE Plan was established to encourage and assist individuals and families to save for the purpose of supporting individuals with disabilities to maintain health, independence, and quality of life. The SBI is responsible for the investment oversight and the Commissioner of the Minnesota Department of Human Services (DHS) is responsible for the overall administration of the Plan. The SBI and DHS have contracted jointly with Ascensus to provide administrative, recordkeeping and investment management services.

Minnesota is one of 17 states in the National ABLE Alliance Program, which is a coalition of States that has partnered to share a Program and Program Manager, while maintaining Member State independence.

Objective

The objective of the Plan is to provide multiple financial options at a low cost. There are seven investment options available, six are Target Risk-Based Options and one is a Checking Account Option. Each of the six Target Risk-Based Options seek to meet a specific investment goal and risk tolerance by investing in multiple underlying investment funds.

Aggressive Option

The aggressive option seeks to provide long-term capital appreciation with very low income potential. This option

has a mixed allocation of 90% stocks and 10% bonds.

Moderately Aggressive Option

The moderately aggressive option seeks to provide long-term capital appreciation with low income potential. The investments are allocated 75% in stocks and 25% in bonds.

Growth Option

The growth option seeks to provide capital appreciation and low current income. The investments are allocated 60% stocks and 40% bonds.

Moderate Option

The moderate option seeks to provide capital appreciation and secondarily provide moderate current income. The investments are allocated 45% stocks and 55% in bonds.

Moderately Conservative Option

The moderately conservative option seeks to provide moderate current income and low capital appreciation. The investments are allocated 30% stocks, 45% bonds, and 25% cash.

Conservative Option

The conservative option seeks to provide substantial capital preservation, limited current income and very low capital appreciation. The investments are allocated 10% stocks, 30% bonds and 60% cash.

Checking Account Option

The Checking Account Option seeks to provide preservation of principal. It invests 100% of its assets in an FDIC-insured checking account.

Overview / Management of Program

Non-Retirement Funds

The State Board of Investment established the various Non-Retirement Funds to provide certain Minnesota public sector entities the opportunity to invest in a U.S. equity fund, a U.S. bond fund, or a money market fund to facilitate the achievement of its investment objectives. The funds are available to those non-retirement entities that are authorized to invest in these asset classes with the SBI. Currently, all or some of these options are available to designated trust funds, local Other Postemployment Benefit (OPEB) trusts, Qualifying Governmental Entities, and other state and public sector entities. Participants may allocate their investments among one or more funds that are appropriate for their needs and are within the rules and eligibility established for the participating entities (Figure 40).

Investment Options

There are a total of three investment options and each one offers different advantages and risks. As of June 30, 2019, participating plans invested a total of \$4.0 billion with the Funds (Figure 39).

Figure 39. Non-Retirement Fund Options

Investment Management

Equity Fund

The equity segment is passively managed by Mellon Investments Corporation and tracks the performance of the S&P 500 Index (see page 111).

Bond Fund

The Non-Retirement Bond Fund is actively managed by Prudential Global Investment Management to add incremental value through sector, security and yield curve decisions (see page 112).

The Assigned Risk Bond Fund is actively managed by RBC Global Asset Management to provide cash for the payment of worker compensation claims (see pages 120-121).

Money Market Fund

The Money Market Fund provides safety of principal by investing in high-quality short-term money market securities. It is managed by State Street Global Advisors (see page 113).

Non-Retirement Program Equity Fund Manager Summary

Mellon Investments Corporation manages the Non-Retirement Equity Fund that is used by various state trust funds such as the Permanent School Fund, Environmental Trust Fund, Assigned Risk Plan, and Closed Landfill Investment Fund. On June 30, 2019, the total market value of the Non-Retirement Equity Fund was \$2.4 billion.

The Non-Retirement Equity Fund is an investment vehicle that provides domestic equity exposure to entities that have received authority to use this vehicle. The types of entities that invest in the Non-Retirement Equity Fund include State and other Trust funds, OPEB funds, and Qualifying Governmental Entities.

Investment Objectives

The investment objective of the Non-Retirement Equity Fund is to track the S&P 500 index. The portfolio is expected to have a realized active risk level relative to the benchmark of 0.2 or less, where active risk is the annualized standard deviation of the Manager's excess returns relative to the benchmark. Over time, the annual return shortfall relative to the benchmark, due to fees and trading expenses, should be no more than 0.1%.

Asset Allocation

This fund provides 100% domestic equity exposure.

Investment Management

In 2017, Mellon Investments Corporation was hired to manage the fund. Prior to Mellon, the fund was managed internally by SBI staff. The strategy replicates the S&P 500 by owning all of the names in the index at the weightings assigned by the index. To maintain appropriate liquidity for daily cash flows, some cash is held in the

portfolio and is equitized by using S&P 500 futures contracts.

Investment Performance

The SBI measures the Non-Retirement Equity Fund against the S&P 500 Index.

For fiscal year 2019, the Non-Retirement Equity Fund matched its benchmark, the S&P 500 Index. Performance results are shown in Figure 41.

Figure 41. Non-Retirement Equity Fund Performance for Periods Ending June 30, 2019

* Actual returns are calculated net of fees.

