EXECUTIVE DIRECTOR HOWARD J. BICKER

STATE OF MINNESOTA STATE BOARD OF INVESTMENT

Room 105, MEA Building 55 Sherburne Avenue Saint Paul 55155 296-3328

The State Board of Investment is pleased to submit its 1985 annual report. Fiscal year 1985 was a successful period for the Board. The funds under management earned returns surpassed only once in the last decade.

The Basic Retirement Funds produced a total rate of return of 26.8%. The asset allocation policy established by the Board is designed to allow the Basic Funds to take full advantage of the superior long-run returns available in the capital markets. Every year cannot be respected to yield such impressive results. Nevertheless, the Board is confident that its asset allocation policy and investment management structure will result in continued superior long-run returns for the Basic Funds.

The Post Retirement Investment Fund also performed well in fiscal year 1985. The earnings generated by the Post Fund resulted in a 7.9% benefit increase for its participants, well in excess of the inflation rate. The Post Fund benefited from the high inflation-adjusted yields available in the bond market and the sizable increase in common stock prices that occurred in 1985.

After implementing many fundamental changes in the management of the retirement funds in recent years, the Board devoted much of 1985 to a consolidation and refinement of its investment program. However, several significant developments took place, including: the preparation of needs and objectives analyses for the Post Fund and the Permanent School Fund; the construction of a dedicated bond portfolio for the Post Fund; the reorganization of the Basic Funds' active equity manager group; and, continuing investments in real estate and venture capital.

The Board looks forward to continuing the improvement of the investment management of its funds. It is the Board's hope that its annual report facilitates that process by clearly communicating the investment objectives, management structure, and performance of Minnesota's public pension and trust funds.

Sincerely,

Howard J. Bicker Executive Director

INTRODUCTION

All investments undertaken by the State Board of Investment are governed by the common law prudent person rule and other standards codified in Chapter 11A of the Minnesota Statutes. The prudent person rule requires all members of the Board, Investment Advisory Council, and investment staff to "...act in good faith and exercise that degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived therefrom."

In addition to the prudent person rule, the Minnesota Statutes contain a specific list of asset classes available for investment, such as stocks, bonds, short term securities, real estate, venture capital, and resource programs. The statutes prescribe the percentage of fund assets that may be invested in each specific class and contain specific restrictions to ensure the quality of the investments.

Within the requirements established in state law, the State Board of Investment, in conjunction with the Investment Advisory Council and investment staff, sets the asset allocation targets among stocks, bonds, cash, and alternative equity investments for each fund under management. The asset allocation is based on each fund's specific needs and objectives and thus may differ substantially from fund to fund. In addition, the Board determines the most appropriate investment management structure for each fund, structures which may include the use of external money managers and/or the internal investment staff.

In recent years, the Board, Investment Advisory Council, and staff have conducted comprehensive analyses of the investment needs and objectives of the Basic Retirement Funds, the Post Retirement Investment Fund, and the Permanent School Fund. These analyses have focused on the selection of an appropriate asset mix and investment management structure to achieve the funds' desired goals. The results of these studies represent the "roadmap" by which the Board manages these funds. In the near future, the Board plans to commence a study of the needs and objectives of the Supplemental Investment Fund.

The body of this annual report is divided into separate discussions of each of the funds under the Board's management. Each section describes the particular fund's objectives, asset mix and management structure, and performance. The remainder of the annual report contains statistical and accounting data on the Board's managers and funds.

BASIC RETIREMENT FUNDS

The Basic Retirement Funds are the pension assets of the currently employed participants in six major statewide retirement plans:

Teachers Retirement Fund	\$	51,508	million
Public Employees Retirement Fund		1,083	million
State Employees Retirement Fund		765	million
Public Employees Police and Fire	Fund	277	million
Highway Patrol Retirement Fund		54	million
Judges Retirement Fund		4	million

POST RETIREMENT INVESTMENT FUND

The Post Retirement Investment Fund is composed of the reserves for retirement benefits to be paid to currently retired employees by seven plans. Permanent retirement benefit increases are permitted based on excess earnings from dividends, interest, and net realized capital gains.

MINNESOTA SUPPLEMENTAL INVESTMENT FUND

The Minnesota Supplemental Investment Fund includes the assets of the state deferred compensation plan, supplemental benefit arrangements, various retirement programs for local police and firefighters, and the unclassified employees of the state. Participants have a choice among four separate accounts with different investment emphases as authorized by law:

Income Share Account -	a balanced portfolio of stocks and bonds
Growth Share Account - Fixed Return Account -	a portfolio of common stocks a portfolio of short-to- intermediate debt investments
Bond Account -	a portfolio of intermediate maturity debt investments

MINNESOTA VARIABLE ANNUITY FUND

The Variable Annuity Program is an investment option concentrating on common stocks which formerly was offered to members of the Teachers' Retirement Association. It is not available to new members.

STATE CASH ACCOUNTS

These accounts are composed of short-term investments maturing within three years. They include the Invested Treasurers Cash Fund, transportation funds, and various miscellaneous cash accounts.

PERMANENT SCHOOL FUND

The Permanent School Fund is a trust established for the benefit of Minnesota schools.

The \$3.7 billion Basic Retirement Funds are composed of the retirement assets for currently employed participants in six major statewide retirement funds. The graph on the preceding page identifies the individual statewide retirement funds which comprise the Basic Retirement Funds. The Funds serve as accumulation pools in which the pension contributions of public employees and their employers are placed during the employees' years of active service. Approximately 250,000 public employees are participants in the Basic Retirement Funds.

INVESTMENT OBJECTIVES

The fundamental goal governing the investment of the Basic Retirement Funds is to earn total rates of return which, over the long-run, fund promised pension benefits at the lowest cost to the employers and employees. In setting the asset mix among stocks, bonds, and other investment alternatives, the Board pursues this fundamental goal by establishing three broad investment objectives. The first objective is to protect the principal of the Funds against a financial catastrophe which would result from a massive deflation or hyperinflation. The second is to control long-term total portfolio return volatility. Finally, the Board seeks to earn the highest possible inflationadjusted return, subject to the first two objectives.

Based on the adequate funding levels and participant demographics of the Basic Retirement Funds, the investment time horizon of the Funds is long, in excess of twenty years. This time horizon allows the Board to focus on the maximization of the long-term total rate of return, within the constraints described above, as its primary objective. The Board pursues control of near-term portfolio volatility and the generation of current income only as secondary objectives.

ASSET ALLOCATION

÷ .

The choice of a long-run allocation of assets among common stocks, bonds, cash equivalents, and alternative equity investments can have a dramatic impact on investment results. In fact, asset allocation decisions quite frequently overwhelm the impact of individual security selection within a total portfolio.

Based on the Basic Retirement Funds' investment objectives, the Board has adopted the following long-term asset allocation (i.e., policy portfolio) for the Funds:

BASIC RETIREMENT FUNDS 1985 FISCAL YEAR END ASSET MIX

Common Stocks	60.0%
Fixed Income	25.0%
(bonds and cash equivalents)	
Real Estate	10.0%
Resource Funds	2.5%
Venture Capital	2.5%

The graph on the preceding page presents the asset allocation of the Basic Retirement Funds at the end of the 1985 fiscal year. Historical data on the Funds' asset mix over the last five years are displayed in the graph on page 8 and the table on page 9.

The majority of the Funds' assets are invested in common stocks. This large allocation reflects the long investment time horizon of the Basic Retirement Funds and the advantageous long-term risk-return characteristics of common stocks. Further, the Funds' emphasis on maximizing total returns, as opposed to current income, is consistent with the capital gains orientation While this strategy may result in a higher of common stocks. level of total portfolio return volatility than more conservative, higher fixed income allocation strategies, the Board anticipates that additional returns will more than compensate for the increased volatility over the long-run.

The fixed income component of the Funds is utilized as a deflation hedge and as a means of dampening long-term portfolio return volatility. In the event of a major deflation, only high quality bonds will protect principal as well as generate sizable capital gains. Fixed income assets serve as a diversifying element in the total portfolio, moderating return volatility, and in addition, satisfying Minnesota statutes that limit equity investments to 75% of the total fund.

Alternative equity investments, such as real estate and resource funds, provide an inflation hedge that financial assets, such as stocks and particularly bonds, cannot offer. Hard assets can be expected to appreciate in value at least at a rate equal to inflation. Thus, by holding positions in these investments, the value of the total fund can be protected against catastrophic losses in the event of a sustained high inflation. Moreover, alternative equity investments, including venture capital, offer historically attractive returns. They also add diversification to the total portfolio, helping to prevent excessively volatile long-run returns.

INVESTMENT MANAGEMENT

Fiscal year 1985 marked the first complete year of total external management for the Basic Retirement Funds. Historically, the Basic Retirement Funds were managed entirely by the SBI's investment staff. However, based on its analysis of the investment needs and objectives of the Basic Retirement Funds, the Board adopted a complete external management structure for the Funds. As a result, fiscal years 1983 and 1984 were

periods of major transition for the Funds, as the shift from internal to external management was implemented.

During fiscal year 1985, the Board refined and consolidated the Basic Retirement Funds' investment management structure. Fixed income managers were retained and funded. In addition, new commitments to real estate and venture capital continued. Further, the contracts of several active common stock managers were not renewed and the active common stock manager group was reorganized.

COMMON STOCKS

The SBI utilizes a two-part approach to the management of the Basic Retirement Funds' common stock portfolio, combining a \$1.6 billion core diversified passive portfolio (i.e., an index fund) with approximately \$700 million in non-diversified actively managed portfolios.

An index fund is a well-diversified portfolio of common stocks designed to match the rate of return performance of a predetermined stock market index. The index fund utilized by the SBI tracks the Wilshire 5000, a broad-based equity market indicator composed of the common stocks of all U.S.-domiciled corporations, for which daily prices are available. In effect, the Wilshire 5000 represents virtually the entire domestic common stock market.

The SBI's decision to utilize an index fund is based on the inherent difficulty of actively managing a multi-billion dollar common stock portfolio. The Board has chosen to accept market returns on a substantial portion of its common stock portfolio through the utilization of an index fund. The SBI seeks abovemarket returns through the active management of the remaining assets. .

The actively managed segment of the Basic Retirement Funds' common stock portfolio is designed to complement the core index fund. With the index fund providing adequate diversification for the Funds' total portfolio, the active managers are expected to add incremental value, over the long-run, through aggressive investment management decisions. To ensure that they maintain highly non-diversified, aggressive postures, the active managers are assigned specific risk and return targets. The targets are discussed on page 15. A summary of the investment styles and portfolio characteristics of each of the common stock managers is included in the Statistical Data Appendix.

BONDS

The Basic Retirement Funds' \$900 million bond portfolio is managed by six external bond managers. The managers' funding in early fiscal year 1985 was the final step in the Basic Retirement Funds' move to total external management. The group of six managers was selected for its blend of investment styles. Each of the managers invests in high-quality fixed income securities and emphasizes active investment decisions. The managers vary, however, in the emphasis they place on interest rate anticipation and in the manner in which they approach their issue selection and sector weighting decisions.

In keeping with the objective of utilizing the bond portfolio as as deflation hedge, the managers are restricted regarding the minimum average life of their portfolios. This requirement is designed to prevent the Basic Retirement Funds' total bond portfolio from assuming an excessively short-lived position and thus, severely diluting its deflation hedge capacity. Further, the bond managers are permitted to hold only high quality (BAA or better) fixed income assets. In addition, to avoid extreme variability in total bond portfolio returns, the maximum average life of the managers' portfolios is also constrained. A summary of each bond manager's investment approach and portfolio characteristics is presented in the Statistical Data Appendix.

CASH EQUIVALENTS

The long-term asset mix of the Basic Retirement Funds does not include an allocation to cash equivalents. Given the longrun objectives of the Funds, a permanent commitment to short-term investments is not appropriate. On the other hand, at any given point it is quite likely that cash reserves will compose five percent or more of the Funds' market value. Cash equivalent holdings are derived from two sources: first, new contributions provided by the retirement funds which have yet to be allocated to a specific long-term asset segment; and second, the external investment managers, who are permitted to hold cash as part of their own individual short-run asset mix strategies.

Cash reserves are invested in a short-term investment fund (STIF) managed by State Street Bank and Trust, the Basic Retirement Funds' master custodian. The STIF is a separate account invested under the same state statutes which guide SBI investment staff's short-term investments.

REAL ESTATE

The SBI has targeted 10%, or \$370 million, of the Basic Retirement Funds for investment in real estate. Under state law, the SBI is authorized to invest in real estate through commingled funds, limited partnerships, and trusts. The SBI does not invest in real estate through direct investments, separate accounts, or individual transactions.

The SBI has adopted a three part program to implement the planned allocation: 30-40% of the real estate portfolio will be invested in open-end diversified commingled funds; 30-40% will be invested in closed-end diversified commingled funds; and, 20-30% will be placed in less diversified, more focused commingled funds.