Non-Retirement Program Bond Fund Manager Summary

Prudential Global Investment Management manages the Non-Retirement Bond Fund that is used by various state trust funds such as the Permanent School Fund, Environmental Trust Fund, and Closed Landfill Investment Fund. On June 30, 2019, the total market value of the Non-Retirement Bond Fund was \$1.3 billion.

Investment Objectives

The investment objectives for the Non-Retirement Bond Fund are to deliver cumulative returns in excess of the Bloomberg Barclays U.S. Aggregate Bond Index, and to manage the level and composition of active risk in the portfolio relative to this benchmark.

Asset Allocation

The composition of the Fund as of June 30, 2019 is shown in Figure 42. At the end of fiscal year 2019, the Non-Retirement Bond Fund had an effective duration of 5.6 years vs. the benchmark duration of 5.7 years and a yield to maturity of 2.7% vs. the benchmark yield to maturity of 2.5%.

Investment Management

In 2017, Prudential Global Investment Management (PGIM) was hired to manage the fund. Prior to PGIM, the fund was managed internally by SBI staff. PGIM is required to adhere to investment guidelines in managing the account. These guidelines give PGIM the flexibility to actively manage the portfolio through duration, yield curve, sector and security selection decisions, while maintaining a maximum five year active risk level of 1.5. PGIM is required to maintain the duration of the portfolio within +/- one year of the index duration. The Fund primarily invests in U.S. government,

corporate, mortgage and structured securities.

Current Positioning

Characteristics of the portfolio as of June 30, 2019 are shown in Figure 43. PGIM has the portfolio duration positioned slightly shorter to the benchmark, and has modestly increased exposure to ABS/CMBS as the relative value outlook in the asset classes improves.

Investment Performance

The benchmark for the Non-Retirement Bond Fund is the Bloomberg Barclays U.S. Aggregate Bond Index, a broad-based index of investment grade, U.S. dollar denominated, fixed rate taxable bonds. For fiscal year 2019 and all other periods, the Non-Retirement Bond Fund outperformed its benchmark. Historical performance results are presented in Figure 44.

Non-Retirement Program

Money Market Fund Manager Summary

State Street Global Advisors manages the Non-Retirement Money Market Fund that is used by various state trust funds such as the Permanent School Fund and Environmental Trust Fund. On June 30, 2019, the total market value of the Non-Retirement Money Market Fund was \$136 million.

The Non-Retirement Money Market Fund is an investment vehicle that provides high quality short-term cash exposure to entities that have received authority to use this fund. The types of entities that invest in the Fund include State and other Trust funds and OPEB funds.

Investment Objectives

The objective of the Non-Retirement Money Market Fund is to provide safety of principal by investing in high quality, short-term securities. The return of the fund is based on the interest income generated by the fund's investments.

Asset Allocation

The fund invests in high quality short-term money market securities.

Investment Management

The Non-Retirement Money Market Fund is managed by State Street Global Advisors, the organization that provides short-term investment management for a substantial portion of the Board's cash reserves.

Investment Performance

The SBI measures the Non-Retirement Money Market Fund against the iMoneyNet All Taxable Money Fund Average.

For fiscal year 2019, the Non-Retirement Money Market outperformed its benchmark, the

iMoney Net All Taxable Money Fund Average. Performance is shown in Figure 45 below.

Figure 45. Non-Retirement Money Market Fund Performance for Periods Ending June 30, 2019

	Annualized			
	1 Yr.	3 Yr.	5 Yr.	10 Yr.
Non-Retirement Money Market Fund*	2.4%	1.5%	0.9%	0.6%
iMoney Net All Taxable Money Fund Average	1.9	1.0	0.6	0.3

* Actual returns are calculated net of fees.

Non-Retirement Program Permanent School Fund

The Permanent School Fund is a trust fund created by the Minnesota State Constitution and is designated as a long-term source of revenue for public schools. Proceeds from land sales, mining royalties, timber sales, lake shore and other leases are invested in the Fund. Income generated by the Fund's assets is appropriated directly to school districts. On June 30, 2019, the market value of the Fund was \$1.5 billion.

Investment Objective

The State Board of Investment invests the Permanent School Fund to produce a growing level of spendable income for school districts within the constraints of maintaining adequate portfolio quality and liquidity.

Investment Constraints

The Fund's investment objectives are influenced by the legal provisions under which its investments must be managed. These provisions require that the Fund's principal remain inviolate. Any net realized capital gains from stock or bond investments must be added to the principal. Moreover, if the Fund realizes net capital losses, these losses must be offset against interest and dividend income before such income can be distributed. Finally, all interest and dividend income must be distributed in the year in which it is earned.

Asset Allocation

In order to produce a growing level of spendable income, the Fund has exposure to equities. The current asset allocation is 50% stocks/48% bonds/2% cash.

Prior to fiscal year 1998, the Permanent School Fund had been invested entirely in fixed income securities for more than a decade. While this asset allocation maximized current income, it limited the long-term growth of the Fund and caused

the income stream to lose value in inflation adjusted terms, over time.

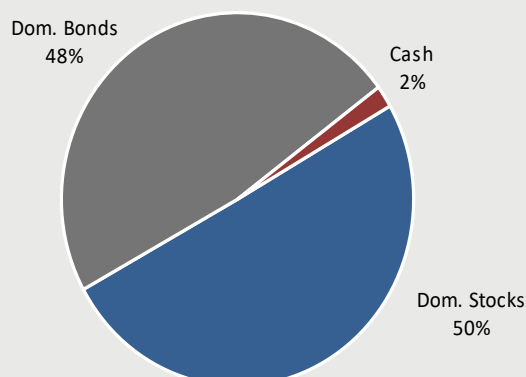

To solve both issues, a proposal to introduce equities to the Fund's asset mix was presented during fiscal year 1997. Since this modification would reduce short-term income and have budgetary implications for the state, the consent of the executive and legislative branches was necessary. It was favorably received by the Legislature and incorporated into the K-12 education finance bill. As a result, the Fund allocation was shifted to a 50% stocks/48% bonds/2% cash allocation during July 1997.

Figure 46 presents the actual asset mix of the Permanent School Fund at the end of fiscal year 2019.

Investment Management

Assets of the Permanent School Fund are invested in the Non-Retirement Equity, Bond and Money Market Funds (see pages 111-113).

Figure 46. Permanent School Fund Asset Mix as of June 30, 2019

Non-Retirement Program Permanent School Fund

Investment Performance

During the fiscal year, the **stock** segment of the Permanent School Fund matched its benchmark, the S&P 500.

The **bond** segment outperformed its benchmark by 0.5 percentage point during the current fiscal year.

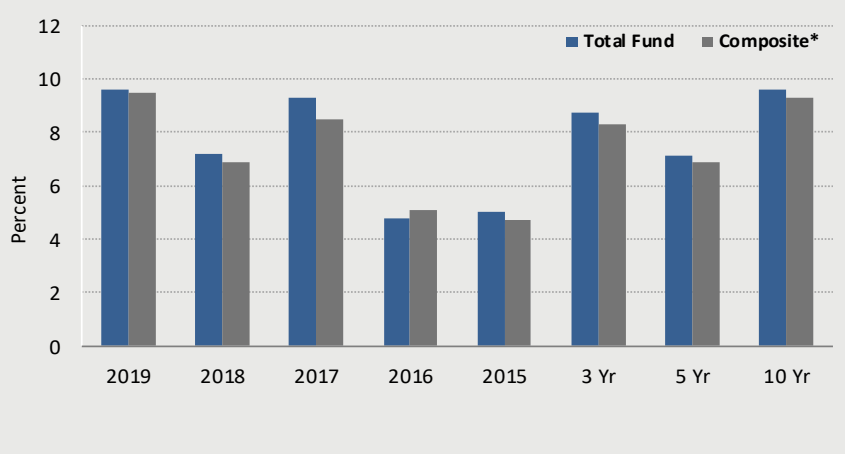

Overall, the Permanent School Fund provided a return of 9.6% for fiscal year 2019, outperforming its composite index by 0.1 percentage point. The Fund outperformed its composite index over the ten year period by 0.3 percentage point.

Total account performance results for the last three, five and ten years are shown in Figure 47.

Spendable income generated by the portfolio over the last five fiscal years is shown below:

Fiscal Year	Millions

Non-Retirement Program Environmental Trust Fund

The Environmental Trust Fund was established in 1988 by the Minnesota Legislature to provide a long-term, consistent and stable source of funding for activities that protect and enhance the environment. On June 30, 2019, the market value of the Fund was \$1.2 billion.

By statute, the State Board of Investment invests the assets of the Environmental Trust Fund. The Minnesota Legislature funds environmental projects from a portion of the market value of the Fund.

Investment Objective

The Environmental Trust Fund's investment objective is long-term growth in order to produce a growing level of funding within the constraints of maintaining adequate portfolio liquidity.

A constitutional amendment passed in November 1998 continues the mandate that 40% of the net proceeds from the state lottery be credited to the Fund through 2025.

The amendment provides for spending 5.5% of the Fund's market value annually. The amendment eliminated certain accounting restrictions on capital gains and losses as well as the provision that the principal must remain inviolate.

Asset Allocation

After the constitutional amendment was adopted in November 1998, SBI staff worked with the Legislative Citizen Commission on Minnesota Resources to establish an asset allocation policy that is consistent with the Commission's goals for spending and growth of the Fund. The allocation positions the Fund for an appropriate long-term growth potential to

meet the Fund's objective to produce a growing level of funding.

The current long-term asset allocation targets for the Fund are:

Domestic Stocks	70%
Domestic Bonds	28%
Cash	2%

Figure 48 presents the actual asset mix of the Fund at the end of fiscal year 2019.

Investment Management

The Environmental Trust Fund is invested in the Non-Retirement Equity, Bond and Money Market Funds (see pages 111-113).

Figure 48. Environmental Trust Fund Asset Mix as of June 30, 2019

Non-Retirement Program Environmental Trust Fund

Investment Performance

During the fiscal year, the **stock** segment matched its benchmark for the fiscal year.

The **bond** segment outperformed its benchmark by 0.5 percentage point during the fiscal year.

Overall, the Environmental Trust Fund provided a return of 10.1% for fiscal year 2019 and outperformed its composite index by 0.2 percentage point during the fiscal year. The Fund outperformed its composite index over the ten year time period by 0.1 percentage point.