The objective of the first two parts of the SBI's real estate program is to create a large core portfolio that is broadly diversified by property type, location, and financing structure. The core portfolio is designed to reflect the composition of the aggregate U.S. real estate market and, as such, is expected to earn market returns. The broad diversification of the core portfolio enables the Board to implement the third part of real estate program, the selection of less diversified, special orientation managers. With their more focused approach to real estate management, these funds offer the ability to enhance the return earned by the core portfolio.

During fiscal year 1985, the Board substantially completed the first two parts of the real estate program and made significant progress in implementing the third part. The balance of the real estate portfolio is expected to be put into place in fiscal year 1986 with the selection of additional specialty managers. The Board will continue to review and add new real estate investments to the portfolio as needed to fulfill the target 10% allocation.

The review of prospective real estate managers is conducted by the IAC's Alternative Investment Committee and SBI investment staff with the assistance of the Board's real estate advisor, Evaluation Associates. In their evaluations, the Committee and staff focus on the managers' experience, performance history, and investment strategy.

VENTURE CAPITAL

The SBI has allocated 2.5%, or \$92.3 million of the Basic Retirement Funds to investment in venture capital. Under state law, the Board is authorized to invest in venture capital through limited partnerships and corporations. Like the real estate portfolio, the Board's venture capital portfolio is broadly diversified. It consists primarily of participations in venture capital partnerships and is diversified across three dimensions: location, industry type, and stage of corporate development of individual portfolio companies.

During fiscal year 1985, the Board proceeded in the implementation of its venture capital program, making commitments to six diversified venture capital limited partnerships. The Board anticipates that its current venture capital allocation will be completed in 1986 with commitments to several venture capital and leveraged buyout funds. The Board will make additional commitments in future years as the growth of the Basic Retirement Funds warrants the expansion of the venture capital portfolio.

The search for venture capital managers is conducted by the IAC'S Alternative Investment Committee and SBI investment staff. Venture Economics, the SBI'S venture capital advisor, assists in the selection process. The Committee and staff's venture recommendations are based primarily on the managers' experience, performance history, investment strategy, and diversification potential.

RESOURCE FUNDS

The SBI has allocated 2.5%, or \$92.3 million, of the Basic Retirement Funds' assets for investment in oil and gas partnerships. The Board invests in partnerships structured specifically for tax-exempt investors. These partnerships concentrate their investments in producing properties and royalty interests that are diversified geographically and/or geologically.

The Board added one investment to the Basic Retirement Funds' resource portfolio during the year. The Board chose to participate in an investment managed by Apache Corporation. The Board anticipates making one to two additional commitments in fiscal year 1986 to complete its current allocation to resource investments.

Resource investments are reviewed by the IAC's Alternative Investment Committee and the investment staff. As in the real estate and venture capital reviews, in its assessment of potential resource managers the Committee and staff focus on the managers' experience, performance history, and investment strategy.

A description of each of the alternative equity investments is included in the Statistical Data Appendix.

INVESTMENT PERFORMANCE

RISK-RETURN OBJECTIVES

The Board has adopted performance objectives which are consistent with the needs of the Basic Retirement Funds and realistic in the sense that they are both attainable and measurable. The evaluation of performance outcomes relative to objectives is an integral part of the SBI's investment management system.

Given the long-term investment time horizon of the Basic Retirement Funds, the performance evaluation time period is necessarily long-term as well. Recognizing that excessive attention to performance in the short-run can have a negative impact on investment results, the Board evaluates investment performance over a time horizon of approximately three to five years (roughly corresponding to a typical market cycle). While performance is measured and reviewed quarterly to identify trends and control extreme underperformance, decisions regarding the effectiveness of a particular investment management structure are made over a considerably longer period.

The Basic Retirement Funds' multiple manager configuration requires that investment performance be evaluated on two distinct

levels: the total fund and the individual managers. The use of total fund risk-return targets ensures that long-run strategic decisions which affect the total performance of the Funds are developed and implemented in a manner consistent with their needs. Risk-return objectives for the individual asset managers are designed to ensure that the managers adhere to their assigned investment roles. In addition, the objectives permit evaluation of the value that the managers add to the investment process.

TOTAL FUND RISK-RETURN OBJECTIVES

To a significant degree, the risk level of the total fund is set implicitly when the long-term asset mix (policy portfolio) and investment management structure are determined. Given the adequate funding levels and long-term investment time horizons of the Basic Retirement Funds, the Board has targeted an above average risk posture for the Funds. The Board's objective is to take advantage of the established relationship between risk and return. Higher risk investment strategies have been shown to offer higher long-run returns than lower risk strategies. The Board's risk target is implemented through the long-term commitment of a sizable proportion the Funds' assets to equities and the adoption of an investment management structure which has an aggressive orientation.

The Funds' long-term rate of return performance is evaluated relative to four specific benchmarks. First, based on the Funds! long-term asset mix targets and the historical real returns offered by the various asset classes, the total portfolio is expected to achieve a real rate of return of 5%. Second, the returns produced by the total portfolio are expected to exceed those derived from a composite of asset class market indices, weighted in the same proportion as the Funds' policy portfolio. Because comprehensive data is available for only the stock and bond markets, the composite index is weighted 70% stocks, 30% Third, the Funds' portfolio is expected to outperform the bonds. median return produced by a representative sample of other taxexempt balanced funds. Fourth, the return on the Funds' total portfolio should exceed that of its actuarial assumed return of 8%.

INDIVIDUAL MANAGER RISK-RETURN OBJECTIVES

Two primary long-run risk objectives have been established for the Basic Retirement Funds' equity managers. The first objective is based on each manager's individual investment approach. Each manager (active or passive) is expected to hold a portfolio that is consistent, in terms of risk characteristics, with the managers' stated investment approach. The second objective relates to the managers' levels of diversification. The active equity managers are expected to hold highly nondiversified portfolios, while the index fund manager is expected to hold a well-diversified portfolio. In the short-run, the active equity managers may depart from these two risk targets, as part of their specific investment strategies. The equity managers' returns are evaluated against two standards. The first benchmark is the performance of the Wilshire 5000, representing the equity market. The index fund manager is expected to track the Wilshire 5000's return. The active equity managers, because of their generally riskier portfolios, are expected to produce returns which exceed that of the Wilshire 5000. Second, the equity managers' performances are expected to exceed those of the median manager from a sample of other equity managers with similar portfolio risk characteristics.

The risk of the bond managers' portfolios is constrained in such a way as to ensure that they fulfill their deflation hedge and total fund diversification roles. The bond managers are restricted in terms of the average life (i.e., the durations) of their portfolios and the quality of their fixed income investments.

The bond managers' return objectives are similar to those set for the equity managers. Their returns are expected to exceed those of the Merrill Lynch Master Bond Index, which represents the performance of the bond market. Further, the bond managers are expected to outperform the median manager from a representative sample of other bond managers with similar risk.

At this time, specific performance objectives have not been established for the alternative investment managers. The longterm nature of their investments, a lack of comprehensive data on the returns provided by the real estate, resource, and venture capital markets, and the general unavailability of data on the performance of a universe of individual managers within these asset classes, precludes effective performance evaluation. In markets the future, as for these assets become more institutionalized, the Board hopes to be able to more fully integrate these assets into its performance analysis.

TOTAL FUND RISK-RETURN PERFORMANCE RESULTS

The Board continued to make significant strides toward the attainment of the long-term asset mix targets established for the Major progress was achieved in fiscal Basic Retirement Funds. year 1984 with the construction of the index fund and the hiring of the external bond managers. During fiscal year 1985, the primary activity in this regard centered around the Funds' alternative investment programs. With the Board actively making new commitments to real estate, venture capital and resource alternative investment program the approached managers, completion. Consequently, the overweighting of the fixed income and cash equivalents sections will continue to decrease toward their policy portfolio allocations as the alternative investment managers are funded in the next several years.

Fiscal year 1985 was an outstanding year for the Basic Retirement Funds. Stellar performances by the capital markets provided an environment in which the Funds produced excellent returns. The stock market, as represented by the Wilshire 5000, reached record highs during the period, generating a 31.2% total

*** 50/50 Wilshire 5000/Merrill Lynch Master Bond Index Composite through 6-30-81, 70/30 Wilshire 5000/Merrill Lynch Master Bond Index Composite 7-01-81 through 6-30-85 return for the year. The performance of the bond market was equally buoyant. Interest rates declined steadily throughout the fiscal year, reaching their lowest levels in recent years. Responding to the positive interest rate climate, the bond market, as represented by the Merrill Lynch Corporate and Government Master Index, produced a solid 29.0% total return for the year.

Benefitting from the exceptional capital markets environment, the Basic Retirement Funds' total portfolio generated a 26.8% total return for fiscal year 1985. (Excluding alternative investments the portfolio produced a 28.4% return.) This performance, in striking contrast to that produced in the inhospitable 1984 period, is the Funds' second highest in the last ten years.

On a relative basis, the Basic Retirement Funds' performance surpassed that of three of its four total fund benchmarks. The Funds outperformed the median tax-exempt fund, real rate of return, and the assumed actuarial return targets. The Funds' performance lagged that of the assigned 70/30 stock-bond composite. Performance relative to total fund targets is presented on pages 17-19.

· .

INDIVIDUAL MANAGER RISK-RETURN PERFORMANCE RESULTS

With few exceptions, the external common stock managers have successfully fulfilled the long-term risk objectives outlined for them by the Board. In general, the managers have constructed portfolios consistent with their investment approaches and have maintained appropriate levels of diversification.

From a total return perspective, the aggregate performance of the external active common stock managers improved relative to the previous year. The managers, as a group, outperformed the median manager from a sample of managers with similar risk characteristics. In aggregate, however, the managers underperformed the stock market.

The fiscal year performances of the individual active common stock managers varied widely. Several of the managers performed extremely well, outperforming both the stock market and the median aggressive manager by large margins. However, several of the managers significantly underperformed the returns produced by both of the assigned benchmarks.

4. 1.

This disparity among individual investment results can be explained, in part, by the capital market environment. Although the year was an exceptional period for stocks in general, the environment continued to be extremely difficult for small capitalization, higher volatility, higher growth stocks. In general, the SBI's managers who tend to hold larger capitalization, lower volatility issues (i.e. those with value and rotational orientations) performed well. On the other hand, the Board's growth-oriented managers, for the most part, experienced difficulties during the period. The index fund closely tracked the performance of its assigned target, the Wilshire 5000. Fiscal year returns for the index fund were 31.6%.

Fiscal year 1985 was the first full year of operations for the external bond manager group. During the year, the bond managers fulfilled their assigned long-term risk targets. They invested in high quality fixed income instruments and maintained portfolio durations within the prescribed range.

Like the common stock manager results, the performances of the individual bond managers were mixed. Although a few of the managers produced excellent investment results, the bond managers in aggregate roughly matched the performance of the median similar risk manager and failed to outperform the strong bond market. This result was due, in large part, to the less than market portfolio durations held by the majority of the managers in a declining interest rate environment.

Performance data for the individual managers are presented on pages 22-23.

POST RETIREMENT INVESTMENT FUND

The Post Retirement Investment Fund contains the pension assets of those retired public employees covered by the seven statewide retirement plans (i.e., the Basic Retirement Funds and the Legislative & Survivors Retirement Fund). The assets of the Fund are used to finance monthly annuities paid to retirees. These annuities may be adjusted upwards based on the earnings of the Fund. As of the end of the 1985 fiscal year, the Post Retirement Investment Fund had a market value of \$2.7 billion. As of that date, approximately 44,500 retirees were participants in the Fund.

INVESTMENT OBJECTIVES

Public employees participating in the statewide retirement plans are promised benefits based on their "high five" average salaries and years of service. Upon the employees' retirement, sums of money sufficient to finance fixed monthly annuities are transferred from the accumulation pools to the Post Retirement Investment Fund. In order to support promised benefits, the Fund must "earn" at least 5% on its invested assets. If the Fund exceeds this earnings rate, excess earnings are used to finance permanent benefit increases for eligible retirees.

The SBI pursues two primary investment goals for the Post Retirement Investment Fund: first, to produce annual earnings sufficient to maintain promised benefits at current levels; second, to generate additional earnings which allow benefits to be increased at a rate which compensates, to some degree, for inflation. In order to achieve these two objectives, the Board recognizes that the Post Retirement Investment Fund requires a completely different investment approach than that applied to the Basic Retirement Funds.

The ability of the Post Retirement Investment Fund to maintain current benefit levels and provide future benefit increases is dependent upon its earnings. As specified by statute, earnings for the Fund are defined as interest and dividend income as well as realized equity and fixed income capital gains (or losses). Unrealized capital gains have no direct impact on the benefits paid out to retirees. Unrealized capital gains (or losses) are excluded from defined earnings in order to make benefit payments largely insensitive to near-term fluctuations in the capital markets. As a result, the Fund is not oriented toward long-term total rate of return maximization. Rather, the Board attempts to generate a high, consistent stream of earnings for the Fund that will maintain current benefits, as well as produce increasing benefits over time.

ASSET ALLOCATION

The asset mix of the Post Retirement Investment Fund is designed to generate the sizable, stable earnings stream referred to in the previous section. The Fund's year-end asset mix, as well as its historical asset allocation data, are presented on pages 25-27.