Performance results are presented in Figure 49.

Spendable income generated by the Fund over the last five fiscal years is shown below:

Fiscal Year	Millions
2015	\$34
2016	\$46
2017	\$46
2018	\$51
2019	\$51

Non-Retirement Program

Closed Landfill Investment Fund

The Closed Landfill Investment Fund is a trust fund created by the Minnesota Legislature to invest money to pay for the long-term costs of maintaining the integrity of landfills in Minnesota once they are closed. On June 30, 2019 the market value of the Fund was \$97 million.

Investment Objective

The investment objective of the Closed Landfill Investment Fund is to increase the market value of the Fund and to reduce volatility in order to meet future expenditure needs.

Asset Allocation

Prior to September of 2014, the Closed Landfill Fund had been invested entirely in domestic stocks. While this asset class maximized long-term growth opportunities, it did not allocate any assets for capital protection. The Fund is currently invested in a balanced portfolio of domestic stocks (70%) and bonds (30%). Stocks provide the potential for significant capital appreciation, while bonds act as a deflation hedge and provide portfolio diversification. Figure 50 presents the actual asset mix of the Closed Landfill Investment Fund at the end of fiscal year 2019.

Investment Management

Assets of these accounts are invested by the SBI in the Non-Retirement Equity and Bond Funds (see pages 111-113).

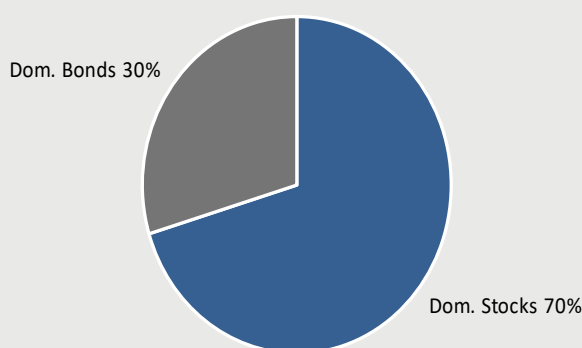

Investment Performance

During the fiscal year, the *stock* segment of the Closed Landfill Investment Fund matched the return of its benchmark, the S&P 500.

The *bond* segment outperformed its benchmark by 0.5 percentage point during the current fiscal year.

For fiscal year 2019, the Fund and for the ten year period, matched its composite benchmark. Performance results are shown in Figure 51.

Non-Retirement Program Assigned Risk Plan

The Minnesota Workers Compensation Assigned Risk Plan was established in 1983 to provide workers' compensation coverage to Minnesota employers rejected by a private insurance carrier. On June 30, 2019, the market value of the Plan's portfolio was \$287 million.

The Assigned Risk Plan operates as a non-profit, tax-exempt entity and is administered by the Department of Commerce. The Plan provides disability income, medical expenses, retraining expenses and death benefits with payments being made either periodically or in lump sum.

Investment Objectives

The SBI recognizes that the Assigned Risk Plan has limited tolerance for risk due to erratic cash flows, no allowance for surplus, and generally short duration liabilities.

Therefore, the SBI has established two investment objectives for the Plan:

- To minimize mismatch between assets and liabilities.
- To provide sufficient liquidity (cash) for payment of on-going claims and operating expenses.

Performance relative to these objectives is measured against a composite index that reflects the asset allocation of the portfolio.

Asset Allocation

The SBI believes that due to the uncertainty of premium and liability cash flows, the Plan should be invested very conservatively.

The **bond** segment is invested to fund the shorter-term liabilities

(less than 10 years) and the common stock segment is invested to fund the longer-term liabilities. The result is a high fixed income allocation which minimizes the possibility of a future fund deficit. The smaller **stock** exposure provides higher expected returns and hedges some of the inflation risk associated with the future liability stream.

The current long-term asset allocation targets for the Plan are as follows:

Domestic Stocks	20%
Domestic Bonds	80%

The asset allocation may fluctuate in response to changes in the liability stream projected by the Plan's actuary and further analysis by the SBI staff. Figure 52 presents the actual asset mix of the Assigned Risk Plan at the end of fiscal year 2019.

Investment Management

RBC Global Asset Management (U.S.) Inc. (RBC GAM-US) manages the bond segment of the Assigned Risk Plan, and the stock portfolio is currently managed in the Non-Retirement Equity Fund.

Bond Segment

RBC GAM-US uses a fundamental approach in managing the portfolio, with a focus primarily on security selection and secondarily on sector analysis. RBC GAM-US has managed the bond portfolio since July 1991.

Stock Segment

The stock segment is structured to fund the longer-term liabilities of the Plan and is managed by BNY Mellon Asset Management North America Corporation in the Non-Retirement Equity Fund.

Investment Performance

Due to the focus on liability matching, the Assigned Risk Plan's investment portfolio is conservatively structured. While active management is utilized, return enhancement plays a secondary role.

The Assigned Risk Plan is measured against a composite index which is weighted to reflect the asset allocation of the Plan:

- The target for the fixed income component is a custom benchmark which reflects the duration target established for the bond segment (approximately three years).
- The target for the equity component is the S&P 500.

During fiscal year 2019, the **bond** segment outperformed its benchmark by 0.1%. The **stock** segment underperformed its benchmark by 0.1 percentage point.