The majority of the Fund's assets are invested in a dedicated bond portfolio. A dedicated bond portfolio is a collection of various maturity, high quality bonds which generate cash flows from income and principal payments that match a specific stream of liabilities. The highly predictable benefits owed to the Fund's retired participants, and the high real interest rates that have existed in recent years, have created an ideal situation to employ a dedicated bond portfolio. Information relating to the construction of the dedicated bond portfolio is contained on pages 53-55.

Fund's dedicated bond Investment The Post Retirement portfolio facilitates the Fund's two the attainment of Most importantly, it ensures that funds objectives. are available at the required times to meet promised benefit The dedicated bond portfolio also earns enough payments. additional interest income to consistently permit a minimum annual benefit increase of 3%. If the Fund's other investments should do well, as has been the case recent years, the Fund can offer eligible retirees even more than this floor benefit increase.

While bonds represent the largest asset class in the Post Retirement Investment Fund's total portfolio, common stocks also play an important role. Common stocks provide the Fund with a source of long-run earnings growth not available from fixed income investments. In recent years, realized gains on common stocks have contributed importantly to the large benefit increases.

Cash equivalents make up the remainder of the Fund's portfolio. These assets provide the Fund with a certain amount of inflation protection, as their yields are highly inflation sensitive. Further, cash equivalents give the Fund the liquidity necessary to meet withdrawals required for benefit payments.

INVESTMENT MANAGEMENT

The Post Retirement Investment Fund is managed solely by the SBI's investment staff. This management structure is employed for three reasons. First, the low turnover, limited discretion nature of the dedicated bond portfolio makes bond management by SBI staff cost effective. Second, with respect to common stock

management, the Fund's equity managers must be concerned with generating current income and avoiding realized losses. Most external investment managers are not used to functioning under the Fund's unique investment requirements. SBI staff, on the other hand, has managed the Fund's portfolio since its inception. Third, the SBI investment staff is viewed as being more closely attuned to the risk-return preferences of the retirees.

BONDS

As described above, the dedicated bond portfolio represents the bulk of the Post Retirement Investment Fund's assets. SBI investment staff constructs the lowest cost portfolio, within established constraints, that produces sufficient cash flows to fund promised benefit payments and maintains adequate quality levels.

The management of the dedicated bond portfolio requires that the statewide retirement systems supply SBI investment staff with forecasts of benefit payments expected to be paid over a thirtyyear horizon. Based upon these forecasts, a computer program generates a list of bonds that will meet these forecasted benefits. SBI staff then attempts to purchase the recommended issues. If these bonds are not available, substitute bonds are purchased. The dedicated bond portfolio is rebalanced annually following the receipt of the benefit projections from the retirement systems.

COMMON STOCKS

11

The focus of the investment staff's common stock management is long-term, value-based stock selection. The strategies implemented by the investment staff are less aggressive than those utilized by the Basic Retirement Funds' external equity managers. As the only common stock manager for the Post Retirement Investment Fund, the investment staff recognizes the diversification requirements of the Fund's stock portfolio. Further, staff is aware of the Fund's need to avoid investment strategies which generate high portfolio turnover and which, at times, could result in sizable realized losses.

The investment staff attempts to identify stocks that have attractive expected returns, yet do not possess significantly high levels of market volatility. The staff uses recommendations generated by quantitative valuation models as the primary source of investment candidates. In addition, selected recommendations of the Board's external equity managers are utilized if they fit the investment goals of the Fund. Based upon the recommendations from these two sources, staff constructs the Fund's equity portfolio within specific diversification turnover and guidelines. Investment staff always maintains a fully invested position in the equity portfolio. Market timing strategies are not utilized.

INVESTMENT PERFORMANCE

RISK-RETURN OBJECTIVES

Because of its focus on generating current income, the risk composition of the Post Retirement Fund's investment portfolio is conservatively structured. The majority of the Fund's assets are invested in high quality bonds. Further, the Fund's equity portfolio maintains a relatively high level of diversification and a moderate level of relative market volatility.

In terms of long-term rate of return objectives, the Fund's investment results are compared to three standards. First, in order to finance promised benefit payments, the Fund must generate a level of interest and dividend income, combined with realized capital gains, which meets the Fund's actuarial assumptions. Second, the Fund is expected to produce additional earnings sufficient to allow benefits to increase at a rate at least one-half of the inflation rate. Third, the total rate of return on the Fund's actively-managed common stock portfolio is expected to exceed the performance of the Wilshire 5000.

RISK-RETURN PERFORMANCE RESULTS

The Post Retirement Investment Fund's total portfolio met all prescribed risk targets during the 1985 fiscal year. The Fund was approximately 60% invested in fixed income assets, with an average quality rating of AAA. The Fund's equity portfolio maintained a slightly above average level of relative market volatility and was consistently well-diversified.

Investment returns for the 1985 fiscal year met all established performance standards. The Fund generated income and realized capital gains in excess of the amount needed to fund promised benefits. The surplus earnings will permit a benefit increase of approximately 7.9%, considerably above the fiscal year 1985 inflation rate of 3.7%. Finally, the Fund's common stock portfolio outperformed its performance standard, the Wilshire 5000. Post Retirement Investment Fund performance data for the most recent fiscal year, as well as the last five years, are presented on pages 32-33.

MINNESOTA SUPPLEMENTAL INVESTMENT FUND

The Minnesota Supplemental Investment Fund is a multipurpose investment program that offers a range of investment options to state and local public employees. The Fund's participants include police and firefighter retirement organizations, state university and community college teachers, state employees, and employees of various units of local government. A wide diversity of investment goals exists among the Fund's participants. The Fund's June 30, 1985 market value was \$287 million.

Most participants in the Supplemental Investment Fund have three different investment options: the Income Share Account, the Growth Share Account, or one of two debt-related accounts, the Fixed Return Account for individuals or the Bond Account for retirement plans. Participants allocate their investments among accounts that are appropriate for their needs, within statutory requirements and rules established by the participating organizations.

INCOME SHARE ACCOUNT

Participation in the Income Share Account is structured similar to a mutual fund. Participants own shares in the Account which are priced monthly on a market value basis. Interest and dividend income is reinvested. Participants' investment returns are measured by changes in the Account's unit value, which in turn is a function of the income and capital appreciation (or depreciation) generated by the securities held by the Account. Participants may buy or sell shares monthly in the Account based on the most recent unit value.

The primary investment objective of the \$144 million Income Share Account is similar to that of the Basic Retirement Funds. The Account seeks to maximize long-term inflation-adjusted rates of return. The Account pursues this objective within the constraints of protecting against disastrous financial environments and limiting long-run portfolio return volatility.

To achieve this objective, the Income Share Account is invested in a balanced portfolio of common stocks and fixed income securities. The Account's policy portfolio calls for a long-term asset allocation of 65% common stocks, 30% bonds, and 5% cash equivalents. Common stocks provide the potential for significant long-term capital appreciation, while bonds provide both a hedge against deflation and the diversification needed to limit excessive portfolio return volatility. The year-end asset mix and historical asset allocation data for the Income Share Account are presented on pages 45-46.

The Income Share Account's investment management structure combines internal and external management. The SBI's investment staff manages the entire fixed income component of the Account's portfolio and approximately four-fifths of the common stock portfolio. The balance of the common stock segment is managed externally.

The SBI investment staff manages the internal portion of the common stock portfolio with a long-term value-oriented approach appropriate for the balanced nature of the Account. The Income Share Account's external manager provides a complementary aggressive investment style. Due to the balanced investment goals of the Account, the percentage of the total portfolio assigned to aggressive equity management has been kept at a relatively low level. During fiscal year, 1985, the external component of the Income Share Account's common stock portfolio was managed by BMI Capital Management. As discussed on pages 56-57, BMI Capital will be one of eleven managers responsible for the management of the Account's external common stock segment during fiscal year 1986.

Similar to the other SBI funds which utilize a multi-manager investment structure, the performance of the Income Share Account is evaluated on two levels: the total fund and the individual manager.

The total fund performance of the Income Share Account is expected to exceed the returns of a composite of market indices weighted in the same proportion as the Account's policy portfolio. In addition, total fund returns are expected to surpass the performance of the median manager from a sample of other balanced tax-exempt funds.

On the individual manager level, the performances of the Income Share Account's external and internal equity managers are expected to exceed the returns produced by two benchmarks: the Wilshire 5000 and the median managers from samples of other equity manager with similar investment characteristics. The internal bond manager is targeted to outperform both the Merrill Lynch Master Bond Index and the median performance among bond managers of similar investment risk.

On a total fund level, during fiscal year 1985 the performance of the Income Share Account exceeded that of the median balanced manager. However, the Account failed to match the performance of the assigned market indices composite.

On an individual level, BMI Capital underperformed both of its performance targets: the Wilshire 5000 and the median manager from a sample of similar risk managers. BMI's performance has been severely hampered by the continued difficult environment for high-volatility, high-growth stocks. In contrast, however, the internal manager, with its large

BOND SEGMENT	-9.2	12.1	36.2	2.3	32.1	22.6	13.4	
M.L. Master Bond Index	-4.2	12.3	28.9	1.7	29.0	19.1	12.7	

capitalization, value-oriented style, significantly outperformed both the Wilshire 5000 and the median manager from a similar risk manager sample. In addition, the Account's internal bond manager produced returns which exceeded both of its performance targets. Performance data for the individual managers and the total fund are presented on pages 36 and 44.

GROWTH SHARE ACCOUNT

Participation in the Growth Share Account is structured precisely the same as the Income Share Account. The primary investment objective of the \$67 million Growth Share Account is to generate above-average capital appreciation. To achieve this objective, over the long-run the Account will hold a large permanent equity commitment. The Account's policy portfolio reflects this commitment. The policy portfolio is weighted 95% common stocks, 5% cash equivalents. The small cash equivalents component represents the normal cash reserves held by the Account as a result of new contributions to the Account not yet allocated to common stocks. To meet its objectives, the Account's asset mix may vary substantially from its assigned policy portfolio at times. Depending on the Account managers' near-term outlook for the capital markets, the Account may invest up to 100% of its market value in stocks or may make a sizeable allocation to cash equivalents. Year end asset mix and historical asset allocation data for the Growth Share Account are presented on pages 45-46.

Because of its sizeable common stock commitment, the Growth Share Account's returns likely will be more variable than those of the balanced Income Share Account. Higher long-run returns from the Growth Share Account's investments are expected to compensate for the additional variability of returns.

The management of the Growth Share Account's common stock portfolio is split equally between internal and external management. Similar to the Income Share Account, the SBI investment staff manages the internal component with a long-term value-oriented approach. The balance of the Account's portfolio is managed by an external manager whose aggressive investment style complements that of the investment staff. Waddell and Reed managed the external common stock component during the most recent fiscal year. During fiscal year 1986, the external component will be managed by the new eleven manager group, as discussed on pages 56-57.

Total fund performance of the Growth Share Account is evaluated relative to the performance of two benchmarks: a 95%/5% stock-cash equivalents composite, which reflects the Account's policy portfolio, and the median manager from a sample of tax-exempt managed equity funds.

The Account's individual managers are expected to outperform the Wilshire 5000. In addition, the external and internal managers are expected to produce returns that exceed those of the median manager from representative samples of other similar risk equity managers.

The Growth Share Account underperformed both of its total fund performance standards during fiscal year 1985. From the individual manager perspective, performance was mixed. Waddell and Reed failed to match the performance of either the Wilshire 5000 or the median manager from a sample of other aggressive equity managers. The SBI investment staff, on the other hand, outperformed both of its assigned performance targets. Individual manager and total fund performance data are presented on pages 39 and 44.

FIXED RETURN ACCOUNT

The Fixed Return Account's investment objective is to generate high levels of current income by investing in debt securities. The Account's sole source of earnings is the interest income produced by its portfolio of securities. Participants experience minimal investment risk because all portfolio assets are held to maturity. Given this structure, there is little likelihood that the Account will realize capital losses (or gains) as a result of changes in the market value of the Account's assets. On June 30, 1985, the Account's market value was \$70 million.

Participation in the Fixed Return Account is structured similar to a money market mutual fund. The Account maintains a uniform value per share. Annual income is used to purchase additional shares in the Account. As currently established, the Account permits participation only by individual public employees as part of their authorized investment options. (Various retirement associations participate in a similar style of investment management through the Bond Account described below.)

The Fixed Return Account is managed entirely by SBI investment staff. Since all portfolio assets are held to maturity, staff provides very cost-effective management for the Account. To achieve the Account's investment objectives staff invests solely in investment grade debt securities (i.e. those rated BAA or above). In addition, staff maintains approximately a two-to-three year maturity target for new investments. The target is designed to earn high levels of interest income, yet guarantee adequate liquidity for the Account.

BOND ACCOUNT

The Bond Account was established by the 1981 Legislature to provide a separate fixed return investment vehicle for police and firefighter retirement organizations. Similar to the Fixed Return Account, the Bond Account is a low risk investment option which earns a high level of current income from quality debt

SUPPLEMENTAL INVESTMENT FUND (Growth Share Account)

TOTAL FUND PERFORMANCE

TOTAL FUND 95/5 Stock/Cash Composite Median Equity-Only Fund	24.9 -11.0	42.7 -7.5 63.3 -7.9 59.2 -8.5	30.1	25.0	13.4 16.8 16.6
EQUITY SEGMENT Wilshire 5000		56.7 -17.9 66.4 -8.6		18.1 25.9	12.7 16.3

securities. The Bond Account is managed solely by SBI investment staff. The Account is managed in a similar manner as the Fixed Return Account. However, the average life of the Bond Account's investments is longer than that of the Fixed Return Account. On June 30, 1985, the Bond Account had a market value of \$5 million.

Participation in the Bond Account is offered to qualified retirement organizations only. Individuals do not participate in this Account. The Account is designed to offer participating organizations a fixed rate of return for a specified period of time. The length of time this guarantee is in effect depends on the average maturity of the Account's investments, usually in the range of six-to-eight years.

Contributions to the Bond Account made by the participating retirement organizations are grouped by year, referred to as a class year. Depending on the available fixed income investment opportunities available at the initiation of a class year, a rate of return is guaranteed on the contributions made by the participants in the class year. This guarantee is in effect for the life of the class. If a retirement organization chooses to withdraw from the Bond Account, all unexpired class years will have their shares redeemed at market value.

MINNESOTA VARIABLE ANNUITY FUND

The Minnesota Variable Annuity Fund is an investment option formerly offered to members of the Teachers' Retirement Association. The Fund was designed as an alternative to the regular Teachers' Retirement Plan. The opportunity to enroll in the Fund is no longer offered to new Association members, although members enrolled prior to the cutoff date may retain their participation in the Fund and continue to make contributions. The June 30, 1985 market value of the Fund was \$120 million.

The investment objective of the Fund is quite similar to that of the Minnesota Supplemental Investment Fund's Growth Share Account. The purpose of the Fund is to provide participants with above average long-run capital appreciation on their investments. This investment objective necessitates a large long-term commitment to common stocks. The Minnesota Variable Annuity Fund is authorized to hold up to 100% of its market value in common stocks. However, the Fund's portfolio may contain a considerable cash equivalent component at any given time, depending on the near-term investment strategies of its managers. Like the Growth Share Account, the Fund's assigned policy portfolio is weighted 95% common stock/5% cash equivalents. The year-end asset mix and historical asset allocation data for the Fund are presented on page 45-46.

Management of the Minnesota Variable Annuity Fund is split equally between external and internal management. The role of the external managers is to provide an aggressive approach complementary to that of the internal investment staff. Peregrine Capital and Lieber & Company provided aggressive equity management for the Fund during fiscal year 1985. During fiscal year 1986, the aggressive equity approach will be provided by eleven external managers with diverse investment styles. The manager group is described more fully on pages 55-56.

The Fund's total performance is expected to surpass the returns of a market indices composite weighted in the same proportion as the Account's policy portfolio. Further, the Fund's total portfolio returns are expected to exceed those of the median manager from a sample of tax-exempt managed equity funds. The Fund's individual managers are expected to outperform the Wilshire 5000 and the median manager from samples of similar risk managers.

During the 1985 fiscal year, the Minnesota Variable Annuity Fund's performance failed to exceed the results of its two total fund performance standards. On the individual manager level, performance varied widely. Peregrine Capital underperformed both of its individual manager performance targets. Peregrine's performance was hindered by the poor environment for smaller capitalization, higher-growth stocks. Lieber and Company's performance lagged that of the Wilshire 5000 but exceeded that of the median manager from a sample of similar risk equity managers by a substantial margin. In contrast, the investment staff, with its long-term value-oriented approach, outperformed both of its performance benchmarks. Individual manager and total fund performance data are presented on pages 43-44.

PERMANENT SCHOOL FUND

• • •

The Permanent School Fund is a trust fund created by the Minnesota State Constitution. The Fund was designed to serve as a long-term source of revenue for public schools. Proceeds from land sales, mining royalties, timber sales, and lakeshore and other leases are invested in the Fund. Income generated by the Fund's assets currently is used to offset state school aid payments. During the 1985 fiscal year, these offsets totaled \$26 million. As of June 30, 1985, the Permanent School Fund had a market value of \$337 million.

INVESTMENT OBJECTIVES

The Investment Board manages the Permanent School Fund to produce a high, consistent level of income that will assist in offsetting state expenditures on school aids. The Fund's investment objectives are influenced the restrictive by accounting provisions under which its investments must be managed. These provisions require that the Fund's principal remain inviolate. Further, any net realized equity and fixed income capital gains must be added to principal. Moreover, if the Fund realizes net capital losses, these losses must be offset against interest and dividend income before such income can be distributed. Finally, all interest and dividend income must be distributed in the year in which it is earned.

These accounting provisions limit the investment time horizon over which the Permanent School Fund is managed. Long-run growth in the Fund's assets is difficult to achieve without seriously reducing current spendable income, and exposing the spendable income stream to unacceptable volatility. The Board, therefore, invests the Fund's assets to produce the maximum amount of current income, within the constraint of maintaining adequate portfolio quality.

The Board maximizes current income by investing all of the Permanent School Fund's assets in fixed income securities. The Board has a strong incentive not to invest in equity assets for the following reasons. First, common stock dividend yields are considerably lower than bond yields. Thus, common stocks generate less current income than bonds. Second, equity prices are highly volatile and at times may produce realized capital losses that will reduce spendable income. Finally, net capital gains become part of the Fund's principal. Therefore, the effect of the volatility of equity prices on the Fund's spendable income cannot be smoothed out by spending past realized capital gains.

ASSET ALLOCATION

Based upon a staff study of the Permanent School Fund's investment needs and objectives, late in the 1985 fiscal year the Investment Board chose to eliminate the Fund's relatively small equity holdings. In early fiscal year 1986, all of the Fund's assets were moved into fixed income securities. The Fund's 1985 year-end asset mix (which still contained equities), as well as its historical asset allocation data, are shown on pages 48-49.

The Permanent School Fund's current investment focus is This situation is necessitated by the Fund's short-term. restrictive accounting provisions. However, the Board believes that the Fund's needs could better be met by a longer-term outlook. Under the current asset allocation, spendable income cannot grow over time. As a result, the value of income produced by the Fund, in inflation-adjusted terms, will gradually decline. hand, a longer-term outlook that includes On the other investments in equity assets could allow the Fund's principal, and hence spendable income, to grow. For a longer-term approach to be implemented, the Fund's accounting provisions will have to be altered. The Board will seek legislative changes in the Fund's accounting provisions to allow effective use of equities in the Fund's asset mix.

INVESTMENT MANAGEMENT

The Permanent School Fund is managed entirely by SBI investment staff. Given the peculiar accounting restrictions of the Fund, it would be extremely difficult for external managers to invest the Fund's portfolio. Typically, money managers seek to earn superior total rates of return (which include income and capital appreciation) through active management. The Fund's emphasis on producing high levels of current spendable income through buy-and-hold investments is not compatible with the investment style of most money managers. In addition, with the move to an all-fixed income portfolio, SBI staff management of the Fund is the most cost-effective approach. The passive nature of the Fund's investment management makes unnecessary the expense associated with external managers.

The Permanent School Fund's bond portfolio is managed primarily through a buy-and-hold approach. New purchases are evaluated in light of prevailing financial market conditions, as well as expectations of near-term changes in those conditions.

INVESTMENT PERFORMANCE

RISK-RETURN OBJECTIVES

The Permanent School Fund's investment current objective is to maximize spendable income, within the constraint of maintaining adequate portfolio quality. From a risk perspective the Fund's portfolio is very conservatively structured, as its target asset mix calls for a full commitment to fixed income securities. The risk assumed by the bond portfolio is influenced by its buy-and-hold investment approach. Subject to current and expected future financial conditions, the Fund will attempt to maximize interest income by investing in longer-term, high yielding investment grade bonds.

From a rate of return perspective, the Fund is not concerned with total rates of return. Market value changes have no effect on the Fund's ability to produce spendable income. Spendable income is affected only to the extent that any securities are sold at losses. Thus, the Fund's return objective is to maintain a high current yield on new investments.

RISK-RETURN PERFORMANCE RESULTS

At fiscal year-end, the Fund's bond portfolio had a duration of 5.8 with an average quality rating of AAA. With yield spreads at low levels and interest rates expected to increase, during 1985 new purchases were constrained to high quality, short-lived issues. Some near-term give-up in yields was made with the expectation that as yield spreads widen and interest rates increase, a lowering of quality and an extension of portfolio maturity would add to portfolio income.

STATE CASH ACCOUNTS

The \$2.1 billion cash assets of State agency accounts, and trust funds are invested to provide a high level of current income. These assets are invested in highly liquid, quality securities which mature within at least 3 years. All cash investments are managed by the SBI investment staff. Short term investments include U.S. Treasury and Agency issues, repurchase bankers acceptances, commercial agreements, paper, and The maturity structure of each certificates of deposit. individual account's portfolio depends on the cash flow needs of the respective account. The largest short-term accounts are the \$1.042 billion Invested Treasurers Cash; the \$455 million Highway Funds; and the \$191 million Debt Service Account.

As part of the cash management program, the SBI administers a securities lending program in which U.S.Treasury and Government Agency securities held by the SBI are loaned to banks and government security dealers for a daily fee. These loans are fully collateralized. The Securities Lending Program has generated approximately \$1.5 million per year in additional income for its accounts.

6. ⁽⁴⁾

The SBI also manages a certificate of deposit (CD) program in which it purchases CD's from Minnesota banks and savings and loan institutions. The Board receives a market rate of return on these investments, utilizing the average secondary CD market rate quoted by the New York Federal Reserve Bank. All investments are fully insured by the Federal Deposit Insurance Corporation or Federal Savings and Loan Insurance Corporation. The Minnesota Certificate of Deposit program provides a reliable source of capital to all Minnesota financial institutions, regardless of size, many of which do not have access to the national CD market. The SBI designed the loan process so that no single institution is favored in the allocation of assets. Since it began in 1980, the CD program has loaned over \$900 million to 365 financial institutions throughout the state.

1985 MAJOR DEVELOPMENTS

DEDICATED BOND PORTFOLIO

In the third quarter of 1984, SBI staff prepared a series of position papers outlining the investment needs, objectives, and management structure of the Post Retirement Investment Fund. These studies discussed the fact that the Post Retirement Investment Fund has two objectives: first, to produce earnings sufficient to finance benefits currently promised retirees; and, second, to produce additional earnings that permit benefits to be increased at a rate which compensates, to some degree, for inflation. The position papers concluded that a dedicated bond portfolio would be an efficient instrument to attain the Fund's objectives.

A dedicated bond portfolio is a collection of high quality fixed income securities that generates cash flows from principal and interest payments which match a specified stream of liabilities. The Post Retirement Investment Fund's liabilities (i.e., promised retirement benefits) at any point in time are fixed and can be calculated easily. As a result, by properly constructing a dedicated bond portfolio, the attainment of the Fund's first objective, producing earnings sufficient to finance promised benefits, can be assured.

A dedicated bond portfolio also can aid in meeting the Fund's second objective: producing benefit increases that compensate, to some degree, for inflation. If the dedicated bond portfolio is large enough, it can produce not only cash flows sufficient to fund promised benefits, but also to finance consistent annual benefit increases.

Staff proposals regarding the Post Retirement Investment Fund and, in particular, the use of a dedicated bond portfolio, were reviewed by the Investment Advisory Council (IAC). The IAC recommended that the SBI approve those proposals, which the Board did at its December 1984 meeting.

Also at its December 1984 meeting, the Board approved the retention of an adviser who would work with SBI staff to implement the dedicated bond portfolio. The role of the adviser is to provide the computer software and technical expertise necessary to both design the dedicated bond portfolio and carry out the required securities trading.

With the assistance of the Board's consultant, Evaluation Associates, the IAC Fixed Income Manager Committee and staff interviewed several potential candidates for the adviser's job. The primary issues discussed with each candidate included: universe of bonds from which the portfolio would be constructed; bond pricing procedures; dedication computer software; procedures

for selecting alternative bonds if originally selected issues were not available; sector, quality, and individual issue weighting constraints; call protection; trading strategy; hedging techniques; bond swaps; experience; and fees. Based on the interviews, the IAC Fixed Income Manager Committee and staff chose Bankers Trust as the adviser.

After reviewing the Post Retirement Investment Fund's existing bond holdings and estimated liability data, Bankers Trust made its recommendations concerning the dedicated bond portfolio's design. Bankers Trust proposed that the portfolio be composed largely of Treasury and Agency bonds, due to the then prevailing historically low yield spreads between corporate and government issues. The firm recommended retaining all corporate bonds then in the portfolio. Where necessary, existing Treasury and Agency bonds would be sold to buy other Treasury and Agency bonds which, when combined with the existing corporate bonds, would produce the cash flows required to meet promised benefit payments.