Non-Retirement Program Assigned Risk Plan

Overall, the Assigned Risk Plan provided a return of 7.4% for fiscal year 2019, which was 0.1 percentage point above the composite index. For the ten year period, the portfolio outperformed by 0.6 percentage point.

Historical performance results are presented in Figure 53.

Fixed Income Manager

RBC Global Asset Management (U.S.) Inc.

RBC GAM-US manages the fixed income portfolio for the Assigned Risk Plan. The main objective for the portfolio is to provide cash for the payment of workers compensation claims on the required dates. Because of the uncertainty of premium and liability cash flows, the fund is invested conservatively and is benchmarked to the Bloomberg Barclays Intermediate Government Index.

Equity Manager

Mellon Investments Corporation.
See page 111 for more detail.

Non-Retirement Program

Other Postemployment Benefits (OPEB)

Other Postemployment Benefits (OPEB) are the assets set aside by local units of government for the payment of retiree benefits administered by the Public Employees Retirement Association. On June 30, 2019, the total market value of the OPEB accounts was \$662 million.

Under the provisions of *Minnesota Statutes*, § 471.6175, local units of government, including school districts, may choose Public Employees Retirement Association (PERA) to administer their postemployment health benefits. If PERA is chosen by the local unit, assets of that unit's account are invested by the State Board of Investment (SBI).

Duluth is responsible for the asset allocation decisions in this account and as of June 30, 2019, the asset allocation was the following:

	Actual Asset Mix
Dom. Equity	73.6%
Fixed Income	<u>26.4</u>
Total	100.0%

There are three Non-Retirement investment options available to local OPEB trusts: an Equity, Bond, and a Money Market Fund (see pages 111-113). The SBI does not determine the asset allocation policy for these assets.

As of June 30, 2019, there were 23 entities with OPEB investment accounts invested by the SBI. In total, these accounts represented \$662 million. Staff anticipates that the number of these accounts will increase in the future.

Duluth OPEB

The SBI is required to report the returns provided on assets invested by the City of Duluth for this purpose. Duluth made its first investment with the SBI in July 2007. As of June 30, 2019 the market value of the Duluth OPEB Fund was \$65 million and the returns were as follows:

	1 Yr.	3 Yr.	5 Yr.
Dom. Equity	10.4%	14.2%	10.7%
Fixed Income	<u>8.4</u>	<u>2.9</u>	<u>3.4</u>
Total	9.9%	10.9%	8.6%

***CASH MANAGEMENT
AND RELATED PROGRAMS***

Cash Management and Related Programs 125

THIS PAGE LEFT BLANK INTENTIONALLY

Cash Management and Related Programs

The State Board of Investment manages the cash balances of more than 400 state agency accounts with the objectives of preserving capital, meeting state agency liquidity needs, and providing competitive money market returns. On June 30, 2019, the total market value of these accounts was \$14.6 billion.

Invested Treasurer's Cash (ITC)

Most of the cash accounts are invested in a short-term pooled fund referred to as the Invested Treasurer's Cash Pool. It contains the cash balances of special or dedicated accounts necessary for the operation of certain State agencies and non-dedicated cash in the State Treasury.

Approximately \$272.6 million of assets are in separately managed dedicated accounts because of special legal restrictions. The vast majority of these assets are related to state or state agency debt issuance including debt service reserves and proceeds.

Investment Objectives

The investment objectives for investing the state cash accounts are to preserve capital, to meet the state's cash needs without the forced sale of securities at a loss, and to provide a level of current income consistent with the goal of preserving capital.

Asset Allocation

The SBI generates current income while preserving capital by investing all cash accounts in high quality, liquid, short-term investments. These include U.S. Treasury and Agency issues, repurchase agreements, bankers acceptances, commercial paper, short-term corporates, and certificates of deposit. The

composition of the Pool as of June 30, 2019 is shown in Figure 54. At the end of the fiscal year, the Pool had a current 7-day yield of 2.48% and a weighted average maturity of 156 days.

Investment Management

All state cash accounts are managed by SBI investment staff, and most of the assets of the cash accounts are invested in the Invested Treasurer's Cash Pool.

Investment Performance

The SBI measures the performance of the Invested Treasurer's Cash Pool against a benchmark which reflects the maturity structure of the pool.

For fiscal year 2019, the Treasurer's Cash Pool outperformed its benchmark, the iMoneyNet's All Taxable Money Fund Index, by 0.8 percentage point and matched the 3 month T-Bill return. Performance results are shown in Figure 55.

Figure 54. Invested Treasurer's Cash Fund Distribution as of June 30, 2019*

* Totals may not add due to rounding.

Figure 55. Invested Treasurer's Cash Pool Performance for Periods Ending June 30, 2019

	1 Yr.	Annualized		
		3 Yr.	5 Yr.	10 Yr.
Invested Treasurer's Cash Pool*	2.7%	1.6%	1.2%	0.9%
Custom Benchmark**	1.9	1.0	0.6	0.3
3 month T-Bills	2.3	1.4	0.9	0.5

* Actual returns are calculated net of fees.

** The Treasurer's Cash Pool is measured against the iMoneyNet, All Taxable Money Fund Report Average.

Cash Management and Related Programs

Securities Lending Program

The SBI participates in a Securities Lending Program in which securities held by the SBI on behalf of the retirement systems are loaned to banks and security dealers for a daily fee. These loans are fully collateralized. Currently, the SBI's securities lending activity is undertaken by the SBI's master custodian bank, State Street Corporation. State Street generated additional income for the retirement systems of approximately \$33.8 million during fiscal year 2019.

Securities Repurchase Program

The SBI created the Securities Repurchase Program to help meet the increased needs of some banks throughout the state.

Under the program, the SBI temporarily buys securities such as Treasuries and Agencies from banks under a repurchase agreement (repo). At the end of the agreement period, the securities are returned to the selling banks ("repurchased") and the bank pays the SBI principal and interest.

The transactions are fully collateralized and range in size from \$100,000 to \$2 million per institution. For ease of administration, the program uses the same rates, offering dates and maturity dates as the SBI's CD program, and uses only the cash reserves of the retirement funds.

During fiscal year 2019, the SBI did not enter into any repo

transactions with Minnesota financial institutions.

Excess Debt Reserve

The SBI manages excess debt reserve accounts separate from the ITC Pool in order to align with requirements related to the issuance of general obligation bonds.

When the full faith and credit of the state has been pledged for the payment of the state's bonds, the Minnesota Constitution and statutes require the state to have on hand by December 1 of each year an amount sufficient to pay principal and interest on the state's general obligation debt for the next nineteen months. The Internal Revenue Code establishes rules surrounding debt issuance, debt service, and yield management.

The SBI complies with these rules by splitting the nineteen months of funds set aside for debt service into two accounts: a "bona fide debt service account" to comply with federal regulations and an "excess reserve account," to comply with the Minnesota Constitution and statutes.

The primary investments used for the reserve accounts are U.S. Treasuries and municipal bonds.

As of fiscal year end 2019, the SBI had \$100.2 million invested in the Excess Debt Service Reserve.

***LEGISLATIVE UPDATE AND
INVESTMENT RESTRICTIONS***

Legislative Update and Investment Restrictions 129

THIS PAGE LEFT BLANK INTENTIONALLY

2019 Legislative Update

The State Board of Investment (SBI) proposed an amendment to the SBI's Compensation Plan, which includes position categories and compensation ranges for unclassified investment staff. The SBI previously updated the compensation plan in 2010. The proposed amendment was based on salary ranges presented in a study conducted by McLagan (a subsidiary of the SBI's investment consultant, AON). The updated ranges correspond closely to the median salaries of similarly situated public institutional investors. In addition to updated salary ranges, the SBI proposed several new categories of investment positions to better accommodate current and future needs of the organization. The Minnesota Legislature approved the proposed compensation plan and the plan was signed into law.

The 2019 omnibus pension bill contained mostly administrative provisions related to the Minnesota State Retirement System, Public Employees Retirement System, and Teachers Retirement Association. In addition to pension provisions, the bill contained a provision exempting the pension systems and the SBI from Minnesota Statutes, Chapter 16E, which contains, among other things, requirements to utilize the State of Minnesota IT Services for technology needs. The legislature approved the omnibus pension bill and the bill was signed into law.

Sudan Issues

Minnesota Statutes, § 11A.243 concerns the SBI's investment in companies with operations in Sudan. The law requires the SBI to make its best efforts to identify all "scrutinized companies" in which the SBI has direct or indirect stock holdings or could possibly have holdings in the future.

The statute also requires that the SBI communicate with those companies, and divest stocks over a specified period of time if the companies continue their business activities in Sudan.

The SBI receives a list of scrutinized companies from Vigeo Eiris. Staff sends a list of restricted Sudan companies to investment managers quarterly and has required divestment of holdings in compliance with the law. Staff reports to the Board each quarter on its actions to implement the law.

Iran Issues

Minnesota Statutes, § 11A.244, requires the SBI to take a series of steps to identify companies that do business in Iran, communicate with those companies, and divest stock and bonds over a specified period of time if the companies continue their business activities in Iran.

The SBI retains the firm Institutional Shareholder Services, Inc. (ISS) to provide a list of scrutinized companies to implement the law. Staff sends a list of restricted Iran companies to investment managers quarterly and has required divestment of holdings in compliance with the law. Staff reports to the Board each

quarter on its actions to implement the law.

Tobacco Issues

At its September 1998 meeting, the Board adopted a resolution that required each active and semi-passive equity manager to divest by September 2001 shares of any company which obtained more than 15% of its revenues from the manufacture of consumer tobacco products. Staff notified each active and semi-passive equity manager of the policy.

Since 2001, the SBI has continued to regularly update the list of restricted tobacco companies and communicate this restricted stock listing to the active and semi-passive equity managers according to this divestment resolution.

THIS PAGE LEFT BLANK INTENTIONALLY

***PROXY AND
SHAREHOLDER INITIATIVES***

Proxy and Shareholder Initiatives	133
-----------------------------------------	-----

THIS PAGE LEFT BLANK INTENTIONALLY

Proxies

Shareholder Resolutions

In previous years, the SBI co-sponsored a number of shareholder resolutions. The SBI did not co-sponsor any resolutions during the 2019 proxy season.