This proposal had several advantages. First, trading in only government issues served to reduce trading costs. With the low level of yield spreads, very little portfolio income was given up by this strategy. Second, if and when yield spreads widen, the government bonds can be swapped for corporate bonds at a pace dictated only by the availability of attractive trades. Third, the ability to buy and sell government bonds simultaneously minimized interest rate risk exposure.

The process of constructing the Post Retirement Investment Fund's dedicated bond portfolio was greatly facilitated by the Fund's pre-dedication asset mix structure. For several years, the Fund had maintained a large bond commitment. Based on the Fund's perceived objectives, but without a formal study of its cash flow requirements, the size and make-up of the Fund's existing bond portfolio closely approximated that of the desired dedicated portfolio. This situation greatly eased the logistics of the construction process.

The bonds held by the original bond portfolio were not precisely those required by the dedicated bond portfolio. Thus, the dedicated portfolio's construction involved transactions in a large number and dollar volume of securities. However, as noted, the original portfolio was quite similar in composition to the desired dedicated portfolio. As a result, most of the required transactions had the advantage of involving very liquid, similar securities, which greatly reduced transactions costs and the risk of adverse interest rate moves.

In total, approximately \$1.8 billion (at market) in trading took place over the first two months of 1985. The original bond portfolio contained 271 securities, with a year-end 1984 market value of \$1.3 billion. The completed dedicated bond portfolio held 187 securities and had a February month-end market value of \$1.5 billion. The trading process went smoothly. It is not possible to quantify the total trading costs. However, the

54

liquidity of the government bond market permitted the dedicated bond portfolio's transactions to be absorbed with no apparent significant market impact.

The dedicated portfolio will be rebalanced annually based upon actuarial data supplied by the retirement systems. In the interim, new contributions to the Post Retirement Investment Fund temporarily will be placed in Treasury bonds. These bonds, in aggregate, will have a duration approximately equal to the duration of the newly created liabilities. In this way, interest rate risk can be minimized until the annual rebalancing takes place.

MASTER CUSTODIAN

In February, 1985, State Street Bank of Boston was assigned the master custodial duties for the Supplemental Investment Fund and the Minnesota Variable Annuity Fund. A full understanding of this decision requires a brief review of the Board's initial decision to retain State Street Bank as master custodian for the Basic Retirement Funds.

As discussed in the 1984 annual report, a master custodian provides a wide range of investment services. From the Board's perspective several such services are essential: safekeeping of securities; settlement of securities trades; income collection; securities lending; cash management; reporting of transactions and assets held; and, fail float credit.

Master custodial banks have in place the administrative apparatus to handle large multiple-manager pension plans, such as the Basic Retirement Funds and the Supplemental Investment Fund. Developing custodial systems designed to meet the needs of modern pension plans is expensive, both in terms of equipment and personnel. Further, there are vast economics of scale in the master custodian business, as a large client base allows sizable fixed costs to be spread out. Therefore, the largest master custodians are able to offer the most efficient, lowest cost service to large pension funds.

During the summer of 1983, the SBI's search committee, assisted by the Board's consultant, Evaluation Associates, conducted an extensive analysis of the master custodian marketplace. Based on the responses received to its request-forproposal (RFP) and its on-site interviews, the search committee recommended that State Street Bank be hired as the SBI's master custodian.

The search committee considered five of the top master custodian banks in the United States, along with three large Twin Cities banks. In the final analysis, the committee believed that State Street provided the best combination of experience, size, personnel, accurate and timely reporting, and dedication to client service. The bank was the originator of custody services to mutual funds in the 1920's. It was an early participant in the master custodian business in the 1970's. State Street is the second largest master custodian bank in the U.S. The search committee was impressed not only by the number, but also by the quality of persons who would be assigned to the SBI's account. The bank's recordkeeping and reporting capabilities were viewed favorably in terms of accuracy and timeliness. Finally, the master custody business is by far the bank's most important profit center. Thus, the bank appears committed to maintaining its leading role in the rapidly changing master custody business by continually making the sizable required investment in people and equipment.

The Board approved the hiring of State Street Bank as master custodian for the Basic Retirement Funds, effective November 1, 1983. The conversion process from the Board's previous custodial arrangements to State Street went smoothly. Over the next twelve months, State Street fully satisfied the Board's expectations by providing complete, accurate and timely custodial service. On a number of occasions, the bank handled potentially difficult situations without complications. The most prominent of these was the creation of the SBI's index fund, which entailed a massive trading volume. Further, the net cost to the Board of State Street's services proved to be far lower than expected. State Street's securities lending program provided a significant income offset to its fees. For the calendar year 1984, total fees, after securities lending income, totaled only \$102,000.

Based upon the efficient, low cost custodial service provided by State Street to the Basic Retirement Funds, the Board chose to move custodial responsibility for the Supplemental Investment Fund and Minnesota Variable Annuity Fund to State Street. These funds utilize a multiple-manager structure akin to the Basic Retirement Funds. The previous custodial arrangement with First National Bank of St. Paul was not capable of handling the complex needs of these funds. Further, the Supplemental Investment Fund must calculate unit values for its various accounts based on month-end asset values. State Street Bank is able to deliver unit values in four business days, where previously it had taken ten business days. This quicker unit value calculation benefits participants in the Fund who are making withdrawals.

State Street's master custodial responsibilities for the two additional funds began effective February 1, 1985. To date, the service provided has been of the same high quality and low cost provided to the Basic Retirement Funds.

EXTERNAL EQUITY MANAGER CHANGES

The active equity manager component of the Basic Retirement Funds underwent significant modifications at the end of the 1985 fiscal year. The Board acted to redress an imbalance in management styles that existed within the active equity manager pool. At the same time, the Board chose to end its relationship with several poorly performing managers in whose investment operations the Board no longer had confidence. The Basic Retirement Funds active equity pool, since its inception, had contained managers with an aggregate bias towards growth-oriented, smaller capitalization stocks. This bias was a result of the original manager selection process which had emphasized the retention of managers with strong historical performance track records. Managers that had performed well in the late 1970's and early 1980's generally emphasized common stock investments with the following characteristics: high equity beta, low yield, high P/E, small capitalization, and particularly, a growth orientation. As a result, the selection process produced a group of managers with an emphasis on "growth" stocks.

A growth bias is not necessarily undesirable. There have been periods of time when growth managers have done quite well. However, during other periods growth managers have performed poorly relative to the market averages. The existence of a style bias adds to the volatility of the aggregate equity manager portfolio.

2 -

The Board chose to alter its active equity manager composition in order to reduce the growth bias of the combined group. Four managers were terminated: Loomis Sayles, Siebel Capital, Herbert R. Smith, and Trustee & Investors. With the exception of Siebel Capital, these managers used an investment approach which focused on growth stocks.

At the same time several other changes were made to the active equity manager pool. Four managers, BMI Capital, Lieber & Co., Peregrine Capital, and Waddell & Reed were added to the pool. These managers had previously managed equity assets for only the Supplemental Investment Fund and the Minnesota Variable Annuity Fund. In addition, Peregrine Capital was asked to shift its investment approach from a growth style to a defensive, contrarian style (the firm offers both investment styles). Further, internal SBI staff was temporarily retained to manage a portfolio with a low P/E, value investment style. The internal manager will be replaced in the future when an additional external manager with a similar investment style is retained.

Besides balancing the Basic Retirement Funds' active equity approach and removing several poorly performing managers, the changes in the active equity pool have another advantage. They improve the administrative efficiency of the external equity manager program. All of the Board's external active equity managers now operate within one pool. The Basic Retirement Funds, Supplemental Investment Fund, and Minnesota Variable Annuity Fund purchase participation units in this pool and share proportionately in its results.

ALTERNATIVE INVESTMENT FUNDING

REAL ESTATE

. . . .

In the first phase of its three-part real estate program, the SBI committed a total of \$120 to three open-end commingled funds designed specifically for institutional investors. The funds are managed by the Aetna, Equitable, and Prudential Insurance Companies. In 1984, the SBI initiated the second phase of the program with commitments of \$75 million to the closed-end fund managed by the Rosenberg Real Estate Equity funds (RREEF) and \$20 million to the closed-end fund managed by Heitman Advisory Corporation.

. .

During the most recent fiscal year, the SBI made substantial progress in the implementation of the third part of the program. After an extensive review of special-orientation managers, the Investment Advisory Council's Alternative Investment Committee recommended, and the Board approved, commitments of \$40 million to Trust Company of the West Fund III and \$20 million to State Street Bank and Trust Fund III. Trust Company of the West and State Street specialize in the use of innovative investment vehicles such as convertible mortgages, participating mortgages and leverage to maximize real estate returns. The Basic Funds! real estate program is expected to reach its target allocation during fiscal year 1986 with the selection of additional closedend fund and specialty managers. The Board will continue to review and add new real estate investments in the future as the allocation increases.

VENTURE CAPITAL

The SBI initiated the Basic Funds' venture capital program in 1984 with commitments of \$10 million to Northwest Venture Partners, a Minnesota-based diversified venture capital limited partnership, and \$25 million to the Kohlberg, Kravis, and Roberts 1984 Leveraged Buyout Fund. During fiscal year 1985, the SBI proceeded in the implementation of the program, making a total of \$52.5 million in commitments to the following six venture funds: First Century III (Smith Barney); Summit Ventures; Data Science Ventures IV; Matrix Partners II; Inman and Bowman, and the Allied Venture Partnership. The partnership selections were based primarily on the venture managers' extensive venture capital experience and their ability to contribute to the diversification of the aggregate Basic Funds' venture portfolio. The SBI anticipates that it will substantially complete the target allocation in 1986 with commitments to several venture capital and leveraged buyout funds. New venture investments will be added to portfolio as needed to maintain the target 2.5% allocation.

RESOURCE FUNDS

The SBI's commitment of a total of \$22 million to two oil & gas partnerships sponsored in 1981 and 1983 by First Reserve represented the inception of the Basic Funds' resource program. In 1984, the Board committed an additional \$30 million to an investment managed by Apache Corporation. No new resource investments were made during the most recent fiscal year. However, the Board anticipates that it will make one to two additional resource investments in fiscal year 1986. The Board expects to reach the current target allocation for resource investments in fiscal years 1986-1987.

LEGISLATIVE REVIEW

The SBI's statutory investment authority was not significantly altered by the 1985 legislature. The Board's housekeeping bill contained the following changes in investment statutes:

- 1. Authorized the Minnesota Supplemental Investment Fund, the Minnesota Variable Annuity Fund, and the Permanent School Fund to participate in the Combined Investment Funds. The Combined Investment Funds are pools of assets invested in equities, fixed income securities, real estate, and other asset classes utilized by the Board. The Combined Investment Funds provide increased flexibility and efficiency of investment management to the participating pension plans.
- 2. Permitted the assumed interest rate for the Fixed Return Account to be set more than once a year. More frequent changes in the assumed interest rate allow for a more accurate valuation at the time assets are withdrawn from the Account.
- 3. Clarified the language authorizing the Board to invest in debt securities of federal agencies.
- 4. Simplified restrictions on the Board's investments in corporate debt obligations. Previously, these investments were restricted by a complex set of financial criteria. Eligible securities are now identified by the ratings supplied by nationally recognized debt rating services.
- 5. Expanded the Board's authority to allow investments in guaranteed insurance contracts. It also expanded eligible collateral for repurchase agreements to include letters of credit.

PROXY VOTING

As a stockholder, the State Board of Investment is entitled to participate in corporate annual meetings, through direct attendance or casting its votes by proxy. Through proxy voting, the Board directs company representatives to vote its shares in a particular way on resolutions under consideration at annual meetings. In effect, as a shareholder the State Board of Investment can participate in shaping corporate policies and practices.

Resolutions prepared at annual meetings range from routine issues, such as those involving the election of corporate directors and ratification of auditors, to non-routine items involving such matters as merger proposals and corporate social responsibility issues. In order to identify the "non-routine" resolutions, the State Board of Investment utilizes the Investor Responsibility Research Center (IRRC), a non-partisan service which provides information and analyses of the issues under consideration at corporate annual meetings.

Due to the administrative difficulty involved in voting the proxies of over 1100 corporations owned by the Basic Retirement Funds, all routine matters are automatically voted in accordance with the recommendations of corporate management. This process is administered by the SBI's master custodian, State Street Bank and Trust Company. All non-routine issues highlighted by IRRC are screened by State Street and voted directly by the State Board of Investment. In addition, the shares of the approximately 150 companies owned by the Post Retirement Fund, the Supplemental Investment Fund, the Variable Annuity Fund and the Permanent School Fund are voted directly by the Board.

All non-routine issues are reviewed by a committee on proxy voting appointed by the State Board of Investment. The committee votes on the resolutions in accordance with the SBI's statement on investment responsibility (see page 61).

RESOLUTION

REGARDING ADDITIONAL INVESTMENT CRITERIA

. 1

AND THE VOTING OF PROXIES

WHEREAS, the Investment Board recognizes that when performing their duty of investing the trust funds (pension and other funds) for which they are custodian, their primary responsibility is the prudent and responsible investment of the assets of the funds for the economic benefit of the beneficiaries of the funds; and

WHEREAS, it has become increasingly apparent that the standards of prudence and responsibility may, in limited circumstances, be considered in light of the social and environmental policies of the corporation in which the State owns or contemplates owning an investment; and

WHEREAS, investing in an enterprise which is flagrantly violating the law or stubbornly ignoring public policy may constitute implicit endorsement of those policies, and the Investment Board is of the opinion that government may abrogate its duties to its citizens by offering such implicit endorsement; and

WHEREAS, it is the Investment Board's opinion that corporations which do not take the welfare of society and its members into consideration may jeopardize their own financial stability and, in today's world, risk depreciation of their investment value.

NOW, THEREFORE, BE IT RESOLVED that the following guideline be adopted: Consistent with prudent and responsible investment policy, the Investment Board shall not knowingly invest or maintain holdings in those corporations which are in flagrant violation of the law or in stubborn disregard of the social welfare of the society, or do not recognize environmental responsibilities in their corporate actions, and are not taking reasonable steps to overcome the situation; and

BE IT FURTHER RESOLVED that, consistent with prudent and responsible investment policy, all or some of the following measures may be instituted when a corporation is found by the Board to be in violation of the aforementioned guideline:

- 1. The Investment Board will discuss the problem with a representative of the corporation in question for the purpose of:
 - a. expressing the view that, as a shareholder, the State of Minnesota is opposed to such policies.
 - b. being informed as to the progress underway in ameliorating the problem.

61

- 2. If voting stock in such corporation is held by trust funds administered by the Investment Board, it may be voted in a manner calculated to ameliorate the existing problem.
 - a. While it is recognized that it is the Investment Board's responsibility to vote all stocks, the Investment Board may solicit recommendations from its staff concerning the manner of voting stock of a corporation in violation of the guidelines set forth above.
 - b. When deemed necessary to protect the State's interest in the fund and in grave cases, the Investment Board may institute procedures for a shareholder's proposal for the purpose of committing the corporation toward correcting the policy in question.
- 3. In the instance that no recourse mentioned above is available and/or it is shown that the corporation is not taking steps reasonably calculated to ameliorate the problem in question within a reasonable period of time, the Investment Board may sell the State's investment in the corporation, if sale is consistent with sound investment policy for the affected funds.

STATISTICAL DATA APPENDIX

EXTERNAL MANAGER INVESTMENT PHILOSOPHIES

FRED ALGER

Fred Alger searches for companies expected to experience aboveconsensus earnings gains. These earnings gains may be either cyclical or secular. The firm focuses on two types of companies. First, companies whose products are expected to produce high consistent unit volume growth rates. Second, companies undergoing a positive life cycle change not yet fully recognized by the market. The proportion of the total portfolio invested in these two types of companies varies over time. On average, however, the high unit growth companies tend to dominate the total portfolio. Fred Alger is not an active market timer, usually maintaining a fully invested position.

ALLIANCE CAPITAL

Alliance searches for companies likely to experience high rates of earnings growth, on either a cyclical or secular basis. Alliance has invested in a wide range of growth opportunities from small, emerging growth to large, cyclically sensitive companies. There is no clear distinction on the part of firm as to an emphasis on one particular type of growth company over another. However, the firm's decision-making process appears to be much more oriented toward macroeconomic considerations than is the case with most other growth managers. Accordingly, cyclical earnings prospects, rather than secular, appear to play a larger role in terms of stock selection. Alliance is not an active market, rarely raises cash above minimal levels.

BMI CAPITAL

BMI's investment approach focuses on companies expected to exhibit strong sustained earnings gains. BMI attempts to identify two types of "growth" companies: first, misperceived companies that are in the process of undergoing dynamic changes that will cause them to produce materially higher earnings over the near-term; and second, small-to-medium sized companies that exhibit the potential for rapid future earnings growth. The weighting of the two types of growth companies within the firm's portfolio will vary over time depending upon economic and financial conditions. Generally, however, the misperceived companies will make up the majority of the portfolio. On the other hand, the smaller high growth companies tend to dominate the portfolio's risk characteristics. The firm concentrates almost exclusively on stock selection, only rarely raising cash to significant levels.

BEUTEL GOODMAN

Beutel Goodman searches for companies whose stock prices are low in comparison to estimated tangible book value or companies whose P/E's are low in relation to earnings quality and expected earnings growth. This "value" investment approach is contrarian and defensive by nature, exhibiting less volatility than investment styles focusing on growing earnings. Beutel Goodman is not an active market timer and is almost always fully invested.

FORSTMANN LEFF

Forstmann Leff is a classic example of a "rotational" manager. The firm focuses almost exclusively on asset mix and sector weighting decisions. Based upon its macroeconomic outlook, the firm will move aggressively into and out of asset classes and equity sectors over the course of a market cycle. The firm tends to purchase liquid, large capitalization stocks. Forstmann-Leff will make sizable market timing moves at any point during a market cycle.

HELLMAN JORDAN

Hellman Jordan is a "rotational" manager. Its cyclical and secular economic forecasts drive its asset mix and industry sector selections. The firm's primary focus is asset allocation, although it will invest in a wide range of industries over a market cycle. The firm tends to purchase liquid, large capitalization stocks. Hellman Jordan will make sudden and significant asset mix shifts over a market cycle.

IDS ADVISORY

IDS employs a "rotational" style of management, shifting among industry sectors based upon its outlook for the economy and the financial markets. The firm emphasizes primarily sector weighting decisions. Moderate market timing is also used. Over a market cycle IDS will invest in a wide range of industries. It tends to buy liquid, large capitalization stocks. While IDS will make occasional significant asset mix shifts over a market cycle, the firm is a less aggressive market timer than most rotational managers.

INVESTMENT ADVISERS

Investment Advisers is a "rotational" manager. Its macroeconomic forecasts drive its investment decision-making. The firm emphasizes market timing and sector weighting decisions. Investment Advisers will invest in a wide range of industries over a market cycle. It tends to hold liquid, medium to large capitalization stocks. The firm is an active market timer, willing to make gradual but significant asset mix shifts over a market cycle.

LIEBER & COMPANY

Lieber & Co. seeks to identify investment concepts that are either currently profitable or likely to become so in the near future, yet whose prospects are not reflected in the stock prices of the companies associated with the concepts. The investment concepts upon which the firm focuses are related to both macroeconomic trends and specific product developments within particular industries or companies. Stocks purchased by Lieber tend to be those of well-managed, high growth and high return on equity, small-to-medium sized companies. The stocks may be undervalued due to the failure of investors to recognize fully either the value of new products or a successful turnaround situation. Particularly attractive to Lieber are small-to-medium sized takeover candidates. The firm generally is fully invested, with any cash positions the result of a lack of attractive investment concepts.

LOOMIS SAYLES

Loomis Sayles is a growth manager that seeks those industries and companies that are expected to experience significant cyclical or secular earnings gains. The Loomis portfolio tends to focus on stocks with relatively high P/E's and low yields and companies with highly variable, but successful patterns of historical earnings growth. The firm generally maintains a fully invested position, only rarely raising cash to significant levels.

PEREGRINE CAPITAL (NORWEST BANK MPLS)

Peregrine concentrates primarily on attractive emerging growth opportunities. The firm searches for industries and companies experiencing: a growing share of GNP; developing new, high growth products; and, which are positively influenced by cyclical economic change. Peregrine is not an active market timer, but will raise cash to moderate levels if it believes the market for emerging growth stocks is likely to be weak.

SIEBEL CAPITAL

Siebel employs an eclectic style of money management concentrating on stock selection, but also considering the effect of macroeconomic factors on the prospects for specific industries and companies. The firm tends to purchase stocks of two principal types of companies: first, seasoned growth companies devising new products or creating new markets for old products which will significantly raise earnings growth and second, low P/E companies undergoing a potentially profitable redeployment of assets. Siebel is a moderate market timer, willing to alter asset mix at any point in the market cycle.

HERBERT R. SMITH

Herbert R. Smith combines a focus on smaller capitalization, growth-oriented stocks with an aggressive market timing approach. The firm uses its economic and political outlook and its technical analysis of the marketplace to establish the asset mix for its portfolios. Its stock selection is predicated upon both fundamental and technical analysis of individual securities. Herbert Smith searches for stocks with attractive relative P/E's and positive technical patterns.

TRUSTEE & INVESTORS

Trustee & Investors uses a disciplined investment approach focusing solely on stock selection. The firm analyzes potential purchase and sale candidates through the use of computerized data bases which screen such fundamental valuation parameters as price, earnings, and balance sheet and income statement data. Trustee & Investors searches for companies with undervalued assets or earnings, or companies undergoing cyclical or operational turnarounds. The firm tends to emphasize growth opportunities in its stock selection. The firm maintains a fully invested position at all times.

WADDELL & REED

Waddell & Reed focuses its attention primarily on small capitalization aggressive growth stocks. However, the firm has demonstrated a willingness to make significant bets against this investment approach for extended periods of time. The firm is an active market timer and will raise cash to extreme levels at various points in the market cycle.
BOND MANAGERS

INVESTMENT ADVISERS

Investment Advisers is a traditional top down bond manager. The firm's approach is oriented toward correct identification of the economy's position in the credit cycle. This analysis leads the firm to its interest rate forecast and maturity decisions, from which the firm derives most of its value-added. Investment Advisers is an active asset allocator, willing to make rapid, significant moves between cash and long maturity investments over the course of an interest rate cycle. Quality, sector and issue selection are secondary decisions. Quality and sector choices are made through yield spread analyses consistent with the interest rate forecasts. Individual security selection receives very limited emphasis, focusing largely on specific bond characteristics such as call provisions.

LEHMAN MANAGEMENT

Lehman's primary emphasis is on forecasting cyclical interest rate trends and positioning its portfolios in terms of maturity, quality and sectors, in response to its interest rate forecast. However, the firm avoids significant, rapidly changing interest rate bets. Instead, it prefers to shift portfolio interest rate sensitivity gradually over a market cycle, avoiding extreme positions in either long or short maturities. Individual bond selection is based on a quantitative valuation approach and the firm's internally-conducted credit analysis. High quality (A or better) undervalued issues are selected consistent with the desired maturity, quality and sector composition of the portfolios.

MILLER, ANDERSON & SHERRERD

Miller Anderson focuses its investments in misunderstood or under-researched classes of securities. Over the years this approach has led the firm to emphasize mortgage-backed securities in its portfolios. The firm rarely purchases corporate bonds. Based on its economic and interest rate outlook, the firm establishes a desired maturity level for its portfolios. This decision is instituted primarily through the selection of specific types of mortgage securities that have prepayment expectations consistent with the portfolio's desired maturity. The firm will also move in and out of cash, but generally only gradually over an interest rate cycle and never taking extremely high cash positions. Total portfolio maturity is always kept within an intermediate three-to-seven year duration band. Unlike many other firms that also invest in mortgage securities, Miller Anderson intensively researches and, even in some cases manages, the mortgage pools in which it invests.

MORGAN STANLEY

Morgan Stanley takes a very conservative approach to fixed income investing, emphasizing the preservation of capital through the generation of consistent real returns. This philosophy has led the firm to maintain a vast majority of its portfolio in short to intermediate maturity, high quality (A or better) securities. Large positions in maturities longer than ten years are held only opportunities. These positions are as temporary trading increased or reduced gradually as the firm's expectations of the cyclical level of interest rates changes. Issue selection is of secondary importance to maturity decisions. Further, the firm avoids short-run trades between qualities and sectors. Rather, given its maturity decisions, the firm prefers to make sizable investments in specific areas of the market where it believes persistent misvaluations are present.

PEREGRINE CAPITAL (NORWEST BANK MPLS)

Peregrine Capital stresses consistency of fixed income portfolio relative returns. To accomplish this goal, the firm maintains a portfolio of high quality, liquid securities and a balance of maturity levels avoiding extreme exposures on either the long or short end. Further, Norwest will make only gradual moves between maturities over an interest rate cycle. The firm's maturity, quality and sector decisions are driven by both its economic forecasts and a quantitative analysis of the sensitivity of various classes of fixed income securities to different interest rate scenarios. The firm also concentrates on exploring misperceived fixed income securities, which has led the firm to make extensive use of mortgage-backed securities and floating rate notes.

WESTERN ASSET MANAGEMENT

Western recognizes the importance of interest rates changes on fixed income portfolio returns. However, the firm believes that successful interest rate forecasting, particularly short-run forecasting, is extremely difficult to accomplish consistently. Thus, the firm attempts to keep portfolio maturity in a narrow band near that of the market, making only relatively small, gradual shifts over an interest rate cycle. It prefers to add value primarily through appropriate sector decisions. Based on its economic analysis, Western will significantly overweight particular sectors, shifting these weights as economic selection, like its maturity expectations warrant. Issue decisions, are of secondary importance to the firm.

EQUITY MANAGER PORTFOLIO STATISTICS GLOSSARY

manager's stock portfolio.