As a stockholder the State Board of Investment (SBI) is entitled to participate in corporate annual meetings through direct attendance or by casting its votes by proxy. Through proxy voting, the Board directs company representatives to vote its shares in a particular way on resolutions under consideration at annual meetings. These resolutions range from issues involving the election of corporate directors and ratification of auditors to matters such as merger proposals and corporate social responsibility issues. In effect, as a shareholder the SBI can participate in shaping corporate policies and practices.

The Board recognizes its fiduciary responsibility to cast votes on proxy issues. Except for the shares held by the international managers, the SBI does not delegate the duty to its external investment managers. Rather, the SBI actively votes all shares according to guidelines established by its Proxy Committee. The Board delegates proxy voting responsibilities to its Proxy Committee which is comprised of a designee of each Board member. The four member Committee meets only if it has a quorum and casts votes on proxy issues based on a majority vote of those present. In the event that it reaches a tie vote or a quorum is not present,

the Committee will cast a vote to abstain.

Proxy Voting Guidelines

The Proxy Committee has formulated guidelines by which it votes on a wide range of corporate governance, social responsibility and environmental issues. Each year the Proxy Committee reviews existing guidelines and determines which issues it will review on a case-by-case basis.

Corporate Governance Issues

The voting guidelines for major corporate governance issues are summarized below:

Routine Matters

In general, the SBI supports management on routine matters such as uncontested election of directors, selection of auditors, and limits on director and officer liability or increases in director and officer indemnification permitted under the laws of the state of incorporation.

Shareholder Rights

In general, the SBI opposes proposals that would restrict shareholder ability to effect change. Such proposals include instituting super-majority requirements to ratify certain actions or events, creating classified boards, barring shareholders from participating in the determination of the rules governing the board's actions (e.g. quorum requirements and the duties of directors), prohibiting or limiting shareholder action by written consent, and granting certain stockholders superior voting rights over other stockholders.

In general, the SBI supports proposals that preserve or enhance shareholder rights to effect change. Such proposals

include requiring shareholder approval of poison pill plans, repealing classified boards, adopting confidential balloting of proxy votes, and adopting anti-greenmail provisions.

Executive Compensation

In general, the SBI supports efforts to have executive compensation linked to a company's long-term performance and to encourage full disclosure of compensation packages for principal executives. Accordingly, the SBI evaluates compensation packages on a case-by-case basis, including compensation agreements that are contingent upon corporate change in control.

Mergers

In general, the SBI supports friendly takeovers and management buyouts. The SBI evaluates hostile takeovers, contested elections of directors, and re-capitalization plans on a case-by-case basis.

Social Responsibility Issues

The voting guidelines for major social responsibility issues are shown below:

Tobacco and Opioid

In general, the SBI supports a variety of tobacco and opioid related resolutions including those that call for corporations to limit their promotion of those products and to report on the risks faced by the company due to those products.

Human Capital Management

In general, the SBI supports proposals that require a company to report or disclose to shareholders company efforts concerning diversity, sexual harassment and human rights.

Proxy and Shareholder Initiatives

Environmental Protection, Awareness, and Climate Change

The voting guidelines for major environmental issues are shown below:

In general, the SBI supports proposals that require a corporation to report or disclose to shareholders company efforts in the environmental arena, seek to improve a company's environmental practices to protect the world's natural resources, or address climate change. Proposals that request the adoption of various environmental policies are evaluated on a case-by-case basis.

Summary of FY 2019 Proxy Proposals

During fiscal year 2019 the SBI voted proxies for approximately 2,000 U.S. corporations.

In 2019, the Proxy Committee continued its focus on environmental, social, and governance (ESG) related shareholder proposals submitted by other shareholders and voted on by the SBI. The average support for environmental and social issues increased from 24% in 2018 to 27% in 2019. While most shareholder proposals fail, several social proposals in 2019 related to opioids, lobbying, and diversity, received majority support. In terms of governance, the 2019 proxy season was notable for the increase in board directors who failed to receive majority support from shareholders. Company boards continue to be majority male. In 2019, 20% of directors and 5% of board chairs for Russell 3000 companies were women.

On the topic of executive compensation, the overall number of advisory votes that did not receive majority shareholder support decreased slightly from 2018 to 2019.

However, the number of advisory votes that had low levels of support (50-75%) increased and a major driver of opposition to re-electing directors was shareholder concern regarding executive compensation. The SBI voted against 70% of proposed executive compensation plans.

In keeping with the trend of the past several years, there was a decline in total number of shareholder proposals submitted to U.S. companies. Part of the decline is attributed to increased investor dialogue with issuers as a means to effect change rather than through a proxy ballot. For example, due to the increase in companies producing climate change related reporting, only one climate proposal asking for a 2-degree scenario analysis went to vote in 2019, down from 21 proposals on the same topic in 2017. In addition, some of the decline could be due to changes in SEC guidance on approving no-action requests that grant a company the ability to exclude a shareholder proposal from its proxy ballot. While the number of environmental and climate related proposals declined, there was a sustained focus on companies to address risks related to sexual harassment and opioids.

Mandate on Northern Ireland

Requirements

The SBI is responsible for implementing certain statutory provisions concerning its

investments in U.S. companies with operations in Northern Ireland. The statute requires the State Board of Investment (SBI) to:

- Annually compile a list of U.S. corporations with operations in Northern Ireland in which the SBI invests.
- Annually determine whether those corporations have taken affirmative action to eliminate religious or ethnic discrimination. The statute lists nine goals modeled after the MacBride Principles.
- Sponsor, co-sponsor and support resolutions that encourage U.S. companies to pursue affirmative action in Northern Ireland, where feasible.

The statute does not require the SBI to divest existing holdings in any companies and does not restrict future investments by the SBI.

Implementation

The SBI uses the services of Institutional Shareholder Services, Inc. (ISS) to monitor corporate activity in Northern Ireland. In June 2019, the SBI held stocks or bonds in 118 of 178 corporations identified by ISS as having operations in Northern Ireland.

Shareholder Resolutions

The SBI did not file any shareholder resolutions for the 2019 proxy season regarding the MacBride Principles. Shareholder activity has been greatly reduced over the last several years as many companies have signed the Principles.

NOTES TO THE FINANCIAL SCHEDULES

JUNE 30, 2019

Financial Report Background:

The State Board of Investment (SBI) is the investment management vehicle for numerous retirement and non-retirement funds. The funds are separated by legal requirements and grouped into four major investment types: the Retirement Funds, the Non-Retirement Funds, the Assigned Risk Plan, and Other Funds Under Management. The SBI's goal is to maximize returns for each investment type given the appropriate level of risk. For each investment type, the funds are further broken down and reported by the entity responsible for the financial accounting and presentation of the funds. The information provided by the SBI is audited in conjunction with the audit of the reporting entities.

Retirement Funds: The Retirement Funds consist of funds administered by Teachers Retirement Association (TRA), Public Employees Retirement Association (PERA), Minnesota State Retirement System (MSRS), and Local Volunteer Fire Relief Associations. A list of plan participants is provided in a schedule beginning on page 142. Comprehensive Financial Reports are prepared by the respective agencies. These reports can be obtained by contacting TRA at (800) 657-3669, PERA at (800) 652-9026, MSRS at (800) 657-5757.

The Supplemental Investment Fund (SIF) is an investment option within the retirement funds that is available to various groups of participants according to state statute. SBI provides a financial schedule on the SIF as required by statute.

Non-Retirement Funds: The Non-Retirement Funds represent investment vehicles for Trusts and OPEBs. A listing of the Trusts and OPEBs is provided in the participation schedule on page 158. The Comprehensive Financial Reports for the OPEBs are prepared by PERA and are available by calling (800) 652-9026. The Comprehensive Financial Reports for the Trusts are prepared by Minnesota Management and Budget and are available by calling (800) 627-3529.

Assigned Risk Plan: The Assigned Risk Plan is a dedicated governmental fund for which the SBI is the investment vehicle for the assets made available for investment. The Comprehensive Financial Reports can be obtained from Minnesota Management and Budget by calling (800) 627-3529.

Other Funds Under Management: The Other Funds Under Management are the assets the State has made available for investment with SBI. The financial statement presented for the Other Funds represent the investment information at the State Board of Investment. The SBI grouped the financial information for the Other Funds into four major categories: Invested Treasurer's Cash, Debt Service, Housing Finance, and Public Facilities. The detailed financial statements, supporting schedules, and further breakdown of Debt Service, Housing Finance, and Public Facilities can be found in the State's Comprehensive Annual Financial Report available from Minnesota Management and Budget at (800) 627-3529.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Financial Reporting: The SBI reporting requirements changed under the legislation passed during the 2012 legislative session. References in *Minnesota Statutes*, Section 11A.07, subdivision 4 and 11A.14, subdivision 14 to fund and participant annual statements prepared in accordance with generally accepted accounting principles were deleted. These requirements were deemed redundant to statements prepared for the State of Minnesota's Comprehensive Financial Statements and those of PERA, MSRS, and TRA retirement systems.

As required by state statute the SBI has prepared schedules for the SIF, a schedule of participation for all pooled investments, and a schedule of external manager fees.

Authorized Investments: *Minnesota Statutes*, Section 11A.24 authorizes investments to obligations and stocks of the U.S. and Canadian governments, their agencies and their registered corporations; short-term obligations of specified high quality; international securities; participation as a limited partner in venture capital, real estate or resource equity investments; and participation in registered mutual funds.

Security Valuation: All securities are valued at fair value except for U.S. Government short-term securities and commercial paper, which are valued at fair value less accrued interest. Accrued short-term interest is recognized as income as part of "Short-Term Gain". For long-term fixed income securities, SBI uses the Financial Times Interactive Data Services valuation system. This service provides prices for both actively traded and privately placed bonds. For equity securities, SBI uses a valuation service provided by Reuters. The basis for determining the fair value of investments that are not based on market quotations may include audited financial statements, analysis of future cash flows, and independent appraisals.

Recognition of Security Transactions: Security transactions are accounted for as of the date the securities are purchased or sold.

Income Recognition: Pool dividend income is recorded on the ex-dividend date. Pool interest and dividend income are accrued monthly. Short-term interest is accrued monthly and is presented as "Accrued Short-Term Gain."

Amortization of Fixed Income Securities: Premiums and discounts on fixed income purchases are amortized over the remaining life of the security using the "Effective Interest Method."