In the table following this glossary, summary descriptions of the individual equity managers' portfolio risk characteristics are displayed. Some of the statistics presented are technical in nature. This glossary is designed to aid in understanding the terms that are introduced.

Qtr. Port. Turnover

- the manager's total equity asset sales during the quarter divided by the average value of the manager's equity assets over the quarter.

of Stocks

Equity Allocation

Yield

P/E

Market Volatility

· · · ·

Diversification

- percent of the manager's total portfolio invested in common and preferred stocks and convertible securities.

- number of different issues held in the

- indicated annual dividend of the manager's stock portfolio divided by the market value of the manager's stock portfolio.
- weighted average price per share of the managers' common stock portfolio divided by the weighted average trailing four quarter earnings per share of the manager's common stock portfolio.
- degree to which the returns on the manager's stock portfolio are sensitive to movements in the stock market's return. By definition the market has a market volatility measure (referred to as beta) of 1.0. Portfolios with values greater (less) than 1.0 have above (below) average (below) average sensitivity to market moves. The SBI's managers are required, over the long-term to hold portfolios with market volatility levels above 1.10. This measure does not include the impact of cash holdings on total portfolio volatility.

- extent to which a manager's equity holdings statistically resemble the stock market. Low (high) diversification portfolios will experience returns which are not well (are well) correlated with those of the market. definition, the market By has a diversification measure of 1.0. The less a portfolio is diversified, the lower will be its diversification measure (referred to as R-squared). The SBI's managers are required, over the long-term, to hold portfolios with diversification levels less than .85.

Portfolio Risk Orientation

- the riskiness of a portfolio can be expressed in terms of its market volatility and diversification. A complementary approach is to break down a portfolio's to risk into sensitivity várious fundamental factors. These factors, six of in this analysis, are which are used related to various balance sheet, income statement and securities data on the stocks which make up a manager's portfolio. The sensitivity of a manager's portfolio to these factors is rated relative to the the stock market's sensitivity. Thus, the term ++ (--) indicates that a portfolio has a relatively very high (low) exposure to the factor. A + (-) indicates an above (below) average exposure. 0 indicates no Α exposure.

- risk related to the historical variability of the prices of stocks in the portfolio. The more variable are the portfolio's securities' prices, the more risky is the portfolio. Items such as current stock price, twelve month price range, trading volume, and beta make up this measure.

- risk related to the variability of the earnings of those companies owned in the manager's portfolio. The more variable are the companies' earnings, the more risky is the portfolio. Items such as variance of accounting earnings, variance of cash flow, occurrence of extraordinary accounting items, and the correlation of companies' earnings with U.S. corporate earnings make up this measure.

- risk related to the extent to which the earnings of companies owned by the portfolio have been recently low or negative. The poorer have been companies' earnings, the riskier is the portfolio. Items including return on equity, earnings growth, book/price ratio, dividend cuts, and tax rate make up this measure.

- risk related to the size and maturity of the companies held in the portfolio. The smaller and younger the companies, the more risky is the portfolio. Items such as total assets, market capitalization, gross plant/book value ratio, and company age make up this measure.

Price Variability

Earnings Variability

Earnings Success

Size

Growth

- risk related to the growth orientation of companies owned by the manager. The more growth-oriented are the companies, the riskier is the portfolio. Items such as dividend yield, E/P ratio, and growth in total assets make up this measure.

Financial Leverage - risk related to the extent to which companies held in the portfolio have used debt to finance their operations. The more leveraged are the companies, the riskier is the portfolio. Items such as debt/asset ratio, current asset/current liability ratio, and uncovered fixed charges make up this ratio.

ALTERNATIVE EQUITY INVESTMENTS

REAL ESTATE SEPARATE ACCOUNT (RESA)

Real Estate Separate Account (RESA) is an open-end commingled real estate fund managed by the Aetna Life and Casualty Company of Hartford, Conn. The fund was formed in January, 1978. The fund has no termination date; investors have the option to withdraw all or a portion of their investment. RESA invests primarily in existing equity real estate. Investments are diversified by location and type of property. On-site management of properties is contracted to outside firms or conducted by a joint venture partner. At the end of fiscal year 1985, RESA held 127 properties with an aggregate market value of \$1.3 billion.

SEPARATE ACCOUNT #8

Separate Account #8 was formed in August 1973 by the New Yorkbased Equitable Real Estate Group, Inc. The account is an openend commingled real estate fund. The fund has no termination date; investors retain the option to withdraw all or a portion of their investment. The fund makes equity investments in existing real estate. The fund's portfolio is diversified by location and property type. Management of the fund's properties is contracted to outside firms or is conducted by joint venture partners. As of June 30, 1985, the Separate Account portfolio was comprised of 232 properties. Total market value of the properties was \$2.4 billion.

PRISA I

PRISA I is an open-end commingled real estate fund. One of the largest and oldest of the open-end funds, PRISA I was formed in July 1970 by the Prudential Investment Management Corporation of New Jersey. PRISA's real estate portfolio consists primarily of equity investments in existing properties. Investments are diversified by both the type and location of properties. Prudential contracts with outside firms for the on-site management of its properties or retains joint venture partners as property managers. The fund has no termination date. Investors have the option quarterly to withdraw a portion or all of their investment. At fiscal year end, PRISA I held investments in 455 properties. Aggregate market value of the properties was \$5.1 billion.

RREEF USA III

RREEF USA III is a \$773 million commingled real estate group trust. The trust, which is managed by the Rosenberg Real Estate Equity Funds, has a twelve year term. Typically, the trust purchases 100% of the equity of its properties with cash. The trust generally does not utilize leverage or participating mortgages. Properties are diversified by location and type. RREEF's in-house staff manages the trust's real estate properties. The firm's primary office is located in San Francisco. At the end of fiscal year 1985, RREEF USA III's portfolio was comprised of 6 investments with an aggregate value, at cost, of \$304.8 million.

HAC GROUP TRUST I

HAC Group Trust I is a \$113 million real estate group trust. The trust was formed in May 1984 and has a term of twelve years. HAC Group Trust I is managed by the Heitman Advisory Group, which is based in Chicago. The majority of the trust investments are equity real estate. The real estate portfolio is diversified by the type and location of the properties. Centre Properties, Ltd., an affiliate of Heitman, manages the trust's wholly-owned properties. Properties that are partially owned by the trust may be managed by joint venture partners. At fiscal year end, HAC Group Trust I held 6 investments totaling \$83.5 million at cost.

TCW REALTY FUND III

TCW Realty Fund III is a \$215 million real estate fund. The fund was formed in July 1985 and has a term of ten years. Management of the fund is a joint venture between Trust Company of the West and Westmark Real Estate Investment Services of Los Angeles The fund manages utilize specialty investment vehicles such as convertible and participating mortgages to enhance real estate Investments are diversified by location and type. returns. Management of portfolio properties typically is conducted by local property management firms. Although the SBI committed to the fund at its June, 1985 meeting, funding did not take place Therefore, the TCW Realty Fund III held no until July. investments at fiscal year end.

STATE STREET REAL ESTATE FUND III

State Street Real Estate Fund III is a \$103 million real estate fund formed in August 1985. The fund has a term of fifteen years. It is managed by the State Street Bank and Trust Company of Boston. State Street Bank has retained Aldrich, Eastman and Waltch as the Fund's advisor. The fund's special orientation is the use of creative investment vehicles such as convertible and participating mortgages to maximize real estate returns. The real estate portfolio is diversified by location and property

type. On-site property management typically is contracted to outside firms or conducted by joint venture partners. The fund's initial investments were made after the 1985 fiscal year end.

NORTHWEST VENTURE PARTNERS |

Northwest Venture Partners I is a \$60 million venture capital limited partnership. The partnership, which was formed in

January 1984, has a term of ten years. Norwest Venture Capital Management, a wholly owned subsidiary of Norwest Corp., is the general partner and manager of the partnership. Norwest Venture Capital also manages the Norwest Growth Fund, an SBIC, and Norwest Equity Capital, a leveraged buyout fund. Norwest Venture Partners' investment focus is on high technology companies in the early stages of corporate development. However, the partnership's portfolio also includes investments in expansion stage firms and is diversified by the location and industry type of its portfolio companies. As of June 30, 1985, Northwest Venture Partners held investments in 22 portfolio companies. The investments totaled \$14.8 million at cost.

1984 INVESTMENT PARTNERSHIP (KKR III)

KKR III is a \$1 billion leveraged buyout limited partnership. The partnership was formed in March 1984 and has a term of twelve years. It is the third leveraged buyout fund to be managed by Kohlberg, Kravis, Roberts and Co., which operates offices in New York and San Francisco. KKR III invests in large management leveraged buyouts. The partnership's portfolio companies are mature, low technology companies with very diversified operations. At fiscal year end, KKR III held five investments with an aggregate cost of \$544 million.

SUMMIT VENTURES

Summit Ventures is a \$93 million venture capital limited partnership. The partnership has a ten year term. It was formed in December 1984 by Stamps, Woodsum & Co., the managing general partners of the fund and Shearson/American Express Stamps and Woodsum focus on profitable, expansion stage firms that have not yet received any venture backing. The majority of the partnership's investments are in high tech firms. Investments are diversified by location and industry type. At fiscal year end, Summit Ventures held investments in 7 companies. The aggregate value of the Summit portfolio investments at cost was \$7.4 million.

FIRST CENTURY III

First Century III is a venture capital limited partnership. The partnership, which was formed in December 1984, is \$100 million in size and has a term of ten years. The general partner and manager of the partnership is Smith Barney Venture Corp., a subsidiary of Smith Barney Harris Upham and Co. Smith Barney Venture has offices in New York and San Francisco. This is the third fund formed by the firm since 1972. The partnership invests primarily in early stage, high technology companies. Investments are diversified by location and industry group. As of June 30, 1985, First Century III's portfolio was comprised of 6 investments with a combined cost of \$4.5 million.

DSV PARTNERS IV

DSV Partners IV was formed in April, 1985. It is a \$60 million venture capital limited partnership with a twelve year term. DSV Partners IV is the fourth venture fund to be managed by DSV Management Ltd since the firm's inception in 1968. The firm's primary office is located in Princeton, New Jersey. However, the firm will open a California office in 1986. DSV Partners' investment emphasis is on portfolio companies in the start up and early stages of corporate development. The geographic focus of the partnership is on East and West Coast firms. Investments are diversified by industry type. Formed in the last quarter of the fiscal year, DSV IV held only one \$200,000 venture investment at fiscal year end.

INMAN & BOWMAN

Inman & Bowan was formed in June, 1985. The fund is a \$44 million venture capital limited partnership. Its investment focus is early-stage, high-technology firms. The fund will emphasize investments in California, where the general partner, Inman & Bowman Management, is based. However, Inman and Bowman work closely with Rainier Venture Partners, a small Washington venture firm. They expect to make several co-investments with Rainier in the Pacific Northwest. The partnership has a ten year term. It received its first funding in June but made no investments in fiscal year 1985.

· · ·

MATRIX PARTNERS II

Matrix Partners II was formed in August, 1985. The fund is \$70 million in size and has a term of ten years. The fund's investment emphasis is on high-technology firms in the early and expansion stages of corporate development. However, for diversification the Fund's portfolio will include a sizable component of non-technology firms. The portfolio may include several small leveraged buyout investments as well. The fund is managed by five experienced general partners. The partners have offices in Boston, San Jose, and San Francisco. The fund made no investments in fiscal year 1985.

ALLIED VENTURE PARTNERSHIP

Allied Venture Partnership is a \$40 million venture capital limited partnership. The fund was formed in September 1985 and has a ten year term. Based in Washington D.C., the fund will focus on later stage, low technology companies located in the Southeastern and Eastern U.S. Most investments will be made in syndication with Allied Capital, a large publicly-owned venture capital corporation formed in 1958.

AMGO I

AMGO I is a \$144 million oil and gas limited partnership. The fund was formed in July 1981 and has a term of twenty years. The general partner and manager of the fund is First Reserve Corp. The general partner's long-term investment strategy is to create a diversified portfolio of oil and gas investments for the fund. The portfolio is diversified across four dimensions: location, geological structure, investment type, and operating company. At the end of fiscal year 1985, AMGO I held 23 investments. The total value of the investments at cost was \$132.5 million.

AMGO II

Formed in December 1982, Amgo II is a \$36 million oil and gas limited partnership with a nineteen year term. First Reserve Corp. of New York is the general partner and manager of both Amgo I and Amgo II. First Reserve's strategy for Amgo II is similar to that of Amgo I. Amgo II's portfolio is diversified by location, geological structure, investment type, and operating company. As of June 30, 1985, Amgo II's portfolio consisted of 10 investments, totaling \$23.1 million at cost.

10% EQUIPMENT FINANCING NOTES

The Apache Corp. 10% Equipment Financing Notes are a \$150 million private placement to finance Apache's portion of production facility expenditures. The expenditures were made under the terms of a series of offshore joint ventures in the Gulf of Mexico. The joint ventures were organized by Shell Oil Company. In addition to fixed interest payments of 10% per annum, noteholders will receive additional interest of 2% of Apache's . share of gross revenues from the joint ventures. Principal and interest on the notes are estimated to be repaid by 1992. The 2% additional interest will be paid to noteholders throughout the life of producing properties. At fiscal year end, Apache Corp. held 1 investment in the fund's portfolio. The investment required \$1.7 million of the total \$150 million private placement. Apache Corp. is based in Minneapolis.

In measuring the performance of a manager or fund whose investment objective is to maximize the total value of an investment portfolio, the proper measuring tool is the timeweighted total rate of return. This performance measure includes the effect of income earned as well as realized and unrealized portfolio market value changes. In addition, the time-weighted total rate of return nets out the influence of contributions made to and distributions taken from the manager or fund. These are variables over which the manager or fund generally has no control.

The calculation of a portfolio's true time-weighted return requires that the portfolio be valued every time that there is a capital flow in or out. Because most portfolios are not valued that frequently, it is usually necessary to estimate the timeweighted total rates of return by approximating the required valuations.

In 1968, the Bank Administration Institute (BAI) commissioned a study, conducted by the University of Chicago, which considered desirable methods of estimating time-weighted returns. The BAI report is considered to be the definitive work in the field of performance measurement because of the academic reputations and thorough scientific efforts of its authors.

When monthly data are available, the BAI study recommends employing a technique called the linked internal rate of return (LIRR). Merrill Lynch, the SBI's performance measurement consultant, calculates the LIRR by solving the following equation for R:

VB\*(1+R) + C\*(1+R)\*\*1/2 = VE

Where:

VB = Value of the fund at the beginning of the month

VE = Value of the fund at the end of the month

C = Assumed single mid-month net cash flow

R = Internal rate of return

The internal rate of return, R, is a proxy for the true timeweighted return over the month. It approximates the interim valuations by assuming a uniform growth of the invested assets throughout the period.

The IRR's calculated for each month can be linked together to estimate the time-weighted return for a longer period. For example, given three consecutive monthly IRR's - R1, R2, and R3, the quarterly time-weighted return (TWRQ) is:

TWRQ = (1+R1)\*(1+R2)\*(1+R3) - 1

STATE OF MINNESOTA OFFICE OF THE LEGISLATIVE AUDITOR VETERANS SERVICE BUILDING, ST. PAUL, MN 55155 • 612/296-4708

JAMES R. NOBLES, LEGISLATIVE AUDITOR

The State Board of Investment and Howard J. Bicker, Executive Director

We have examined the combining and individual fund financial statements, including the portfolio of investments, and the supplementary schedule of participation of the Investment Trust Funds of the Minnesota State Board of Investment as of and for the year ended June 30, 1985 as shown on pages 98 to 199. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. Securities owned at June 30, 1985 were counted by us when held by the State Treasurer or were confirmed to us when held by other custodians.

In our opinion, the aforementioned combining and individual fund financial statements PRESENT FAIRLY the net assets and participation of the INVESTMENT TRUST FUNDS of the State of Minnesota at June 30, 1985, and the results of their operations and changes in their net assets for the year then ended, in conformity with generally accepted accounting principles which have been applied on a basis consistent with that of the preceding fiscal year.

Sincerely,

James R. Nobles Legislative Auditor

John Armuner, CPA

Deputy Legislative Auditor

November 22, 1985

#### STATE BOARD OF INVESTMENT INVESTMENT TRUST FUNDS COMBINING STATEMENT OF ASSETS AND LIABILITIES JUNE 30, 1985

#### SIGNIFICANT ACCOUNTING POLICIES

The following general notes apply to all financial statements presented herein for the twelve funds under management of the State Board. Specific notes can be found immediately after the financial statements.

The Minnesota Post Retirement Fund, Minnesata Variable Annuity Fund, Minnesota Supplemental Retirement Fund, Minnesota Active Equity Pooled Fund, Minnesota Passive Equity Pooled Fund, Minnesota Real Estate Pooled Fund, Minnesota Resource Pooled Fund, Minnesota Venture Capital Pooled Fund and the Minnesota Bond Pooled Fund are managed by the State Board of Investment under authority of Minnesota Statutes 11A. The Supplemental Fund prepares separate financial statements for four investment accounts which it is comprised of: Income Share, Growth Share, Fixed Return and Bond Accounts.

The assets of the six pooled funds are held by our master custodian State Street Bank of Boston. The six Basic Retirement Funds are the sole participants of these pooled funds. State Street Bank also invests cash equivalents for the six basic retirement funds and the value of these cash equivalents are included in the combining statement. The master custodial relationship with State Street Bank started on November 1, 1983. The Minnesota Active Equity Pooled Fund was created on March 1, 1983 and the remaining five pooled funds on November 1, 1984. On February 1, 1985 the Minnesota Supplemental Retirement Fund and the Minnesota Variable Annuity Fund were moved to State Street Bank. The assets owned by these funds didn't participate with the Basic Funds in the various investment pools during Fiscal Year 1985. They will participate in the pools starting July 1, 1985.

The financial statements presented for these funds are based on the preferred accounting practices described in the American Institute of Certified Public Accountants audit guide, "Audits of Investment Companies".These practices and the significant accounting policies which follow are in conformity with generally accepted accounting principles.

The format of the financial statements presented herein is unchanged from that used in the prior years report. The four investment accounts that make up the Supplemental Fund are combined to show the total for that fund. The six pooled funds are combined to show the total investments for the six basic retirement funds that are held at State Street Bank. The totals for the Supplemental Fund and the Pooled Funds are then combined with the Post Retirement and Variable Annuity Funds to present the entire group of funds administered by the State Board on a combined basis.

SECURITY VALUATION: All securities are valued at market except for U.S. Government short-term securities and commercial paper, which are valued at market less accrued interest. Accrued short-term interest is recognized as income as part of "Short-Term Gain". For long-term fixed income securities the State Board uses the Merrill Lynch valuation system. This pricing service is capable of providing prices for both actively traded and privately placed bonds. For equity securities the State Board uses a valuation service provided by Compensation & Capital.

RECOGNITION OF SECURITY TRANSACTIONS: Security transactions are accounted for on the date the securities are purchased or sold.

INCOME RECOGNITION: Dividend income is recorded on the ex-dividend date. Interest and dividend income are accrued monthly. Short term interest is accrued monthly and is presented as "Accrued Short-Term Gain".

LOANING SECURITIES: Certain U.S. Government and Government Agency securities are loaned out by the State Board to banks and brokers for additional income. Collateral in the amount of 105% of the market value of the security loaned is required. The Pooled Funds under the custody of State Street Bank participate in a loan program in which equity and corporate bonds are loaned out to banks and brokers for additional income. This program is run entirely by the Bank with the income generated being split evenly by the State Board and the Bank.

PORTFOLIO LISTING: A listing of all securities held by these funds can be found starting on page 111 of this report. Bonds are shown at face value and stocks at market value. Securities held as cash equivalents are not listed.

#### GENERAL FOOTNOTES:

GENERAL FOUTNOTES: 3)Options premiums received are shown as a liability until such time as the option contract is terminated. Upon termination any gain or loss applicable to the option transaction is recognized. For reporting purposes the market value of the option is shown on the Statement of Assets and Liabilities, while the difference between the premium received and the market value of the option is reported on the Statement of Operations as part of the "Increase (Decrease) in Unrealized Appreciation". At June 30, 1985 the option account in the Post Retirement Fund was:

| Option Premium Received | \$187,089.34 |
|-------------------------|--------------|
| Market Value of Options | 141,875.00   |
| Unrealized Appreciation | \$ 45,214.34 |

4) STATUTORY VALUATIONS REQUIRED IN MINNESOTA VARIABLE ANNUITY FUND: The Admitted Value Increment at June 30, 1984 and 1985 was \$4,298,664 and \$3,475,517 respectively. This valuation is required by Minnesota Statutes 11A.19 Subdivision 5 and is the amount by which the recognized value of investments is above or below the book value of investments. The admitted value is based on an average ratio of book value to market value of the securities calculated over a two year period. This calculation is used to determine the rate of return and the increase or decrease which shall be credited to the individual member's account balances at the end of the fiscal year.

Laws of Minnesota 1978, Chapter 781, stated in part "Effective July 1, 1978 no future employee and employer contribution shall be credited to any account in the variable annuity division unless the member elects continued participation...". Very few members of the Teachers' Retirement Fund elected to continue in the variable annuity division. Previous contributions for all former and current participants in the variable annuity fund will remain in that fund until the participant retires or withdraws in accordance with the Teachers' Retirement Act (M.S.354)

#### VARIABLE ANNUITY FUND PARTICIPATION AT JUNE 30,1985

| Net Assets                  | \$ 119,219,335    |
|-----------------------------|-------------------|
| Admitted Value Increment    | 3,475,517         |
| Less:Unrealized Market      | \$ 122,694,852    |
| Appreciation (Depreciation) | <u>11,103,356</u> |
| Total Participation         | \$ 111,591,496    |

5) Withdrawals from the fixed return account are paid out pursuant to Minnesota Statutes 11A.17 Subdivision 9, which states in part that: "The value of investment shares in the fixed-return account shall be \$5 per share; provided, however, if the fixed-return investment account shares are redeemed by a public retirement fund where the shares are not attributable to the individual account of any person prior to the expiration of the multi-year period set by the board for the payment of the applicable assumed rate, the value of the investment shares shall be at market value. Terms as to withdrawal schedules will be agreed upon by the public retirement fund and the state board."

6) The Minnesota Supplemental Investment Fund Bond Account was created pursuant to Laws of Minnesota 1981, Chapter 208 with activity commencing on July 1, 1981. It is designed for public retirement funds who wish to lock in a guaranteed rate over a multi-year period. These retirement funds have been participating in a similar multi-year guaranteed rate plan in the Fixed Return Account. The guaranteed rate plan is being phased out of the Fixed Return Account. Income earned from prior year pools in the Fixed Return Account is being transferred to the Bond Account on a monthly basis. This income, new contributions and principal from the guaranteed rate pools as it matures will all be invested in the Bond Account.

7)Total participation for the Post Retirement Fund is equal to the actuarially determined required reserves at June 30, 1985. It includes the 5% actuarially assumed income distribution made pursuant to Minnesota Statutes 11A.18 and the mortality gains and losses as determined by the actuaries for the applicable retirement funds.

8) The annuity stabilization reserve is the difference between the actuarially determined reserves required to support benefits in force and the book value of the assets of the fund. Pursuant to Minnesota Statutes 11A.18 Subdivision 9 Clause 2C, "The book value of assets on any given date shall be the net assets at cost less the excess investment income determined pursuant to Clause (1) (C)." "If the state board determines that the book value of the assets of the fund is less than an amount equal to 100 percent of the current June 30 required reserves, with the book value and required reserves to be determined after the adjustments provided for in Subdivision 11, then the board shall allocate five percent of the excess investment income as an asset of the fund. The remaining 95 percent will be termed available for distribution."

The Deferred Yield Adjustment account at June 30, 1985 is 0.00. This account is required by Minnesota Statutes 11A.18 Subdivision 5 and is the unamortized loss on the sale or disposition of debt securities. The account is increased by the loss on the sale of debt securities and decreased by the gain on the sale of such securities. At the end of each year a portion of the balance is offset against investment income for the year.

| FISCAL YEAR               | 1985            |
|---------------------------|-----------------|
| Deferred Yield Adjustment |                 |
| Beginning Balance         | \$21,580,322.81 |
| Net Realized (Gain) Loss  | (24,532,745.38) |
| Excess Gain               | (24,532,745.38) |
| Balance at June 30        | \$ 0.00         |

9) The unrealized market appreciation or (depreciation) is the difference between the cost and market value of investments.

10) Pursuant to Minnesota Statutes 11A.18 Subdivision 9 this is the portion of fiscal year 1985 income which is available for distribution as a benefit increase in January of 1986. This amount shall be increased by 2.5% from fiscal year 1986 income and shall be stated as a percentage of total required reserves. The amount available shall be certified to each participating pension fund for distribution to eligible individuals. Individuals receiving benefits at June 30, 1984 are eligible to receive the January 1, 1986 increase. Past increases paid to retirees on January 1st have been:

| 1981 | 3.209% |
|------|--------|
| L982 | 7.436% |
| L983 | 6.853% |
| L984 | 7.449% |
| 1985 | 6.905% |

The benefit increase for January 1, 1986 will be 7.884%.

SUBSEQUENT EVENTS:

At it's October 2, 1985 meeting the Minnesota State Board of Investment adopted a resolution relating to companies doing business in South Africa. The resolution calls for the divestment of companies not meeting predetermined guidelines in a four phased approach. The first three phases relate to individual companies signing and complying with the Sullivan Principles. The fourth phase, to be completed by August, 1989, calls for the divestment of any company with operations in South Africa.

The resolution also calls for the SBI to receive financial and legal advise at the completion of each phase to insure it is not violating it's fiduciary responsibility.

It can't be determined at this time what effect, if any, this resolution will have on the SBI's investment flexibility.
